

Virtual AskQC Office Hours

7xx Linking Fields
OCLC Metadata Quality
February 2021

Housekeeping

- This session is being recorded

Housekeeping

- This session is being recorded
- All session recordings, slides, and notes are available at oc.lc/askqc

The screenshot shows the OCLC AskQC website interface. At the top, there is a navigation bar with the OCLC logo, a search bar, and links for 'Release notes', 'System Status Dashboard', and 'Contact OCLC Support'. Below the navigation bar is a breadcrumb trail: 'Home > WorldCat > Metadata Quality > AskQC'. The main content area is titled 'Previous AskQC office hours' and includes the text 'Last updated: Nov 2, 2020' and 'Find past AskQC office hour recordings and supporting materials.' Below this, there are three main entries, each with a title and a list of links:

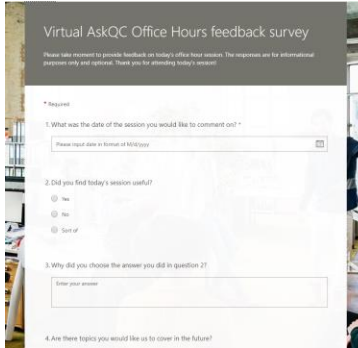

- January 2020 :: Best practices for editing WorldCat bibliographic records**
 - [WorldCat metadata - January 2](#)
 - [13 Presentation slides](#)
 - [Session and meeting materials](#)
- November 13, 2019 :: Comparisons of searching in Connexion and Record Manager**
 - [WorldCat metadata](#)
 - [13 Presentation slides](#)
- October 2019 :: 1, 2, 3, 4, 5: Everything you wanted to know about stats but were afraid to ask**

On the right side of the screenshot, there is a 'Table of contents' section with a list of 13 numbered items corresponding to the office hours sessions:

1. January 2020 - Best practices for editing WorldCat bibliographic records
2. November 13, 2019 - Comparisons of searching in Connexion and Record Manager
3. October 2019 - 1, 2, 3, 4, 5: Everything you wanted to know about stats but were afraid to ask
4. September 11, 2019 - WorldCat metadata: how quality connections between the KB and title records
5. August 14, 2019 - OCLC cataloging policies: An overview of Bibliographic Functions and Standards
6. June 12, 2019 - Fixing duplicate title records and the Remote Access Project
7. May 8, 2019 - Small errors with big consequences
8. April 10, 2019 - An overview of OCLC training resources
9. March 13, 2019 - Intro to the Virtual International Authority File (VIAF)
10. February 13, 2019 - Finding record connections
11. January 8, 2019 - When to input a new record

Housekeeping

- This session is being recorded
- All session recordings, slides, and notes are available at oc.lc/askqc
- After the session, you will be directed to a brief, optional survey

Virtual AskQC Office Hours feedback survey

Please take a moment to provide feedback on today's office hour session. The responses are for informational purposes only and optional. Thank you for attending today's session!

* Required

1. What was the date of the session you would like to comment on? *

Please input date in format of MM/yyyy

2. Did you find today's session useful?

Yes

No

Sort of

3. Why did you choose the answer you did in question 2?

Enter your answer

4. Are there topics you would like us to cover in the future?

On the call today

76x-78x Linking Entry Fields

- Describes separately cataloged publications that are related to the item you are cataloging
- MARC 7xx linking fields: 765, 767, 773, 774, 775, 776, 777, 786, 787
- MARC 7xx serial linking fields: 760, 762, 770, 772, 780, 785

7

February 2021

Virtual AskQC Office Hours: 7xx Linking Fields

A linking entry describes separately cataloged publications that are related to the item you are cataloging. These fields allow the establishment of bibliographic connections among materials with diverse relationships

These fields can be broken down into 2 groups, those that can be used on any format and those most commonly used on continuing resource records, such as serials and integrating resources.

I will be covering the 1st group and Charlene will cover the 2nd group.

Example of Input Standards and Repeatability

760 Main Series Entry (R)

Record Type
BIB

Input Standards
Field (Full/Minimal)
Optional/Optional

1st Indicator Note controller
0 Display note
1 Do not display note

2nd Indicator Display constant controller
Main series
0 No display constant generated

Subfields (R=Repeatable NR=Nonrepeatable) Input Standards (Full/Minimal)
#a Main entry heading (NR) Required if applicable/Required if applicable
#b Edition (NR) Required if applicable/Required if applicable

8 February 2021 Virtual AskQC Office Hours: 7xx Linking Fields OCLC

This screenshot shows how you can determine a 7xx linking field's Input Standards and (R)epeatably from that field's page in Bibliographic Formats and Standards (BFAS).

The MARC tag number and the name of the linking field will contain an (R) next to it to if it is repeatable and an (NR) if it is not repeatable. Currently all 7xx linking fields are repeatable.

The field's Input Standards lets you know when that linking field is "Mandatory," "Required if applicable" or "Optional," for Full (F) and Minimal (M) level cataloging.

Insert from Cited Record

1 776 0 8 613003970

2 776 0 8 Blakiston, Thomas Wright, 1832-1891. #t Five months on the Yang-Tsze. #d London, J. Murray, 1862 #w (OCoLC)613003970

3 776 0 8 #i Online version: #a Blakiston, Thomas Wright, 1832-1891. #t Five months on the Yang-Tsze. #d London, J. Murray, 1862 #w (OCoLC)613003970

Connexion client Record Manager

9 February 2021 Virtual AskQc Office Hours: 7xx Linking Fields OCLC

You can automatically build linked entry fields that cite related records.

While logged on in Connexion or Record Manager, enter the linking field tag and appropriate indicators for the field you wish to use.

Enter the OCLC control number of the record you want to cite in the field data cell and select the Insert from Cited Record command from the Edit menu in Connexion client or the Functions drop-down box in Connexion browser. In Record Manager select the Edit drop-down menu, then Field, to get to the Insert from Cited Record option.

The data from the cited record will automatically be inserted into the appropriate subfields.

You will need to manually enter any subfield \$i information for fields with a second indicator of 8, and remove any parenthetical information inserted with an ISBN in the subfield \$z.

In this example I have created a field 776 with the indicators 08 and I have populated the field data cell with the OCLC record number of the record I want to cite. After using the Insert from Cited Record feature, the information from the cited record is automatically populated. All that's needed now is to add the subfield \$i information and

the subfield \$a delimiter before the main entry.

7xx Linking Fields

General Linking Fields

Field 773 – Host Item Entry

- Link to the host item for the constituent unit in a vertical relationship described in the record
- Indexed subfields: \$i, \$a, \$p, \$s, \$t, \$4, \$u, \$x, \$z, \$w
- Does NOT transfer when records are merged
- May be added to and/or edited in PCC records
- Required if applicable field
- Repeatable field
- Display constant: **In**

Image by Jennifer R. from Pixabay

14 February 2021

Virtual AskQC Office Hours: 7xx Linking Fields

Information about the host item for the constituent unit in a vertical relationship described in the record. Field 773 enables the user to locate the physical piece that contains the component part or subunit being described. Include in field 773 only those data elements necessary to assist in the identification of the host item (e.g., links to the bibliographic record describing the item and/or descriptive data that identify the host item). For host items that are serial or multivolume in nature, use subfield \$g to point to the exact location of the component part within the bibliographic item. See [Linking Entry Fields--General Information](#) for more information.

Field 770 - Supplement/Special Issue Entry

- Link to the supplements or special issues associated with the target item in a **vertical relationship**, but cataloged as separate record.
- Indexed subfields: \$i, \$a, \$s, \$t, \$r, \$u, \$x, \$y, \$z, \$4
- Does NOT transfer when records are merged
- May NOT be added to and/or edited in PCC records
- Optional field
- Repeatable field
- Display constant: **Has supplement**

Virtual AskQC Office Hours: 7xx Linking Fields

Information about the supplements or special issues associated with the target item in a vertical relationship, but cataloged as separate records. See [Linking Entry Fields--General Information](#) for more information.

Subfields indexes relate to the title, author, relationship terms, and standard numbers for supplement or special issue.

Optional field for both Full and Minimal level records.

Display constant determined by the second indicator.

Field 772 - Supplement Parent Entry

- Link to the related parent record when the target item in a **vertical relationship** is a single issue, supplement, or special issue of the parent item.
- Indexed subfields: \$i, \$4
- Does NOT transfer when records are merged
- May NOT be added to and/or edited in PCC records
- Optional field
- Repeatable field
- Display constants:
 - **Supplement to**
 - **Parent**

Using RDA relationships instead of second indicators "blank" or "0".

Field 780 - Preceding Entry

- Link to the immediate predecessor of the target item in a **chronological relationship**. See also field 580.
- Do NOT use subfield \$h
- Indexed subfields: \$i, \$a, \$s, \$t, \$x, \$y, \$z, \$4
- Does NOT transfer when records are merged
- May NOT be added to and/or edited in PCC records
- Required if applicable field (full)
- Optional field (minimal)
- Repeatable field

36 February 2021

Virtual AskQC Office Hours: 7xx Linking Fields

Information about the immediate predecessor of the target item in a chronological relationship. Repeat field 780 if there is more than one predecessor entry. When a note is generated from this field, it is displayed with an introductory phrase that is generated as a display constant based on the 2nd indicator value. See [Linking Entry Fields--General Information](#) for more information.

Subfields indexes relate to the title, author, relationship terms, and standard numbers for the preceding serial.

Required if applicable field for Full level records.

Optional field for Minimal level records.

Sources:

37 February 2021

Virtual AskQC Office Hours: 7xx Linking Fields

Information about the immediate successor of the target item in a chronological relationship. Repeat field 785 if there is more than one succeeding entry. When a note is generated from this field, it is displayed with an introductory phrase that is generated as a display constant based on the 2nd indicator value. See [Linking Entry Fields--General Information](#) for more information.

Subfields indexes relate to the title, author, relationship terms, and standard numbers for that succeeding serial.

Required if applicable field for Full level records.

Optional field for Minimal level records.

Field 580 - Linking Entry Complexity Note

- Note explaining a complex relationship between the described materials and other items that cannot be adequately generated from the 76x-78x fields.
- Indexed subfields: none
- Does NOT transfer when records are merged
- May NOT be added to and/or edited in PCC records
- Required if applicable field (full)
- Optional field (minimal)
- Repeatable field

38 February 2021

Virtual AskQC Office Hours: 7x Linking Fields

Note explaining a complex relationship between the described materials and other items that cannot be adequately generated from the 76x-78x fields.

Use field 580 also to state a relationship when no corresponding linking entry fields are present. For example, use for:

A regular-print reprint to provide details of the original publication

A continuing resource bearing a relationship to a monograph or other non-serial publication

A continuing resource bearing a relationship to one or more publications that cannot be named

A continuing resource issued in more than one frequency when two or more records are required

Required if applicable field for Full level records.

Optional field for Minimal level records.
