Catalogue Training

OVERVIEW

Catalogue records store the bibliographic details of the items within a given collection. As such they allow users to search for and identify works within a collection grouped by author, title, subject, etc.

The *Authorities* and *Stockitem* modules are closely linked with the *Catalogue* module.

The *Authorities* module is responsible for the availability, maintenance and format of the Authorities: MARC tag listings (comprised of such things as authors, titles and subjects) that are standardized to ensure the consistency of the data between catalogue records. These Authorities are searched from the *Catalogue* module for insertion into a Catalogue record.

Amlib stores the data in USMARC, which is the international standard. This is made up of hundreds of Tags, which identify data. On the whole, libraries only use approximately 10% of the available tags. In the same way that Dewey numbers become familiar, common tags become known.

SOME COMMON TAGS	DESCRIPTION
020	ISBN
082	Dewey classification number
100	Personal name main entry (usually author)
245	Title statement (Main title)
260	Publication information
300	Physical description
440	Series
500	General notes
520	Summary
650	Subject headings (Topical)
700	Personal name (Added entry)

Please Note: Nearly every tag has an "a" Subfield tag, with the exception of **260 | Publisher**, which can exist without the "a" subfield tag (Place of Publication) and **856 | URL**.

The *Stockitem* represents the holdings (the individual copies of an item) and can display Catalogue data according to the certain pre-defined display parameters. Whilst it is possible to create a *Stockitem* record that does not use a Catalogue record as the source of its bibliographic data, the *Stockitem* record without a Catalogue record to reference cannot be keyword searched. For example: an Inter-Library Loan usually has no Catalogue record attached, so Keyword searching is not possible because there are no underlying MARC tags.

When creating new Catalogue records, *Amlib* allows the import of MARC records from external agencies (for example: *SCIS*, *State Library of WA*, *Libraries Australia*, etc). Import is also available from the [CatZSearch](#) (subject to copyright).

Catalogue Training

Functionality includes the manual creation of records from a Worksheet, as a Lead Thru Set, Duplicate or as a record built up from scratch.

RDA (*Resource Description and Access*) was implemented in March 2013 and is a transition from (*Anglo-American Cataloguing Rules*, second edition), mainly to consider the variety of formats available beyond print.

Changes to make description and access more attainable with a focus on helping users more effectively includes less abbreviations

Changes in Amlib should be minimal but will include:

- New Marc Tags (for example MARC field 264 which will replace field 260 in RDA records) as well as 33x Marc Tags
- Change to Worksheet and Cataloguing Worksheet Templates (Lead Thru Sets)
- Change to Stockitem Form Display Tags
- Change to NetOpac Display Tags

See the RDA Implementation Guide available from our Content Portal

The course will cover 6 main Sections:

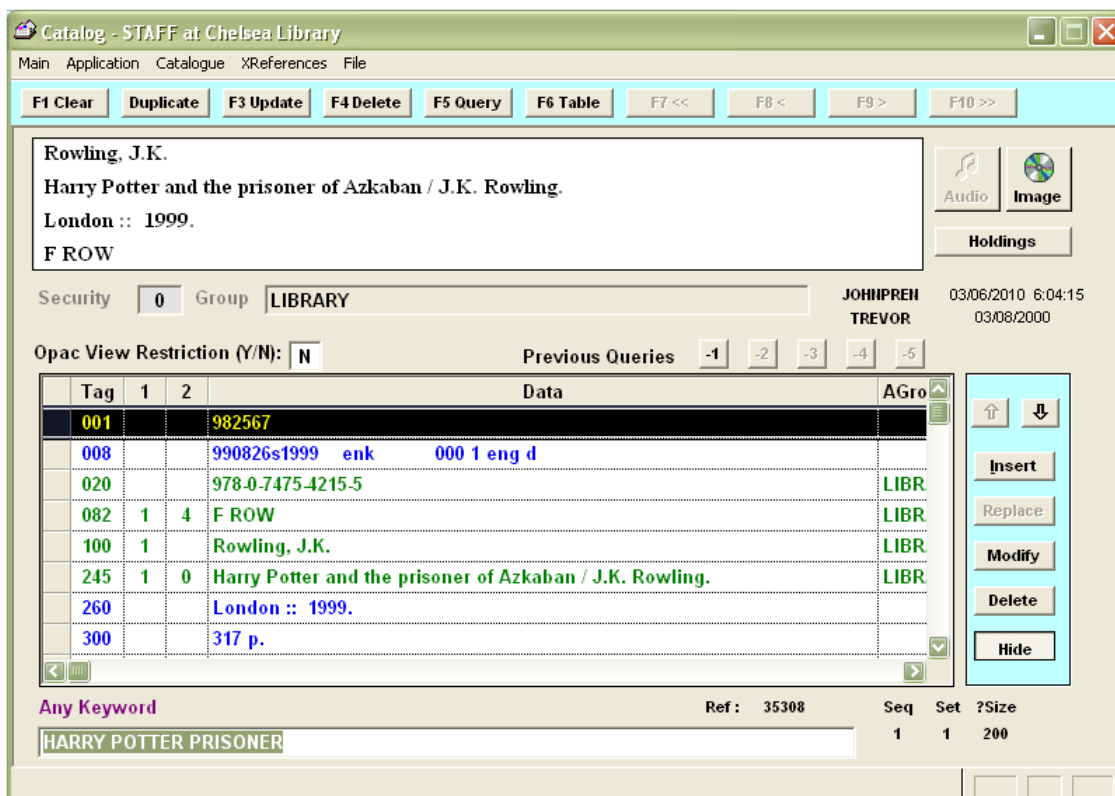

- Section 1: Main Catalogue Screen & Search
- Section 2 : Creating Catalogue Records – Manually and through Marc Import
- Section 3 : Modifying Catalogue records
- Section 4 : Parameters
- Section 5 : Maintenance
- Section 6 : Reports

AUTHORITIES	CATALOGUE	STOCKITEM
<p>Authority Control:</p> <ul style="list-style-type: none"> • Maintains consistency <p>Standards for :</p> <ul style="list-style-type: none"> • Authors • Subject headings • Series, etc • Keyword codes assigned to MARC Tags <p>MARC Tags:</p> <ul style="list-style-type: none"> • Creation • Maintenance • Format (for example: hyphen in Subject headings) • <i>See and See Also</i> References 	<p>Bibliographic Data:</p> <ul style="list-style-type: none"> • Contains data fields that identifies the Catalogue record • Made up of MARC Tags <p>Authority Shared:</p> <p><i>Usually searched within the <u>Authorities</u> module to maintain consistency</i></p> <ul style="list-style-type: none"> • Authors (100) • Added Authors (700,710) • Subject headings (600 – 699) • Series, etc (440, 490) <p>Authority Non-Shared:</p> <ul style="list-style-type: none"> • ISBN (020) • Title (245) (usually) • Added Title (740) <p>Non-Authority Tags:</p> <ul style="list-style-type: none"> • Notes (500 – 599) • Publisher (260) (usually) • Extent (300) 	<p>Holdings Data:</p> <ul style="list-style-type: none"> • Contains data fields that identifies the Item record • Displays 6 lines of bibliographic data from the Catalogue record (usually <u>Title</u>, <u>Author</u>, <u>Publisher</u>, <u>Series/ISBN</u>, <u>Subject</u>, <u>Call No</u>) as determined by the F9 Display parameters in the <u>Form Codes</u> screen <p>Other data includes:</p> <ul style="list-style-type: none"> • Barcode (<u>Item No</u>) • <u>Cost</u> • Date <u>Accessioned</u> • Date <u>Received</u> • <u>Form</u> code • <u>Location</u> • <u>Floor</u> Location • <u>Process</u> (for example: Missing) • <u>Stats Code</u>

SECTION 1: MAIN ENTRY SCREEN

1. Launch the *Amlib* client
2. Go to **Main > Catalogue > Catalogue** (or the  icon) – the Catalog screen will display:

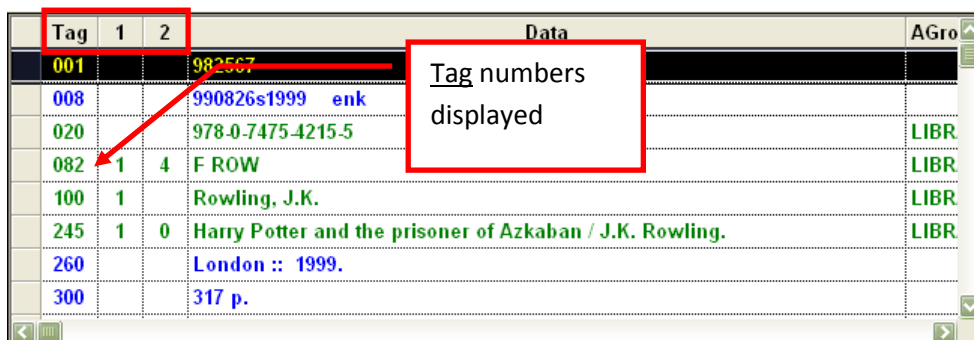

The window in the top part of the Catalog screen displays a brief summary of the bibliographic details: usually *Author*, *Title*, *Publisher* and *Call Number* details (as defined in the [Set Up Display Tags](#) screen)

The full details can be viewed with the Tag Number of Descriptor.

Tag Display

1. The display can be changed by simply clicking on the Tag heading to toggle between the Tag number and Field (Tag Description):

Catalogue Training

Field	Data
Control number	982567
Fixed Length Data	00826s1999 enk
ISBN	978-0-7475-4215-5
Call Number	F ROW
Author - Personal name	Rowling, J.K.
Title statement	Harry Potter and the
Publisher (Imprint)	London :: 1999.
Physical description	317 p.

Tag Description as defined in **Main > Authorities > Marc Tags**. The Description can be altered in that table to be more succinct.

SEARCHING FOR CATALOGUE ITEMS

Catalogues may be searched in a number of ways depending upon how parameters have been defined at your installation. You may also find Catalogue records by XReferencing from the *Authorities* and *Stockitem* modules.

Stockitem

1. Launch the *Amlib* client
2. Go **Main > StockItem > Stockitem** – the Stockitem screen will display
3. Enter a search term

QUERY VIA	
Item	Browse search for data displayed within the Stockitem application
Cat	Browse search for data displayed within the Catalogue application
Keyword	Searches any keyword using the line the Search Term was entered (the six lines available within Stockitem are usually Title, Author, Subject, Series, Publisher or Call No). Typing in the Subject line will search only Subject keywords.
Any	Searches for any keyword, even if the Search Term was entered in the Title line, the keyword will be searched across ALL Keyword codes in Title, Author, Notes, Subject, etc.
Previous Queries	The last 5 searches are kept in case they need to be re-performed. Use the -1 to -5 buttons to select a previous search

4. Click the **F5 Query** button to initiate the search
5. The results will be displayed in a Stockitem List:

Catalogue Training

Seq	Title	Author	Call No	Form	Stats	On Lo	Due Back	Rsv	Perm Loc	Process	On Ord	Series	Process Date	Edit
12	Harry Potter and the Chamber	Rowling, J.K.		BK	J	Y	08/11/2011	1	CHELSEA		N	978-0-439-06486-6	19/02/2011	
13	Harry Potter and the Chamber	Rowling, J.K.		BK	J	N		1	CHELSEA		N	978-0-439-06486-6	19/02/2011	
14	Harry Potter and the Chamber	Rowling, J.K.	F ROW	BK	J	N		1	CHELSEA		N	978-0-439-06486-6	19/02/2011	
15	Harry Potter and the Chamber	Rowling, J.K.		BK	AF	N		0	CHELSEA		N	978-0-439-06486-6	19/02/2011	
16	Harry Potter and the Chamber	Rowling, J.K.		BK	AF	N		2	CHELSEA		N	978-0-439-06486-6	19/02/2011	
17	Harry Potter and the chamber	Rowling, J.K.	F ROW	BK	J	N		1	CHELSEA		N	978-0-7475-3418-8	19/02/2011	
18	Harry Potter and the chamber	Rowling, J.K.	F ROW	BK	J	N		0	BELMONT		N	978-0-7475-3418-8	19/02/2011	
19	Harry Potter and the chamber	Rowling, J.K.	F ROW	BK	J	N		0	HASTINGS	AWAITING P	N	978-0-7475-3418-8	18 Aug 2010	19/02/2011

- Highlight the Stockitems for which you'd like to see the Catalogue records and select **XReferences > Catalogue** from the main menu:

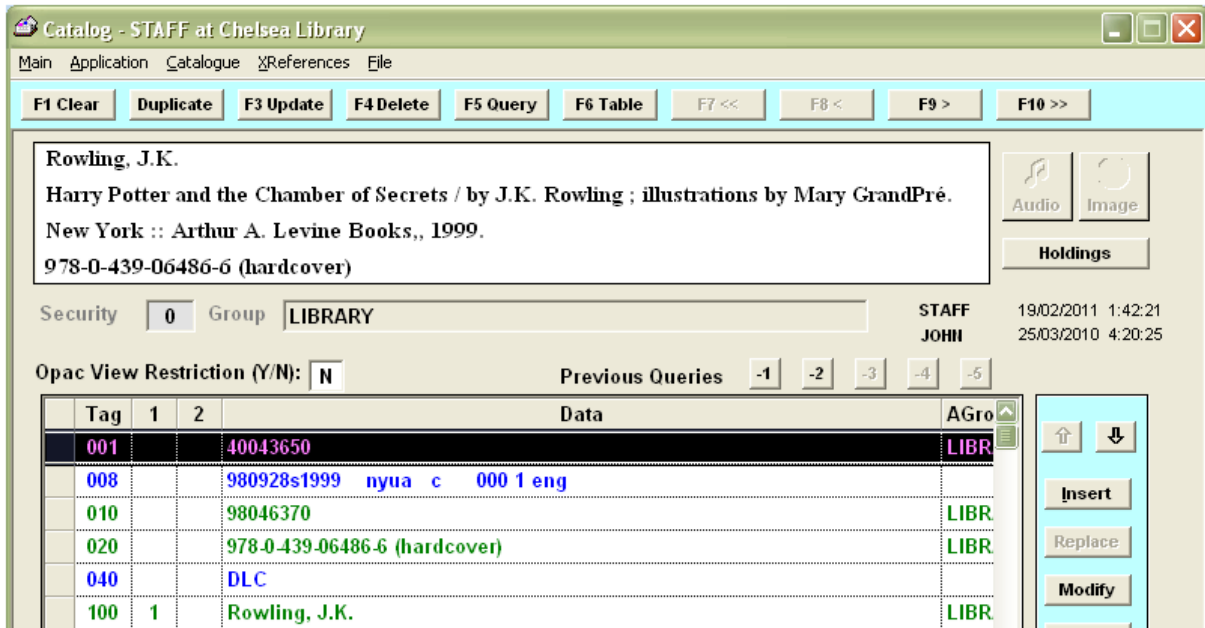

Seq	Title	Author	Call No	Form	Stats	On Lo	Due Back	Rsv	Perm Loc	Process	On Ord	Series	Process Date	Edit
12	Harry Potter and the Chamber	Rowling, J.K.		BK	J	Y	08/11/2011	1	CHELSEA		N	978-0-439-06486-6	19/02/2011	
13	Harry Potter and the Chamber	Rowling, J.K.		BK	J	N		1	CHELSEA		N	978-0-439-06486-6	19/02/2011	
14	Harry Potter and the Chamber	Rowling, J.K.	F ROW	BK	J	N		1	CHELSEA		N	978-0-439-06486-6	19/02/2011	
15	Harry Potter and the Chamber	Rowling, J.K.		BK	AF	N		0	CHELSEA		N	978-0-439-06486-6	19/02/2011	
16	Harry Potter and the Chamber	Rowling, J.K.		BK	AF	N		2	CHELSEA		N	978-0-439-06486-6	19/02/2011	

- The matching catalogue records of the selected items will then display in a Catalogue List:

Seq	AUTHOR / Title / Publisher	Oper	LastUpdate
1	ROWLING, J.K. Harry Potter and the Chamber of Secrets / by J.K. Rowling ; illustrations by Mary GrandPré. New York : Arthur A. Levine Books., 1999. 978-0-439-06486-6 (hardcover)	STAFF	19/02/2011
2	ROWLING, J.K. Harry Potter and the Chamber of Secrets / by J.K. Rowling ; illustrations by Mary GrandPré. New York : Arthur A. Levine Books., 1999. 978-0-439-06486-6 (hardcover)	STAFF	19/02/2011

- To view a particular Catalogue record, double-click the line (or highlight the line and select the **<Enter>** button)
- The selected Catalogue record will then be displayed in the main Catalog screen:

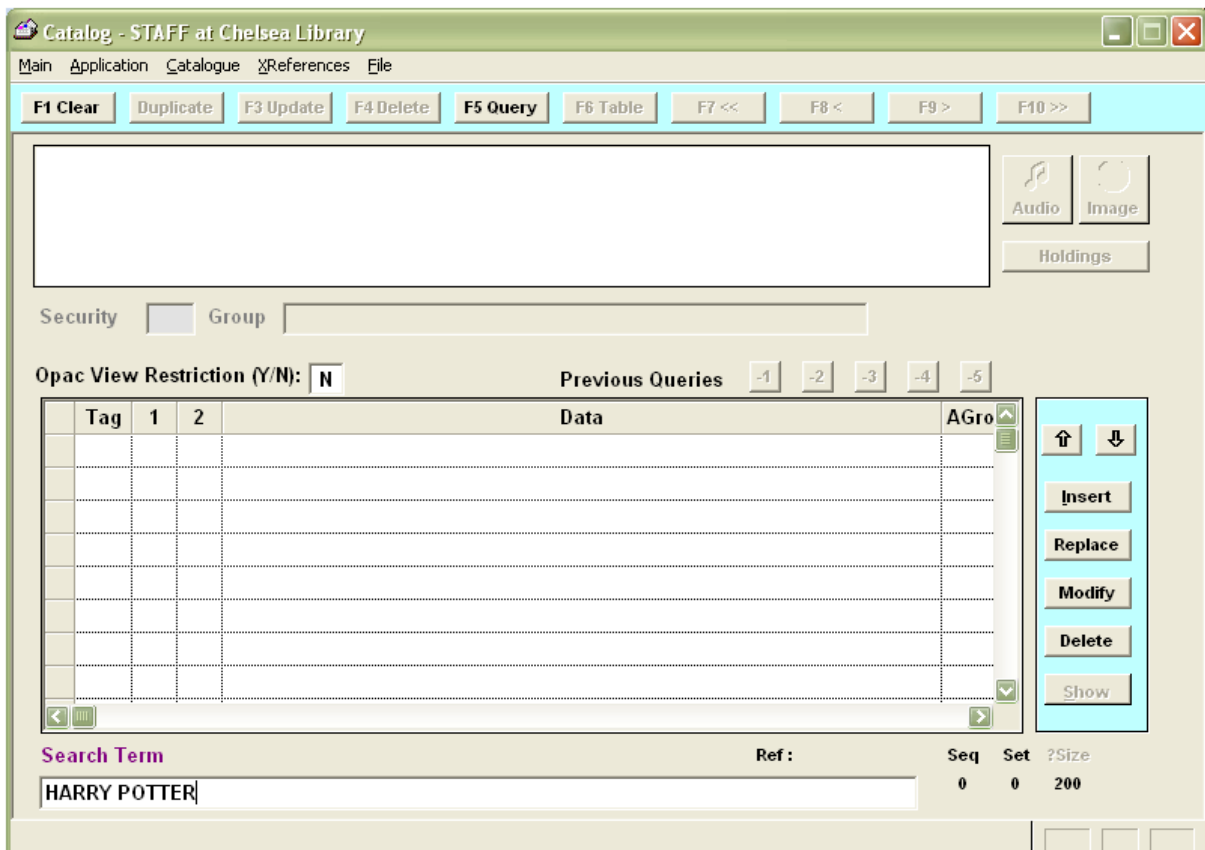

Catalogue Training

10. Use the scroll bar to scroll through the listing

Catalogue

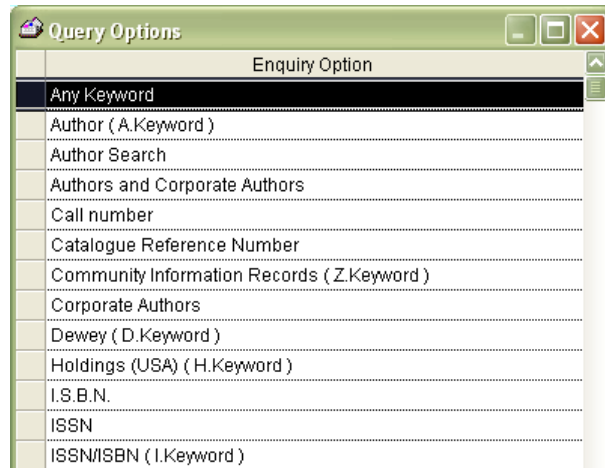

1. Launch the *Amlib* client
2. Go to **Main > Catalogue > Catalogue** (or the  icon) – the Catalog screen will display:

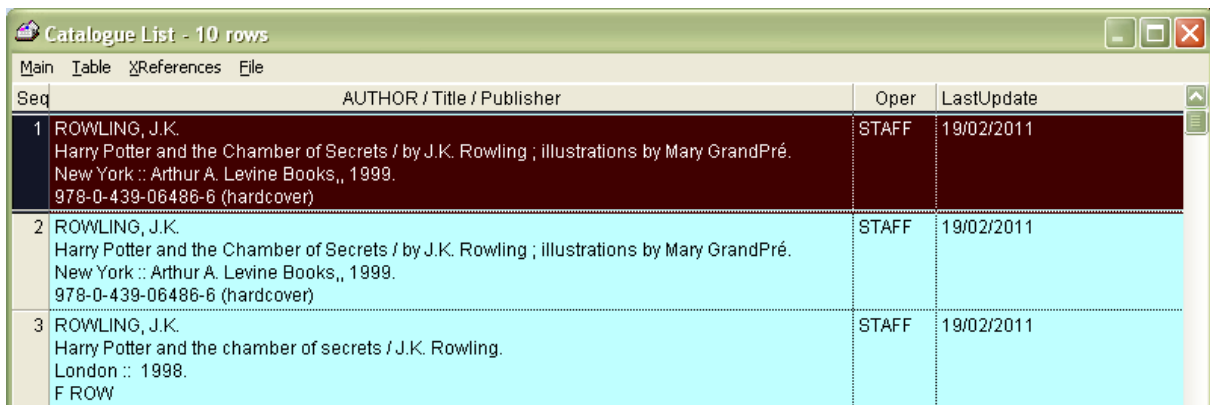

3. Type all or some of the Catalogue entry – for example: part of a Title

Catalogue Training

4. Click the **F5 Query** button
5. If a Query option has not previously been chosen, the Query Options listing will display:

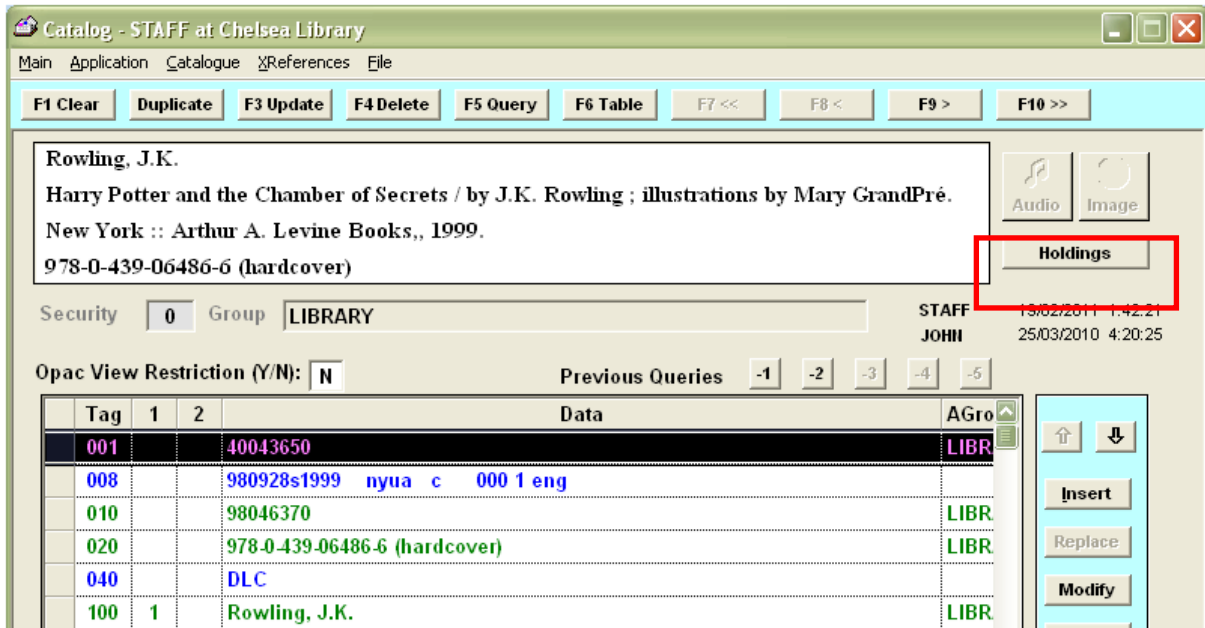

6. Double-click on the desired Query option (or highlight the line and select the **<Enter>** button)
7. When more than one record is found, the search results are shown in a Catalogue List:

Seq	AUTHOR / Title / Publisher	Oper	LastUpdate
1	ROWLING, J.K. Harry Potter and the Chamber of Secrets / by J.K. Rowling ; illustrations by Mary GrandPré. New York : Arthur A. Levine Books,, 1999. 978-0-439-06486-6 (hardcover)	STAFF	19/02/2011
2	ROWLING, J.K. Harry Potter and the Chamber of Secrets / by J.K. Rowling ; illustrations by Mary GrandPré. New York : Arthur A. Levine Books,, 1999. 978-0-439-06486-6 (hardcover)	STAFF	19/02/2011
3	ROWLING, J.K. Harry Potter and the chamber of secrets / J.K. Rowling. London : 1998. F ROW	STAFF	19/02/2011

8. To view a particular Catalogue record, double-click the line (or highlight the line and select the **<Enter>** button) – the selected Catalogue record will then be displayed in the main Catalog screen:

Catalogue Training

9. Use the scroll bar to scroll through the listing

Please Note: A **Holdings** button has been included on the Catalog screen for quicker access to the Stockitem records attached to that catalogue record.

Search Options

- Catalogue records can be searched via Browse (alphabetical) or Keywords
- When not using the equal sign, anything like the term will be returned (the system automatically adds a wildcard % to the end of a search term)
- When not using the equal sign anything like the term will be returned. You may add a wildcard '%' anywhere in the term. The system automatically adds one to the end of the term

OPERATOR	EXPLANATION
ABCD	will return anything starting with ABCD
=ABC	requires exact match: will only return ABC
AB%D	will return anything starting with AB and containing a D
ABC\ABD	will return anything starting with ABC or with ABD. The slash means OR and may be repeated
=ABC\ABD	will return ABC plus anything starting with ABD

Keyword Searches

TERM	OPERATOR	EXPLANATION
OR	\ backward slash	ABC \ ABD results in ABC or ABD
AND	space	ABC ABD results in ABC and ABD

Catalogue Training

NOT	- minus	ABC - ABD = ABC not ABD
-----	---------	-------------------------

Keyword terms may be prefixed with a Library defined restrictor. For example, **t**.ABC \ **s**.ABD = title having ABC or subject having ABD (**t**. being the restrictor for Title and Series, **s**. being the restrictor for Subject).

Please Note: It is often inappropriate to use an **AND** connector with different restrictors – for example: an Authority cannot be both a Subject and a Title

These prefixes are defined in **Main > Authorities > Authorities** – select **Application > KeywordDesc** and may be different according to your defaults at installation. Prefixes may be typed in UPPER or lower case.

Once you have found a set of Catalogue records, they may be saved to a file.

Cat Keyword Search

The *Catalogue* module contains an advanced Keyword search functionality.

1. Launch the *Amlib* client
2. Go to **Main > Catalogue > CatKeyword** – the Keyword Enquiry screen will display:

Keyword Enquiry - STAFF at Chelsea Library

Main Application

F1 Clear F3 Count F5 Query

1 Type the Keywords and TAB
DOCTOR

2 Select Keyword(s) To 'Or' together

3 Paste and join clauses (NB. at this stage subject to Catalogue Security Level and Group Privileges checking)
(Paste Delete) AND OR NOT

Type	Word	Count
P	DOCTOR	1
S	DOCTOR	2
T	DOCTOR	25
T	DOCTORS	3

Where	Cat. Count	
Where keyword is in S.'DOCTOR' T.'DOCTOR'	24	

Y = Must Have, N = Must Not Have, Space = Don't Care

4 AND: Stockitems And Periodicals And Orders

3. Type the search term into the Keywords field and click the **<Tab>** key
4. A series of matches will then appear in the adjacent table:

Catalogue Training

- Type: Subject (**S**), Title (**T**), Notes (**N**), etc
 - Word
 - Count
5. Select the terms from the Word box you would like the catalogue records for (multiple items can be selected from the Word box by holding down the **Ctrl** key and clicking with the mouse)
 6. Click the **Paste** button
 7. The Where term will be pasted into the table at the bottom of the screen
 8. Click the **F5 Query** button to bring up the Catalogue List of results

Cross Query

Once a catalogue record is displayed in the main window it is possible to use it cross-reference to other records using the same tags – for example: a particular **Subject (650)** tag

1. Highlight a tag – for example: **Witches and warlocks – Fiction.**

Z39.50 SEARCHING

Schools can use the Z39.50 facility link to *SCIS*. You will need to contact *SCIS* directly to get your IP address authorised and they will supply the *SCIS* z39.50 details so that you can set them up as a Z39.50 Server.

1. See [Appendix 4: Z39.50 Searching – Settings and Parameters](#) for more information on how to set up New Servers and New Groups

Amlib Z39.50 Client

1. Launch the *Amlib* client
2. Go to **Main > Catalogue > CatZSearch** – the Z39.50 Search screen will display:

The screenshot shows the 'Z39.50 Search - STAFF at Chelsea Library' application window. It features a menu bar with 'Main' and 'Application'. Below the menu bar are four buttons: 'F1 Clear', 'F4 Import', 'F5 Query', and 'F6 Fetch'. The main area contains two large empty rectangular boxes. The top box has a header with columns: 'Server', 'Status', 'State', 'Fetched', 'Found', and an empty column. The bottom box has a header with columns: 'Title', 'Author', 'Publ', 'Phys', 'Server', and an empty column. On the right side, there is a text field containing 'Group: (none)'.

3. Click the **F5 Query** button – Query screen will display:

Catalogue Training

Query

Available Servers

Servers: Public Libraries

Search Attributes

Author

AND Title

AND ISBN 0099276941

AND Subject

OK Cancel

Note: An ISBN search in rows 1, 2 or 3 will search for both 10 and 13 digit versions BUT only if the following row is blank .
An ISBN search in row 4 will only search for what has been entered

4. Select the Server or Server Group from the Available Servers drop-down box – for example: **Public Libraries**
5. Type in the Search Attributes – for example: **ISBN, Title, Author, Subject** or combination of these
6. Click the **OK** button – the results will display in the main Z39.50 Search screen:

7. The columns can be sorted by clicking any of the column headings
8. Save selected records to a MARC file for import:

Catalogue Training

- a. Highlight the records (hold the **Ctrl** key and click on records to highlight more than one record)
- b. Click the **F4 Import** button
- c. The highlighted records will be saved to a MARC File shown in the dialogue box, to be imported into *Amlib* via MARC Takeup

- d. The MARC Takeup process will begin automatically – ensure the folder is the correct folder – for example: **My Documents**

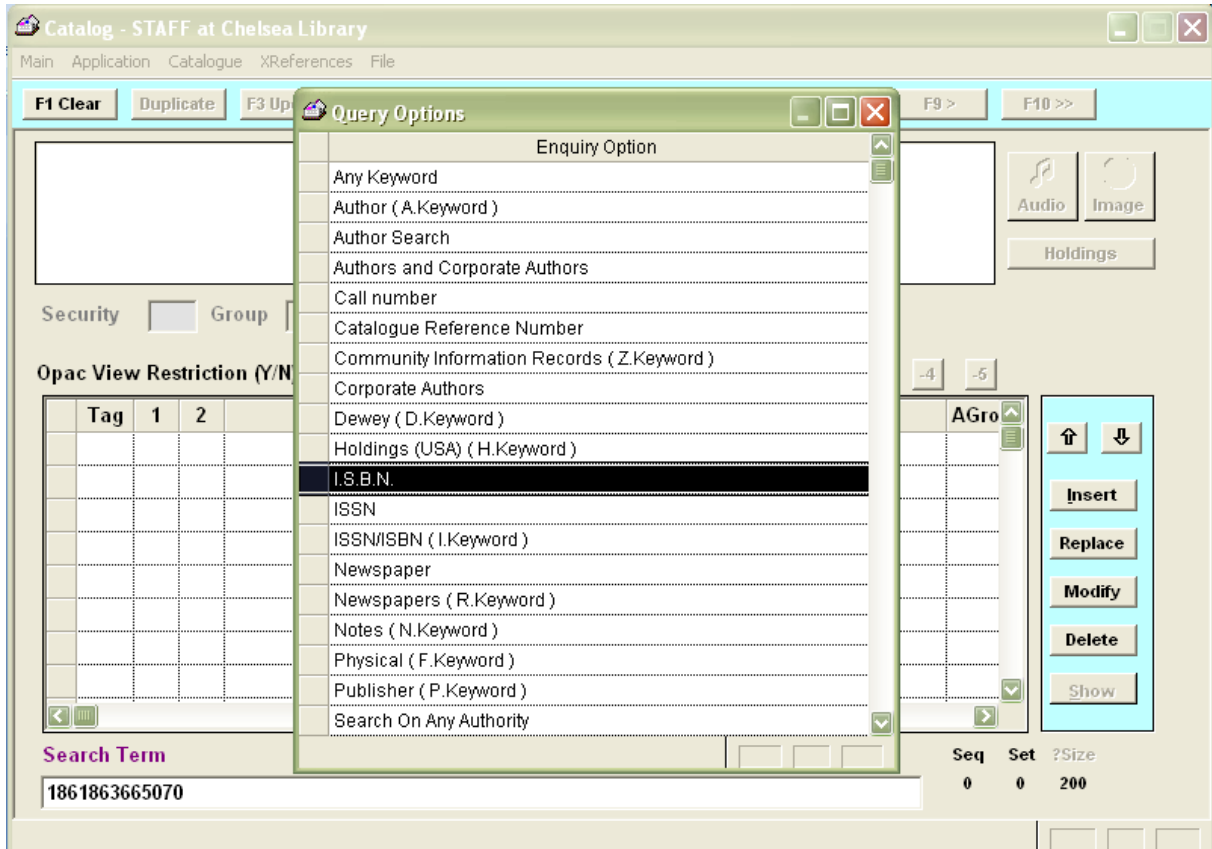

Please Note: Please refer to [Import MARC Catalogue Data: Bibliographic Data](#) for details of the remainder of this process.

Catalogue Training

SECTION 2: CATALOGUE CREATION

Check Catalogue for Existing Records

It is a good idea to search the Catalogue module to see if the item has been entered already, and just needs a Stockitem record attached. Searching for an existing record can be done in the Catalog screen (using the **ISBN**) or in the Stockitem screen (for example: using an Author or Title search). The **ISBN** can even be wanded if the Barcode reader has been ISBN enabled.

It is preferable to create a catalogue first and then create the holding record (Stockitem). If the Stockitem is processed first, not all the Tags are made when the Catalogue is created from the Item menu. For example: Subject headings are not transferred across.

Keywords are created through association with MARC tags – for example: a Subject keyword would apply to all tags defined from **600** through to **699** – ie: **Topical term (650)**, **Personal name (600)**, **Geographic (651)**, etc. Therefore when creating your entry, it is important to have a Catalogue record as well as a Stockitem because keyword searching will be important.

MANUAL ADDITION OF NEW RECORDS

There are three manual entry methods available:

1. Work Sheet Method

- After choosing a template related to the form of the data (for example: fiction/non-fiction etc.) the required fields can be filled in: Authority listings can be accessed

Catalogue Training

when appropriate (for example: for standard entry of Authors, Subjects, Publishers, etc)

2. Editing existing records

- It is possible to duplicate an existing record and alter the relevant data

3. New record from scratch

- No Lead Thru method: Tags can be inserted and built up to create a full record

Please Note: Before beginning to use the Worksheet manual entry, you need to check the tags that will be automatically displayed. This is done in **Main > Catalogue > CatLeadThruSets**.

Lead Thru Sets

It is possible to set up the Lead Thru generation sets and check/modify the tags that will be presented for Data Entry when creating a Catalogue record using the Lead Thru methodology.

1. Launch the *Amlib* client
2. Go to **Main > Catalogue > CatLeadThruSets** – the Lead Thru Sets table will display:

The screenshot shows a software window titled "Lead Thru Sets - STAFF at Chelsea Library". The window has a menu bar with "Main" and "Application". Below the menu bar are three buttons: "F3 Update", "F5 Query", and "F6 Group". The main area contains a table with the following data:

Fiction	020 082 100 245 260 440 655 700
Non-fiction	020 082 100 245 260 300 440 650 650
Audio-visual	020 082 100 245 260 300 440 700
Videos	001 020 082 100 245 260 300 650
Paperbacks	082 100 245
On Order	020 082 100 245
Magazines	084 100 245 260 300 310 362 650 650 650 700 700 700 856
Equipment	082 245 710 300 500 650

Below this table is a scrollable list of tags with their descriptions:

Tag	Description
001	Control number
008	Fixed Length Data Elements
010	LC Control Number
020	ISBN
022	ISSN
035	Local system control number
040	Cataloguing source
041	Language code

3. To **add** a Lead Thru set:

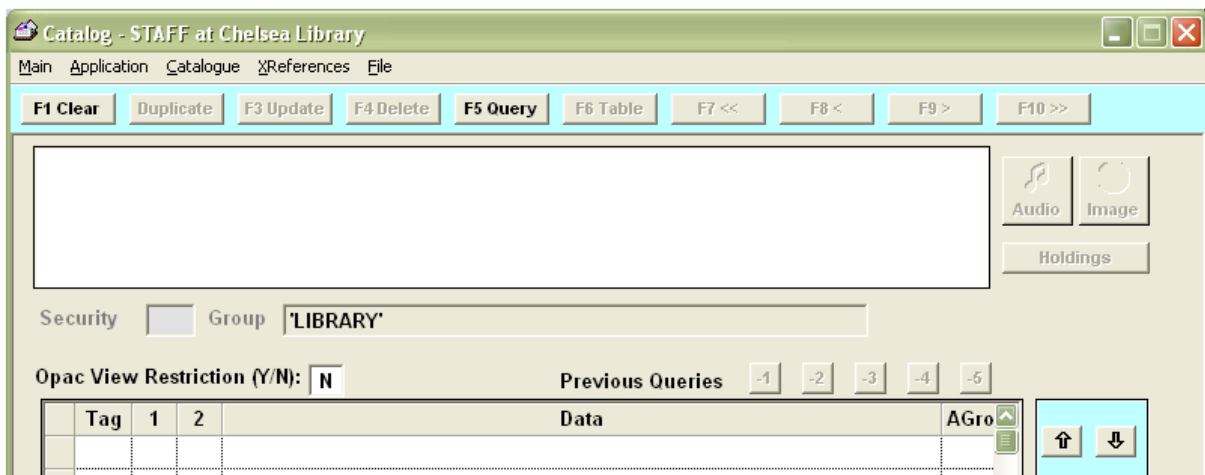

- a. Type a Description into an empty field in the first column
- b. In the second column, type the Tag numbers in the sequence you would like them to appear – tags must be separated by a space (the tags that are available can be checked from the lower box) – for example: **020 082 100 245 260 440 650 700**

Catalogue Training

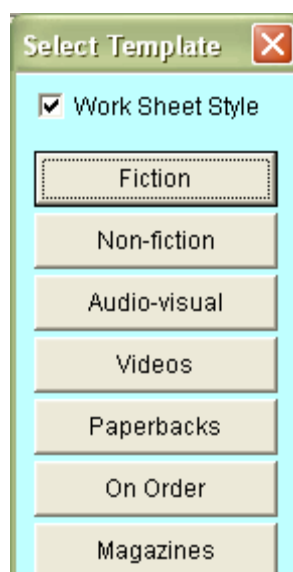

- c. It is possible to use multiples of certain tags – for example: **650**
4. To **modify** the tags in an existing Lead Thru set:
 - a. Adjust the tags displayed in the second column – tags must be separated by a space (the tags that are available can be checked from the lower box) – for example: **020 082 100 245 260 440 650 700**
 - b. It is possible to use multiples of certain tags – for example: **650**)
5. Click the **F3 Update** button when complete

Work Sheet Method

1. Launch the *Amlib* client
2. Go to **Main > Catalogue > Catalogue** (or the  icon) – the Catalog screen will display:

3. From the menu, select **Catalogue > Catalog Create** – the Select Template prompt will display:

4. Click on the button for an appropriate Lead Thru set – for example: **Fiction**
5. The Work Sheet will display with a number of preset MARC tags already populated:

Catalogue Training

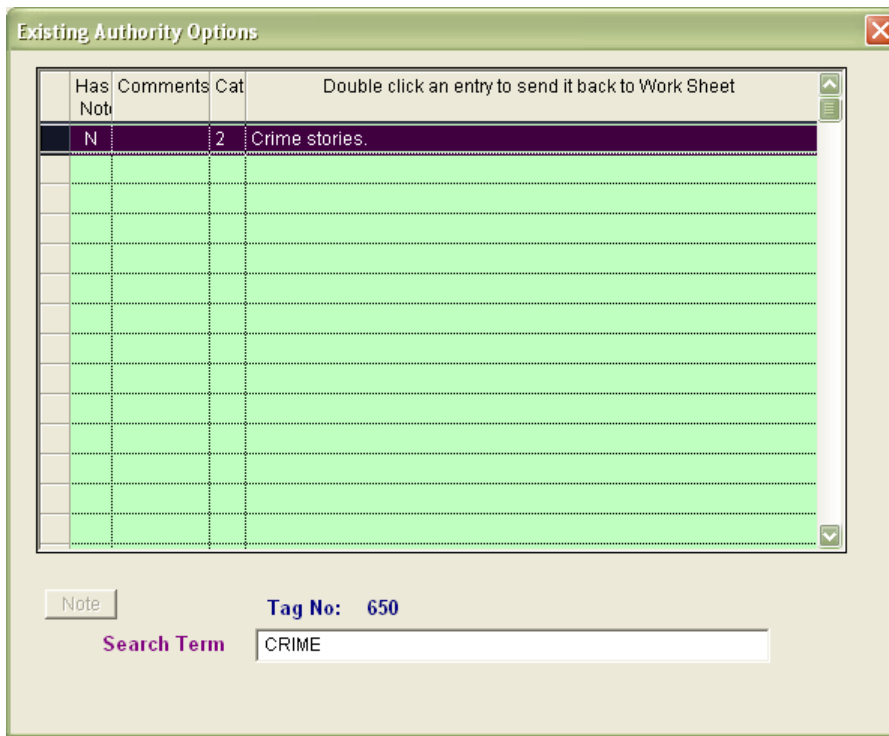

Tag No	1	2	1 - a ISBN	2 - b Terms of availability	3 - c Cancelled/invalid ISBN
020					
082					
100	0				

6. An item's bibliographic details can now be entered – as you move through the Work Sheet, the headings (descriptors) change, so it is possible to observe the type of data required in the subfield of the tag (see also [Appendix 5: MARC Tag Subfields & Punctuation](#) for more information)

Tag No	1	2	1 - a Topical term	2 - x General subdivision	3 - y Chronological subdivision	4 - z Geogra subdivision
			0099276941			
✓ 002			F HOL			
✓ 100	0		Hollinghurst, Alan.			
✓ 245	0		Spell, The			
✓ 260			London :	Chatto and Windus Ltd ,	1998	
440	0					
→ 650			Crime			
700	0					

7. Where the data is Authority based (for example: *Author*, *Subject* heading, *Series*, etc.) a listing of Authorities can be viewed and selected – for example: to search for a particular Author, type the first few letters of the surname, highlight the row and click the **F1 Check** button
8. The Existing Authority Options screen will open displaying all matching Authorities and the number of Catalogue records which use each Authority:

Catalogue Training

9. To select an Authority in the table, simply double-click on it: the contents of the Tag being checked will then change to match the selected Authority (the text will also change colour from black to **green**)

440	0								
→ 650		7	Crime						
700	0								

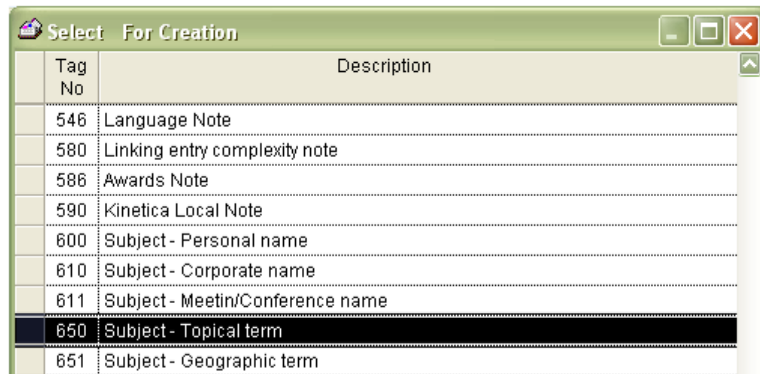

440	0								
→ 650		7	Crime stories.						
700	0								

10. Once selected (or if there is no matching Authority), click on the red [X] to close the selection table (if there were no Authorities found the contents of the tag being checked will turn **red**, if there were Authorities found but none were selected the contents will turn **pink**)

Catalogue Training

11. To enter additional tags, click the **F2 Insert** button – the Select For Creation screen will display (the preset Tags allow for up to 40 entries):

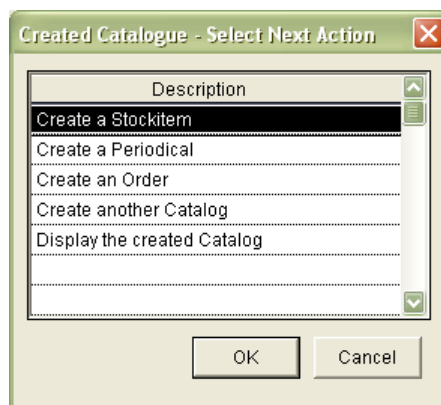

Tag No	Description
546	Language Note
580	Linking entry complexity note
586	Awards Note
590	Kinetica Local Note
600	Subject - Personal name
610	Subject - Corporate name
611	Subject - Meetin/Conference name
650	Subject - Topical term
651	Subject - Geographic term

12. Find the required Tag and double-click it to select it – a new entry with the selected Tag No will appear in the Work Sheet screen
13. Click the **F3 Save** button when the record is complete
14. If new Authorities are to be created, a prompt with the following message will display:
Some new Authorities will be created. Continue with Save? (the new Authorities will be highlighted in **red**, so you can check them)

15. Click the **Yes** button – the Created Catalogue – Select Next Action prompt will display:

16. If you intend to create your holdings immediately, then highlight the **Create a Stockitem** and click the **OK** button (alternatively you can select the **Display the created Catalogue** if you wish to review the actual Catalogue record)

Adding Stockitems

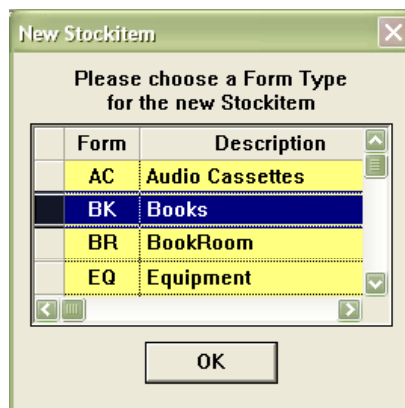

This section continues from the section above. If you don't immediately choose to create a stockitem record, you can select **XReferences > StockItems** from the Catalog screen menu (or click the **Holdings** button on the Catalog screen) to initiate the process.

Catalogue Training

1. A prompt with the following message will display: **No Stockitems exist for the Catalogue. Do you wish to create a new Item?**

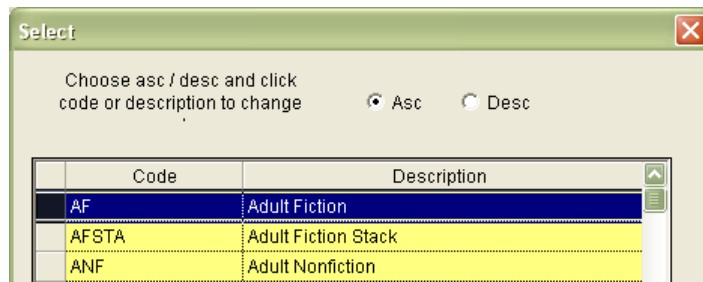

2. Click on the **Yes** button – a **New Stockitem** prompt will display with the following message: **Please choose a Form Type for the new Stockitem:**

3. Choose the appropriate **Form** type and click on the **OK** button – the main **Stockitem** screen will enter creation mode (the **F2 Insert** button will appear **bolded**) and a number of fields will be automatically pre-populated:

4. Complete the other fields as required – for example: St(at)s Code, Current Cost, Floor location, etc – to access a list of codes in a field enter **.<Tab>**
 - For example: in the **Stats Code** field, entering **.<Tab>** will display a list of your Stats Codes and Descriptions – double-click on a entry to select it:

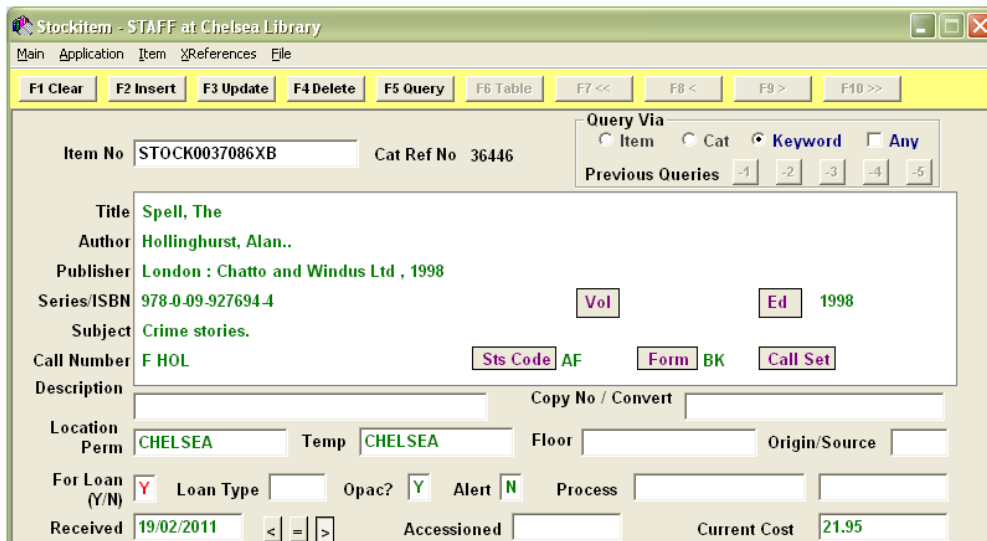

Catalogue Training

5. Scan in **barcode** in the Item No field (if you wish to create a system-generated barcode, leave this field blank)
6. Click on the **F2 Insert** button when complete – a prompt with the following message will display: **The Item has been Inserted.**

7. Click the **OK** button

Multiple Copies

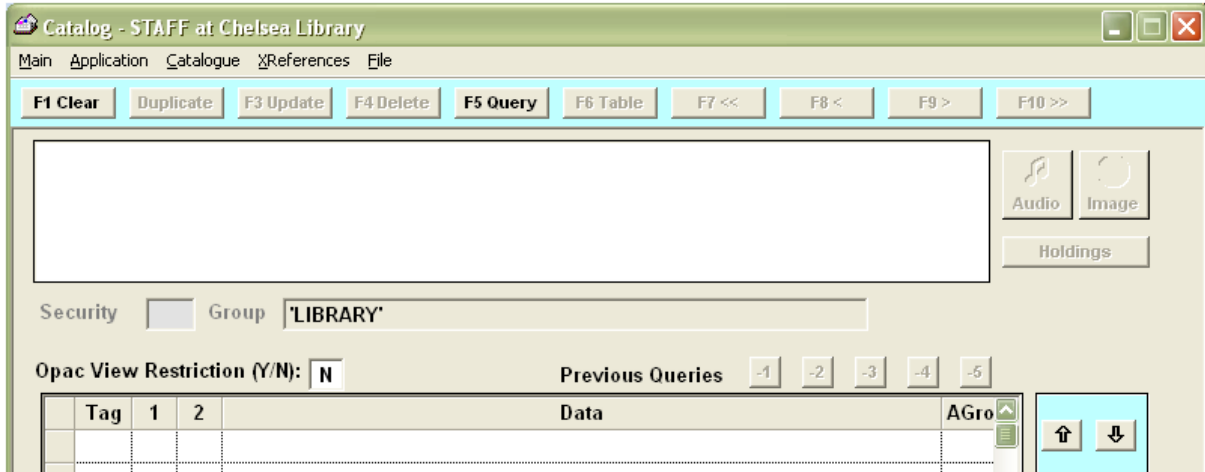

To enter multiple copies of the same catalogue item:

1. Scan in a new barcode into the Item No field – the **F2 Insert** button will once again become **bolded**
2. Change any other details as required – for example: Stats Code, Copy No and Floor location
3. Click the **F2 Insert** button when complete

Catalogue Training

Lead Thru Generation

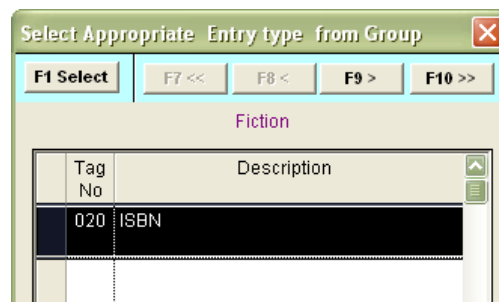

1. Launch the *Amlib* client
2. Go to **Main > Catalogue > Catalogue** (or the  icon) – the Catalog screen will display:

3. From the menu, select **Catalogue > Catalog Create** – the Select Template prompt will display:

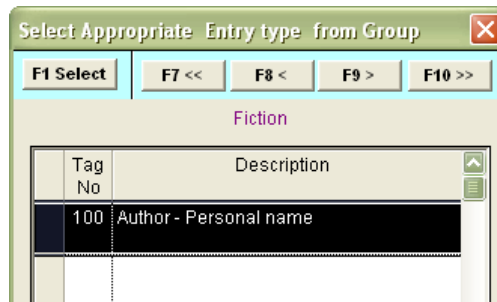

4. **Untick** the Work Sheet Style box and click on the button for an appropriate Lead Thru set – for example: **Fiction** – the Select Appropriate Entry type from Group screen will display:

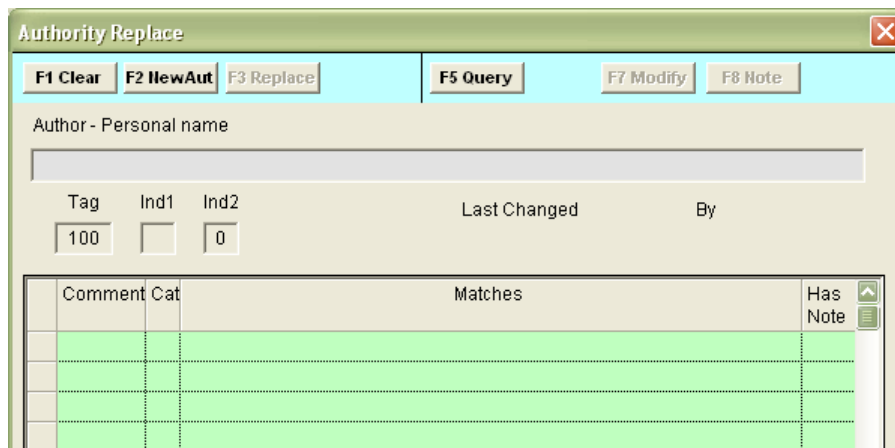

5. Once the format has been chosen, the user will be taken through preset tags to enter data (it is also possible to insert tags where appropriate)

Catalogue Training

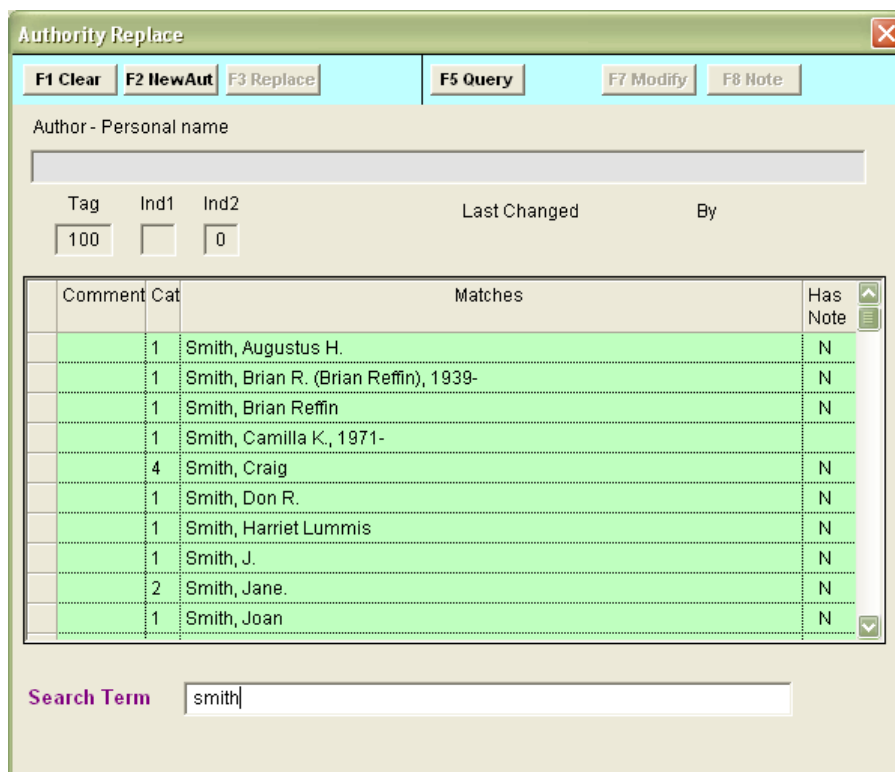

6. Double-click the chosen tag, or click the **F1 Select** button

7. If the tag is Authority based, an Authority Replace screen will display:

8. Type in the Search Term and click the **F5 Query** button to initiate the search:

Catalogue Training

9. If the correct term is in the list:
 - a. Highlight the term and click the **F3 Replace** button
 - b. The Authority Replace screen will close and the selected Authority will appear in the catalogue record
10. If the correct term is not in the list or the search gives no results:
 - a. Click on the **F2 NewAut** button – the SubFields screen will display:

Seq	SubF	Data
→ 10	a	
→ 30	x	
→ 40	y	
→ 50	z	

- b. Please ensure you enter the correct data into the correct subfield – clicking the **F6 Table** button gives the Valid SubFields/Parts table available for that Tag:

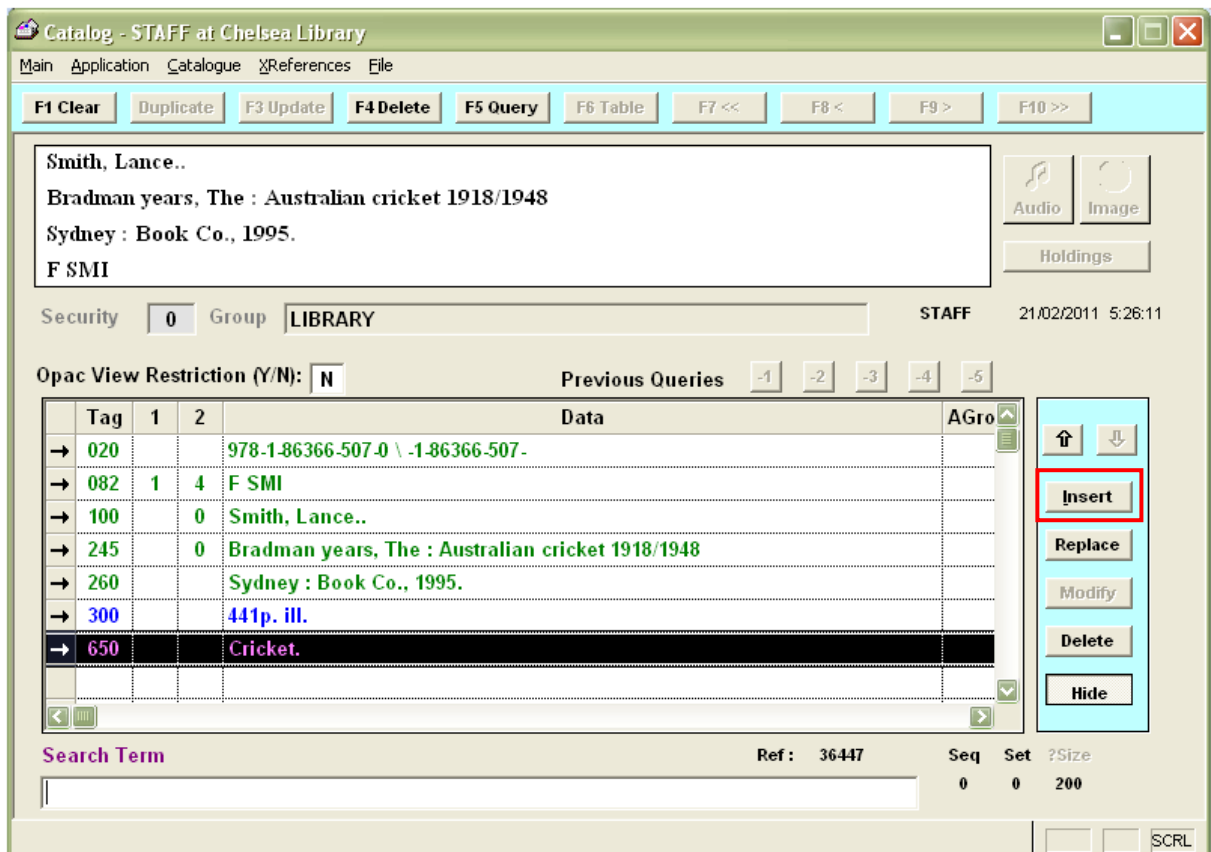

SubF	Description	Rpt
a	Personal name .	N
c	Titles and other words associated with	Y
q	Fuller form of name ()	N
d	Dates.	N
h	Ukmarc inverted element of name	N
6	880 Unicode Xref	N

- c. Once the data has been correctly entered click the **F3 Update** button
 - d. Click on the red [X] in top-right corner to close the SubFields screen

Once the Authority has been entered, it is available for use in subsequent catalogue records.

11. You will then be guided through the other preset tags, allowing you to enter data as appropriate
12. Once complete, close out of the Lead Thru set screen by clicking on the red [X] – you will be returned to the main Catalog screen

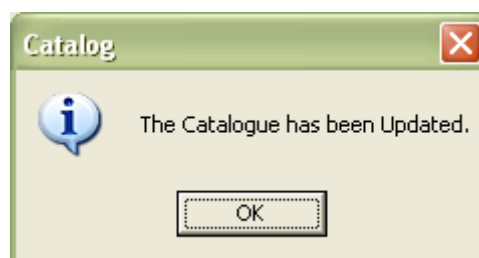

Catalogue Training

13. To enter extra Tags: click the **Insert** button on the right-hand side of the screen – the Select for Creation screen will display:

14. Select the Tag to create (for example: **650**) by double-clicking it (an Authority search can then be undertaken in the Authority Replace screen)
15. Click the **F3 Update** button when complete – a prompt with the following message will display: **The Catalogue has been Updated.**

16. Click the **OK** button

Catalogue Training

IMPORT MARC CATALOGUE DATA FROM SCIS (OR OTHER AGENCY)

Before using Marc TakeUp....

- Check Parameters – see Section 4
- Set the Cat(alogue) Definitions for other Forms and Stats codes, the correct Stats and Form codes are given to items as they are created. The Default codes **do not** need Cat Definitions as they will automatically be inserted unless an alternative rule applies.

Form Codes: Cat Definitions

Form code Cat Definitions are found in the Window menu of the Stockitem Form Codes screen.

1. Launch the *Amlib* client
2. Go to **Main > StockItems > StockitemForms** – the Form Codes screen will display:

Form	Description	Allow Loan	Floating ?	Cat Def Defined
AC	Audio Cassettes	Y	N	N
BK	Books	Y	N	N
BR	BookRoom	Y	N	N

3. Highlight a Form code in the table – for example: **AC – Audio Cassettes**
4. From the menu, select **Window > Cat Defs** – the Form Codes for Catalogues screen will display:

Form Code: AC

** NOTE: You can use these paramains for another form code by entering the new form code here.

Tag

247
250
280
300
310
362
440
490

Must Contain SOUND CASSETTE

Must Not

Paste Delete

Description

Tag 300 contains 'SOUND CASSETTE'

5. To set a Cat definition:

Catalogue Training

- a. Select a Tag number – for example: **300**
 - b. Enter the data that **MUST** be present for valid items to be given this Form Code in the Must Contain field– for example: **Sound Cassette**
 - c. Enter the data that **MUST NOT** be present for valid items to be given this Form Code in the Must Not field – for example: **CD**
 - d. Click the **Paste** button
6. Click the **F3 Save** button when complete

Stats Codes: Cat Definitions

1. Launch the *Amlib* client
2. Go to **Main > StockItems > StockitemStatsCodes** – the Stats Codes screen will display:

Stats Code	Allow Loan	Floating ?	Stats / Collection Description	Price Group Code	Cat Def Defined
EQ	Y	N	Equipment	NB	N
ILL	Y	N	Inter Library Loan	FIC	N
J	Y	N	Junior Fiction	JUN	N
JCAS	Y	N	Junior Cassette	NB	N

3. Highlight a Stats Code in the table – for example: **J – Junior Fiction**
4. Click the **F8 Cat Def** button – the Stats Codes for Catalogues screen will display:

Stats Code: J

** NOTE: You can use these parameters for another form code by entering the new form code here.

Catalogue Training

5. To set a Cat definition:
 - a. Select a Tag number – for example: **82**
 - b. Numbers:
 - i. Select either the **Must Contain** or **Must Not Contain** radio button (the **Ignore** button is only used when creating non-numerical definitions)
 - ii. Enter Must Start With and/or Must Not Start With data (optional)
 - iii. Click the **Paste** button
 - c. Tag:
 - i. Ensure Numbers is set to **Ignore**
 - ii. Select either the **Starts With**, **Contains anywhere before first space** or **Contains anywhere in tag** radio button
 - iii. Enter Must Start With and/or Must Not Start With data
 - iv. Click the **Paste** button
6. Click the **F3 Save** button when complete

A setup for Schools might be:

CODE	EXAMPLE
NF	DEFAULT as set up in Main > Supervisor > Installation – <u>Stockitem</u> tab or set in MARC Take up
F	Tag 82 must not contain numbers

A setup for Public Libraries might be:

CODE	EXAMPLE
ANF	DEFAULT as set up in Main > Supervisor > Installation – <u>Stockitem</u> tab or set in MARC Take up
AF	Tag 99 must not contain numbers. Must contain F but not contain J before the first space.
JK	Tag 99 Must contain JK before the first space
JNF	Tag 99 must contain numbers Must contain J but not contain JK before the first space.
JF	Tag 99 must not contain numbers Must contain J but not contain JK before the first space.

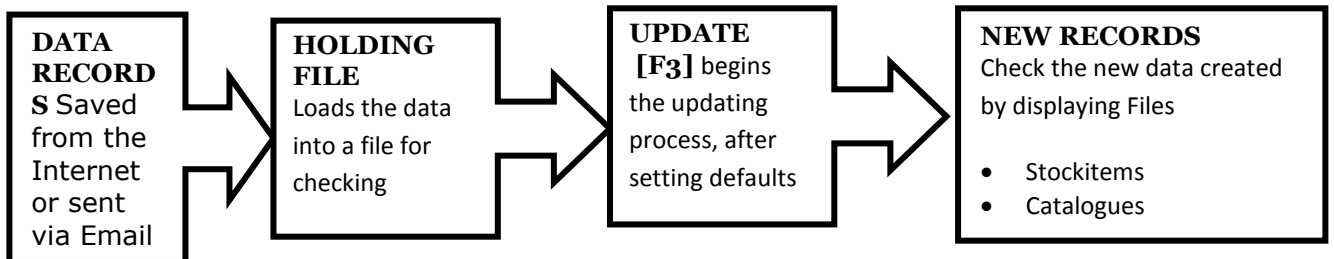

Catalogue Training

Most sites use *SCIS* (Schools) or Exchanges from *SL of WA* or *Libraries Australia* (Public Libraries) for their catalogue data.

Import MARC Catalogue Data

(From *SCIS*, *SL of WA*, *Libraries Australia*, etc.)

There are generally four main stages in the download process:

Please Note: The MARC Load process only uses the Tags and Subfields defined within the system. Other data loaded from external bodies may have a number of tags that you may or may not wish to capture. You may want to review your tag parameters prior to updating from an external source.

Accessing the Data for the Download

1. Launch the *Amlib* client
2. Go to **Main > Authorities > MarcTakeUp** (alternatively use **Ctrl + M**) – the Marc Import screen will display:

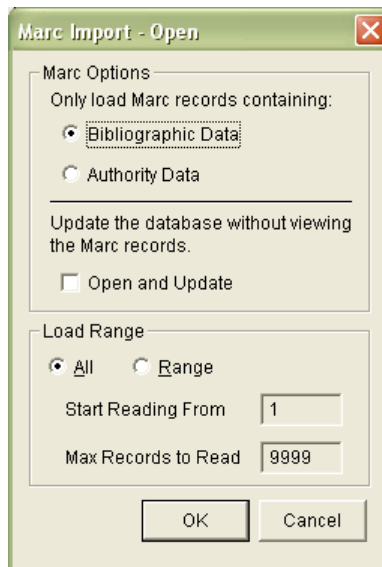

3. Select the **F1 Open** button to display the Open dialogue box
4. Locate the file to be processed by using the Look in: drop-down box – for example: if the file is on the C: drive, the Look in: box may say **Local Disk (C:)**
5. Once the file name has been located, use your mouse to select it and click on the **Open** button

There are two processing options: Bibliographic Data or Authority Data

Bibliographic Data

Catalogue Training

This option is to load records which are Bibliographic Data in machine readable format which can be imported into *Catalogue*, *Authorities* and *Stockitem* (where appropriate) applications of *Amlib*.

Please Note: If the Import file (*Bibliographic* or *Authority*) contains more than 9999 records, it is recommended that Open and Update is selected (ticked) so that all records can be loaded into the database. This eliminates the need to load in sections. The maximum records that can be viewed in the Holding file is 9999 records.

HEADING	FIELD	EXPLANATION/OPTIONS	EXAMPLE
Marc Options	Bibliographic Data	Bibliographic data to be created for the Catalogue.	Data from external source (for example: <i>SCIS</i> , <i>SL of WA</i> , <i>Kinetica</i> , etc. with USMARC Tags)
	Authority Data	Authority data for creation or updating of Authority Headings and/or cross references.	See and See Also Update from <i>SCIS</i> or other source
Update the database without viewing the Marc records	Open and Update	If checked (ticked), the imported items will not display in the Holding file.	The <i>Catalogue</i> will be Updated immediately
		If unchecked (unticked), the imported items will display in the Holding file.	Review records The <i>Catalogue</i> record will not be updated until the F3 Update button is selected
Load Range	All	All records from the file are downloaded into a holding file.	All
	Range	Selected records from the file are downloaded into a holding file. If Range is selected, the next 2 fields have to be updated.	For example: 1 to 50

6. Complete the options using the above table:

- a. Marc Options = **Bibliographic Data**

Catalogue Training

- b. Open and Update = **ticked**, unless you want to review each individual MARC record
- c. Load Range = **All** (unless the file sizes are quite large)

7. Click on the **OK** button

Bibliographic Options

1. The Bibliographic Options will then display:

HEADING	FIELD	EXPLANATION/OPTIONS	EXAMPLE
Marc Details	We think the file contains	The data type is displayed Standard format	SCIS ABN
	Total Bibliographic records	The number of Bibliographic records will display	32
	Total Authority records (this will only display if the import is for Authority headings)	The number of Authority headings with See/See Also references will display	0

2. Select the appropriate Each bibliographic record contains setting:

Each Bibliographic record contains:	Catalogue data only	The system will determine the contents of the import file. If only Catalogue data exists in the file, this will be the Default option.	SCIS Data
--	----------------------------	--	------------------

Catalogue Training

	Full Catalogue & Stockitem data	The system will determine the contents of the import file. If both Catalogue and Stockitem data exists in the file, this will be the Default option. Please Note: This item can be selected to create “Dummy” Stockitems even though only Catalogue data exists in the Import file.	SL OF WA Data
	Brief Catalogue and Order data	The system will determine the contents of the import file. If only brief Catalogue data and Order data exists in the file, this will be the default option.	AOL Data
When displaying the records show:	All tags in the file	All tags from the Import file will display in the Holding file for viewing. However, tags not defined in <i>Amlib</i> will not load into the Amlib Catalogue unless the Marc tag is defined.	If Tag: 650v is not used in <i>Amlib</i> it WILL still display in the Holding file.
	Only tags defined in Amlib	Only tags used in <i>Amlib</i> will display in the Holding file.	If Tag: 650v is not used in <i>Amlib</i> it will NOT display in the Holding file.

3. If the Marc Details are set to import **Full Catalogue & Stockitem data**, the Item Default and Item Prices sections will also display:

HEADING	FIELD	EXPLANATION/OPTIONS	EXAMPLE
Item Defaults Please specify default values for each item in the fields below	Form	The default values set in the Main > Supervisor > Installation > Stockitem tab will display if defined. If these fields are not yet defined, codes which will apply to the items can be entered. Rules for automatic entries of Form and Stats codes depending on the Tags that are imported, and be set in <u>Cat Defs</u> in the Stockitem Form and Stats codes.	If during the Import, Cat definitions cannot be created, each Stockitem will have a default <u>Form</u> of BK (for example)
	Location		CHELSEA
	Lib Group		LIBRARY
	Stats Code		ANF
	Floor Loc (optional)		DISPLAY
	Process (optional)		IN PROCESS
Item Prices	Minimum price of an item	If the item price in the Import file is less than the price set here, enter the Minimum price	The Import price is \$8.00 but the Minimum price set here is \$10.00 , the price in the Stockitem will be \$10.00

Catalogue Training

Appreciate items by %	Items can be appreciated by a percentage – for example: GST of 10%	10%
Depreciate old stockitems	Items to be depreciated will be dependent on the table set in Stockitem > Application > Stats Group	
Use average prices if no price	Items will be given an average price, set in Stockitem > Application > Stats Group . If no price is entered in the Import File	

Please Note: Form and Stats Code defaults from the **Main > Supervisor > Installation > Stockitem** tab display automatically in the fields. If there are no defaults entered, the field will be blank. Location displays as the Login Location. Entry of these fields is optional. As the import of data is processed, the Stockitems will be given the default values if there are no catalogue definitions for the Form or Stats codes of the items. Form and Stats Code Cat definitions are found in **Main > StockItems > StockitemForms** or **StockitemStatsCodes** table for the particular code.

Reviewing Records to be Imported (Optional)

It is possible for the importer to review (and edit) the MARC data being imported.

1. If the importer has decided to review the records being imported (see [Bibliographic Data](#) step above), the Marc Import screen will display:

The screenshot shows the 'Marc Import - STAFF at Chelsea Library' application window. The window title bar includes 'Main Application Window' and a menu bar with 'File: ohn Prentice\My Documents\X - Documentation\Testing\MARC Data\MARC FILES' and 'Record No: 1'. The main area contains a table with the following data:

Tag No	Ind 1	Ind 2	Sub Field	Subfield Data
000			a	00354nam a2200121 4500
020			a	0792452291
100			a	Lebain, Frederic.
245	4		a	The art of cooking /
245	4		b	Frederic Lebain, Jean-Paul Paireault
260			a	New York, N.Y. :
260			b	Mallard Press,
260			c	c1990.
300			a	271 p. :
300			b	col. ill. ;
300			c	30 cm.
650			a	Cookery.

Below the table, there are input fields for 'Item No' (STOCK????????), 'Accession Date' (21/01/2011), 'Cost' (0.00), 'Form' (BK), 'Stats Code' (ANF), and 'Location' (CHELSEA). A 'Permanent Location' field is also present at the bottom left.

2. If you do wish to edit the data (prior to import), use the editing buttons on the right to change or delete the individual tags

Please Note: Editing of the data prior to import is not essential. Changes can be made after the data has been imported into the Catalogue. Remember that not all the tags will necessarily be Imported, so if editing is considered necessary, change only the tags you know will be imported!

Catalogue Training

3. Use the **F7**, **F8**, **F9** and **F10** buttons to move between records
4. Once the data has been reviewed, click the **F3 Update** button

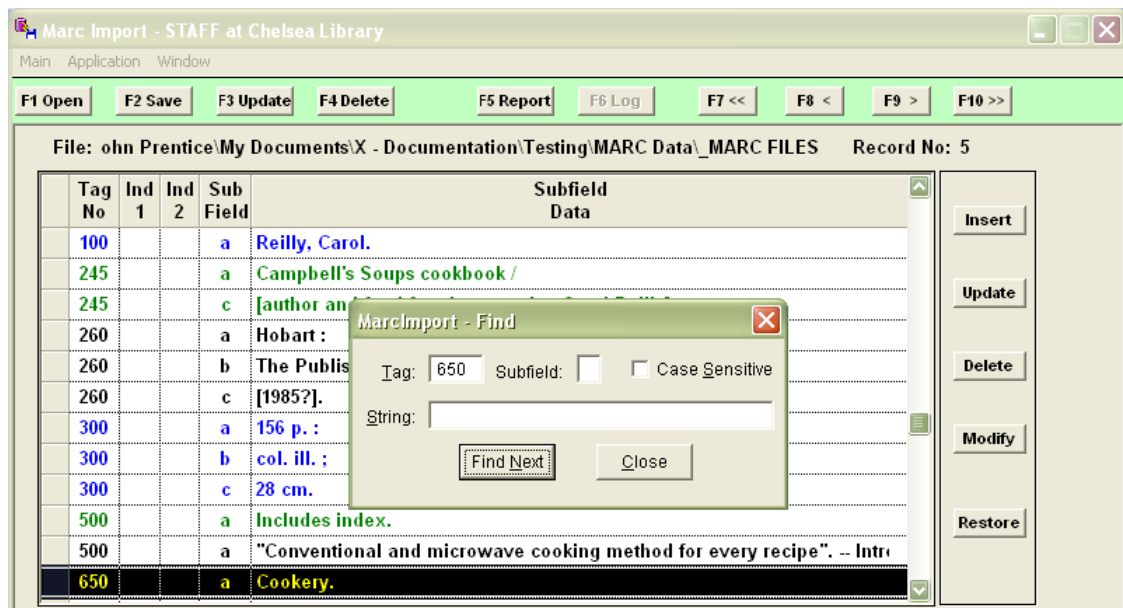

Find

It is possible to use the find function to locate any matching text, tag number or specific Subfield in the Holding File data being displayed. For example: use this facility to check all Author entries or Subject headings.

1. From the main menu, select **Window > Find** – the Marclmport – Find screen will display:

2. Type in the Tag, Subfield or String to find and select the **Find Next** button
3. It will then find any matching data in the record currently being displayed:

4. When the data has been checked, click the **F3 Update** button to include these items in the database

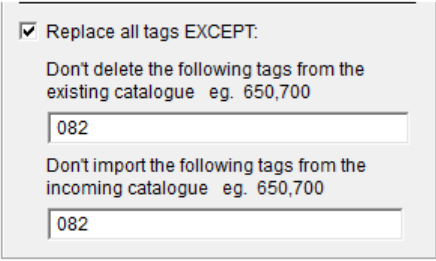

Catalogue Update Options

1. The Update Options screen will then display, allowing you to select the **Cat(alogue)** and **(Stock)Item Options**:
 - Cat Options: When an incoming Catalogue is match with an existing Catalogue
 - Item Options: When an existing Catalogue is replaced all existing items

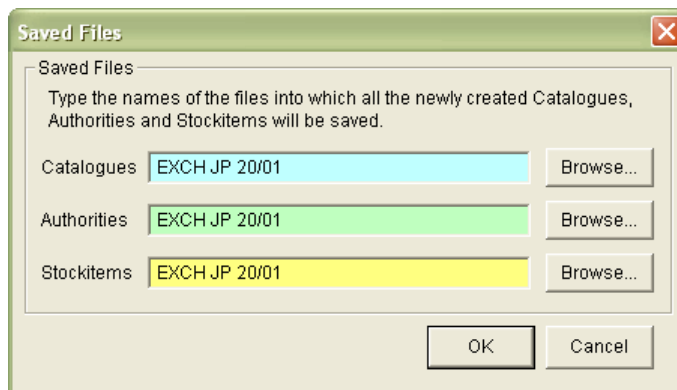

Catalogue Training

HEADING	FIELD		EXPLANATION
Cat Options When an incoming Catalogue is matched with an existing Catalogue:	Display an IGNORE/REPLACE message		A message will display at each match occurs. At each match, the operator will get a choice to create a new catalog, replace the existing or to keep the existing details.
	Keep the existing Record ie NO UPDATE		No Update occurs for the Catalogue
	Add Authorities but Replace Non-Authorities		Does not replace existing Authorities but adds new Authorities to the record. However, it replaces any Non Authority data from the Import
	Replace the existing Catalogue ENTIRELY		All tags from the Import are used, overwriting any existing data
	FIELD	OPTION	EXPLANATION
Replace all tags EXCEPT:	Don't delete the following tags from the existing catalogue eg. 650,700	<p>This will vary according to the setting in Main > Supervisor > Installation > Catalogue tab:</p> <ul style="list-style-type: none"> <u>MARCImport Replace: don't delete these tags from the existing cat</u> <u>MARCImport Replace: don't import these tags from the existing cat</u> <p>Adds non-identical tags when importing all but specified Tags. Existing data in the specified Tags remains unchanged</p> <div style="border: 1px solid gray; padding: 5px; width: fit-content; margin: 10px auto;"> <input checked="" type="checkbox"/> Replace all tags EXCEPT: Don't delete the following tags from the existing catalogue eg. 650,700 <input type="text" value="082"/> Don't import the following tags from the incoming catalogue eg. 650,700 <input type="text"/> </div>	

Catalogue Training

		Don't import the following tags from the incoming catalogue eg. 650,700	Adds non-identical tags when importing. Does NOT import the new data in the specified Tags. Existing data in the specified Tags remains unchanged 
HEADING	FIELD		EXPLANATION
Item Options When an existing Catalogue is replaced, all existing Stockitems:	Keep their current display		No existing Stockitems are refreshed – they remain the same
	Are refreshed from the Catalogue		All existing Stockitems are replaced by the new Catalogue details
	Are refreshed except lines: eg. 1,5,6		Enter the line numbers to be retained – for example: 6 (Line 6, which is usually Call Number). Line numbers correspond to the 6 lines of Stockitem display (for example: Line 1 is usually Title, Line 2 Author etc.)
	FIELD	OPTION	EXPLANATION
	Please choose the location to use when matching an order	Exact	Only order items where location is the same as the current Amlib location will be candidates for replacement
		Any	Stockitems on the file may replace any order item on the database
	Only create stockitems	Checked	The import of data will result in no Catalogue records being created. Only Stockitems will be created.
Unchecked (Default)		Create Catalogue records as well as Stockitems	

- Enter the options you would like, then click the **OK** button – the Saved Files screen will display:

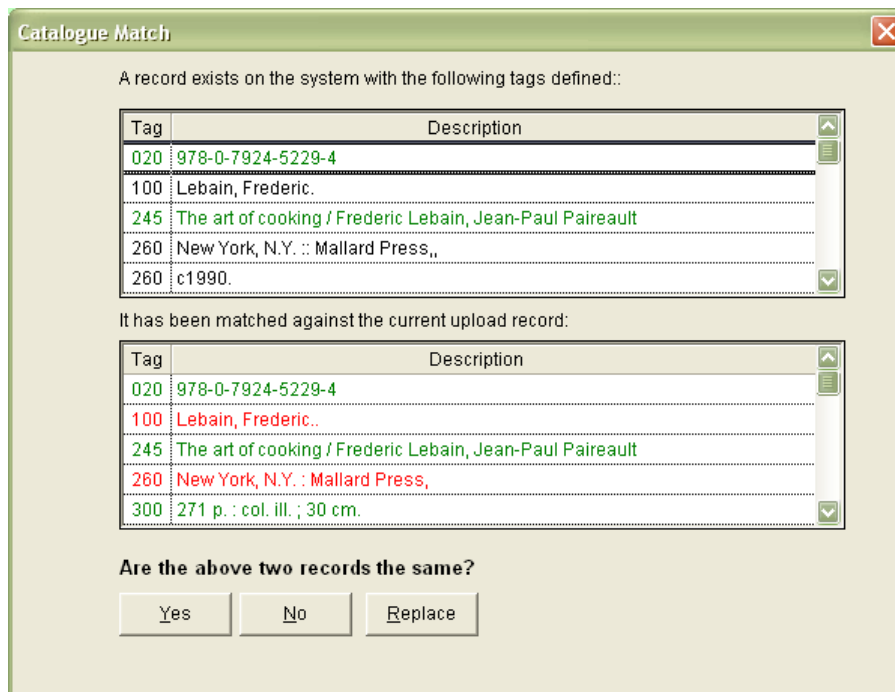

Catalogue Training

3. Type the names of the files into which all the newly created **Catalogues, Authorities** and/or **Stockitems** will be saved (if you do not want to check new items – for example: **Authorities**, do not enter a filename)
4. Click the **OK** button

HINT: These files assist in finding the newly created Catalogues, Authorities and/or Stockitems after the import. The Filenames are created so that you can identify the file later. A suggested Filename could be the type of data – for example: **SCIS** or **EXCHANGE**, the date and the initials of the staff member processing the data.

5. If confirmation of duplicate items has been requested in the parameters, a Catalogue Match screen will display every time a duplicate item is found:

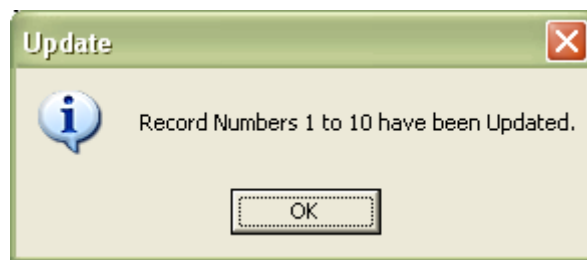

6. **Are the above two records the same?** Click the **Yes**, **No** or **Replace** button

OPTION	EXPLANATION
Yes	The catalogue entry that exists on the database will remain as displayed in the top box. A new Stockitem would need to be added if appropriate. The imported record will not be included in the New File created for Catalogue or Authorities
No	A new catalogue will be created with the data from the Imported data being used for the new catalogue record. The imported record will be included in the New File created for Catalogues or Authorities
Replace	The existing catalogue entry will remain but the data will be replaced with the data from the imported recorded. The imported record will not be included in the New File created for Catalogue but there may be some additions to the Authorities file

7. An Update prompt will display, indicating the progress of the import:

8. When the update is finished an Update prompt will display, showing the number of records Updated: **Record Numbers X to X have been Updated.**

9. Click the **OK** button
10. You will be able to view the log by selecting the **F6 Log** button

F6 Marc Log

This log lists any errors that were experienced in the process of importing the file and also what action was taken with certain items. Most of the errors that display in the log are caused by the tag numbers not being defined on the Amlib database. This may be because we did not wish to use them in the Catalogue data but were present in the data file.

Accessing a File after Import

If you had entered file names into Catalogue, Authorities and/or Stockitems, it is possible to access these new records from the Catalogue, Authorities and/or Stockitems applications. Select **File > DisplayFile** from the menu in any of these modules and select the relevant file.

For example: (Stockitem List)

1. Launch the *Amlib* client
2. Go to **Main > StockItem > Stockitem** – the Stockitem screen will display
3. From the menu, select **File > DisplayFile** – the Stockitem Saved Query Results table will display
4. Highlight the file and click the **F9 Select** button – the List of items created on import will display:

Catalogue Training

1. Add Item
No barcode

2. Check Form & Stats Codes

3. Check Location

4. Add Source (supplier if required)

5. Add correct Cost (do not add \$ sign)

6. Add any other relevant information

6. To access a list of codes in a field press the **.<Tab>** key. For example: in the Stats Code field, pressing the **.<Tab>** key will display a list of your Stats Codes and Descriptions – double click to make your selection

Please Note: If no Stockitems were created during import, then access the Catalogue Saved File – and refer to the [Adding Stockitems](#) process outlined as part of the [Manually Adding New Records](#) procedure below.

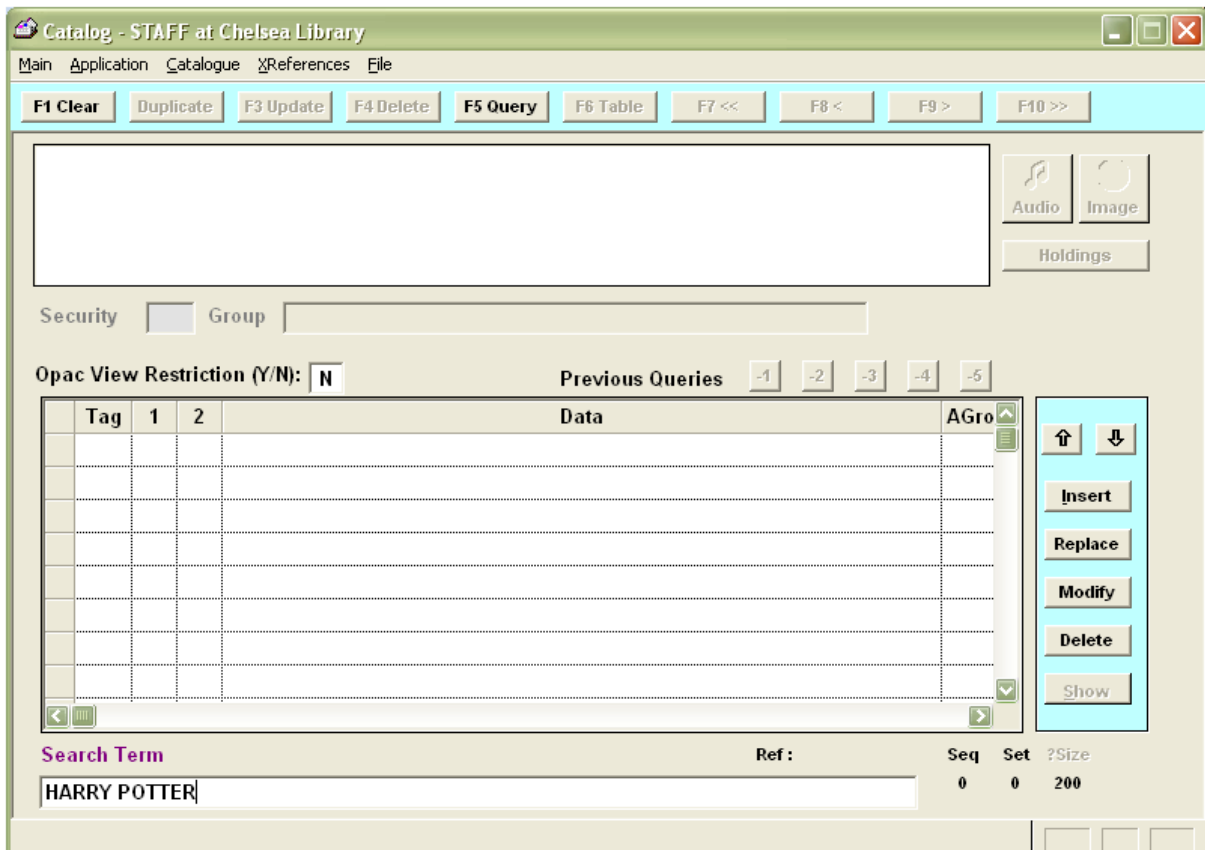

Catalogue Training

Duplicating Existing Records

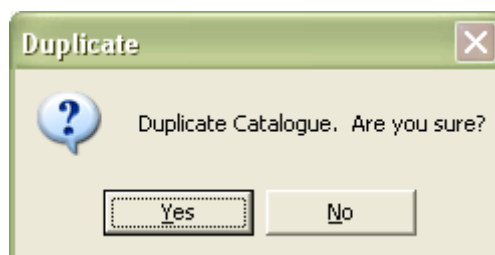

Duplicate [F2]

Used to duplicate (close copy) an existing Catalogue record.

1. Launch the *Amlib* client
2. Go to **Main > Catalogue > Catalogue** (or the  icon) – the Catalog screen will display:

3. Initiate a **F5 Query** to locate the existing catalogue record to be duplicated
4. Click the **Duplicate [F2]** button – a prompt with the following message will display:
Duplicate Catalogue. Are you sure?

5. Clicking the **Yes** button will result in a duplicate catalogue record being created (it will have a different Ref No to the original catalogue record) – the following prompt will display with the following message: **The Catalogue has been Duplicated.**

Catalogue Training

6. Alterations to the new catalogue record can then be made

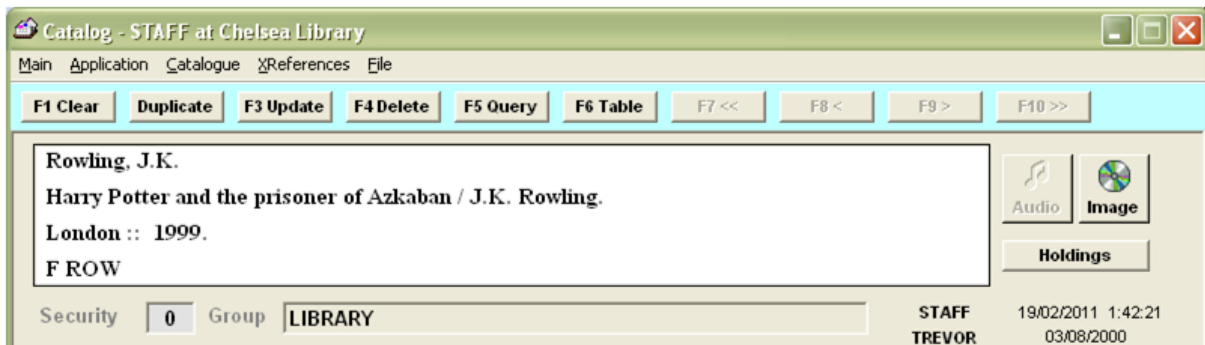

WARNING: The **Modify** button should be used with caution. When used to modify an Authority Tag, the changes will apply to all catalogues using that Authority.

7. Delete Tags you no longer wish to have or replace them with other Tags

ILL from Catalogue Record

Amlib now enables the ILL screen from a Catalogue record.

1. Launch the *Amlib* client
2. Go to **Main > Catalogue > Catalogue** (or the  icon) – the Catalog screen will display
3. Locate a catalogue record using the **F5 Query** function

4. From the menu, select **XReferences > CreateILL** – the InterLibrary Loans screen will display:

Catalogue Training

SECTION 3: MODIFYING CATALOGUE RECORDS

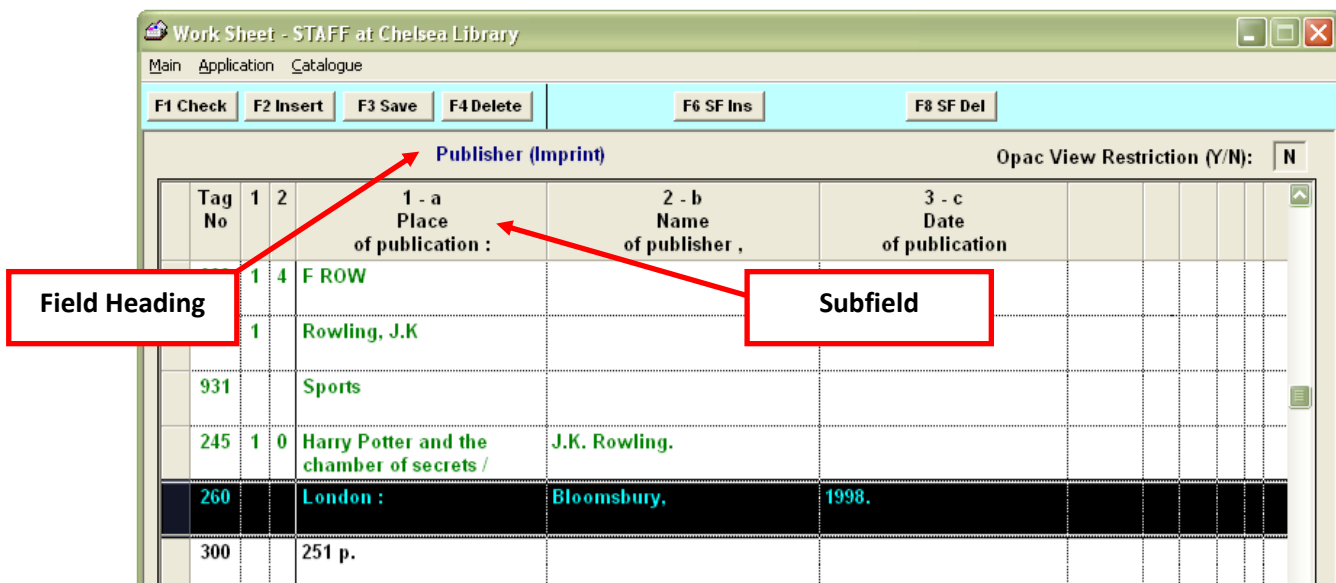

1. Launch the *Amlib* client
2. Go to **Main > Catalogue > Catalogue** (or the  icon) – the Catalog screen will display
3. Initiate a **F5 Query** to locate the Catalogue record that requires editing (alternatively, if the item record is open in the Stockitem module, select **XReferences > Catalogue**)

Modify Using the Work Sheet

It is now possible to edit an existing catalogue record using the Catalogue Work Sheet.

1. From the menu, select **Catalogue > Catalog Modify using Worksheet** – the Work Sheet screen will open

2. The catalogue record can then be edited/modified in the same manner as a new Catalogue record ([see above](#))

Catalogue Training

- Existing Authorities cannot be altered in the Work Sheet – if a new Authority is to be created (for example: one with a different subdivision), then the **F2 Insert** button should be used to enter it on a new line to that of the existing heading (the existing heading can be retained or removed using the **F4 Delete** button)

Insert

Inserts a new Tag for the Bibliographic record.

This process will be different depending on whether the Tag chosen from the list is an Authority or Non-Authority Tag.

The screenshot shows the 'Catalog - STAFF at Chelsea Library' application window. The main area displays a bibliographic record for 'Rowling, J.K. Harry Potter and the Chamber of Secrets / by J.K. Rowling ; illustrations by Mary GrandPré. New York : Arthur A. Levine Books, 1999. 978-0-439-06486-6 (hardcover)'. Below the record, there are fields for 'Security' (0) and 'Group' (LIBRARY). A table of tags is visible, with the following data:

Tag	1	2	Data	AGro
522			AR	LIBR
522			AR LEVEL 3.5	LIBR
650			Fantasy comics.	LIBR
650	1		Wizards	LIBR
650	1		Magic	LIBR
650	1		Schools	LIBR
650	0		Hogwarts School of Witchcraft and Wizardry (Imaginary organization)	LIBR

- Click the **Insert** button on the right-hand side of the screen – the Select For Creation table with a list of Tag Nos will display:

The 'Select For Creation' dialog box displays a table with the following data:

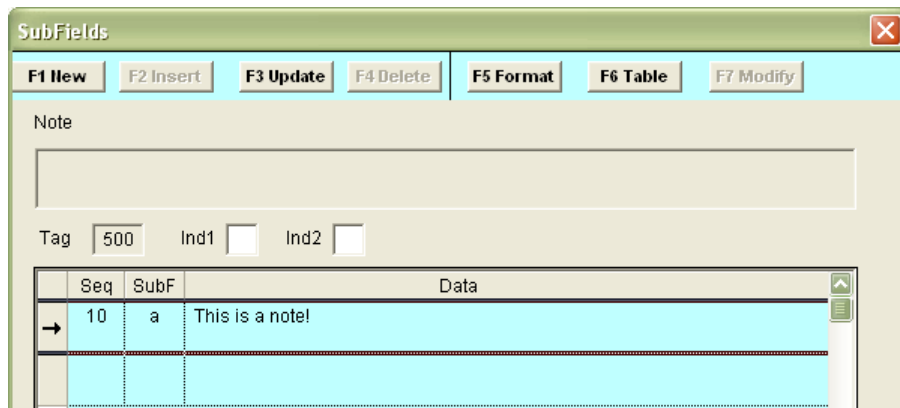

Tag No	Description
610	Subject - Corporate name
611	Subject - Meetin/Conference name
650	Subject - Topical term
651	Subject - Geographic term
653	Index Term - Uncontrolled
655	Index Term - Genre
656	Occupation

- Double-click on the desired Tag

Insert Non Authority Tag

- If the selected Tag is a Non-Authority – the SubFields window will display:

Catalogue Training

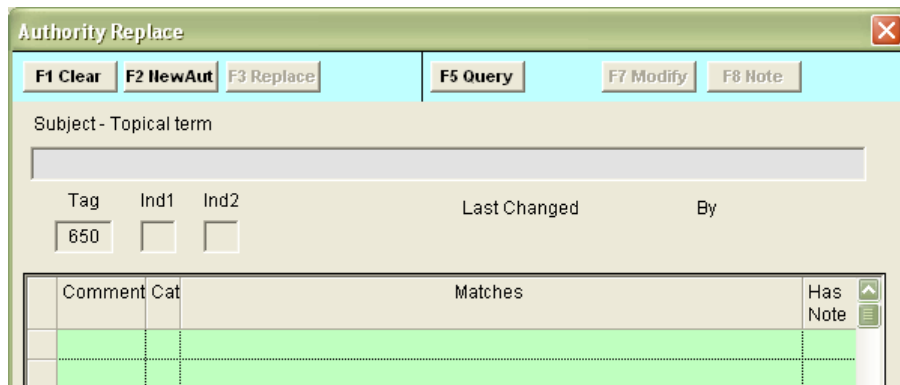

2. Please ensure you enter the correct data into the correct subfield – clicking the **F6 Table** button gives the Valid SubFields/Parts table available for that Tag:

3. Once the data has been correctly entered click the **F3 Update** button

Insert an Authority Tag

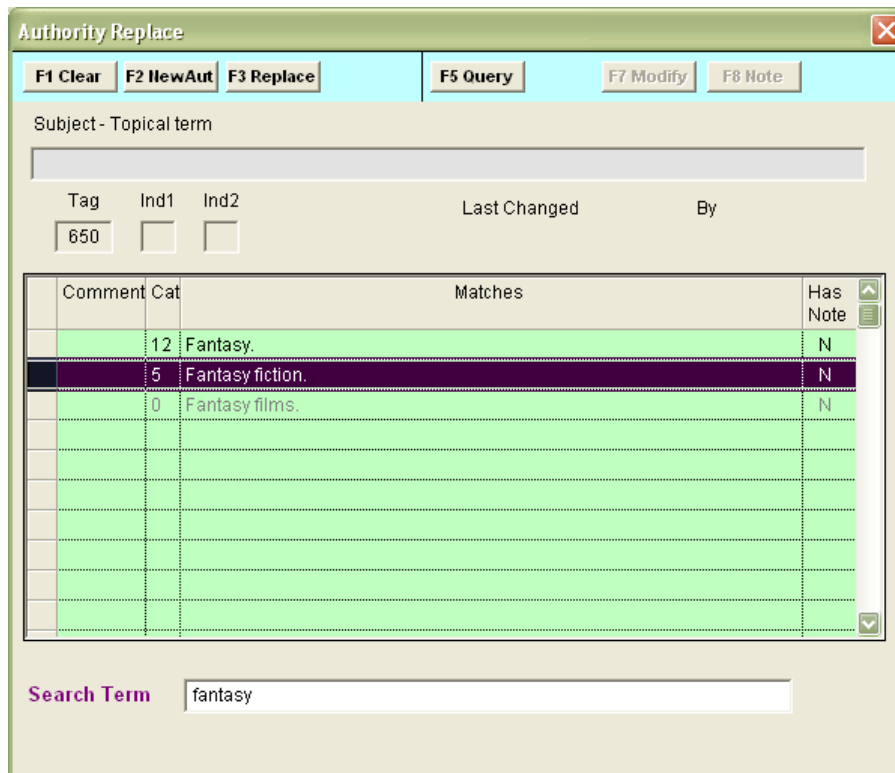

1. If the selected Tag is an Authority – the Authority Replace screen will display:

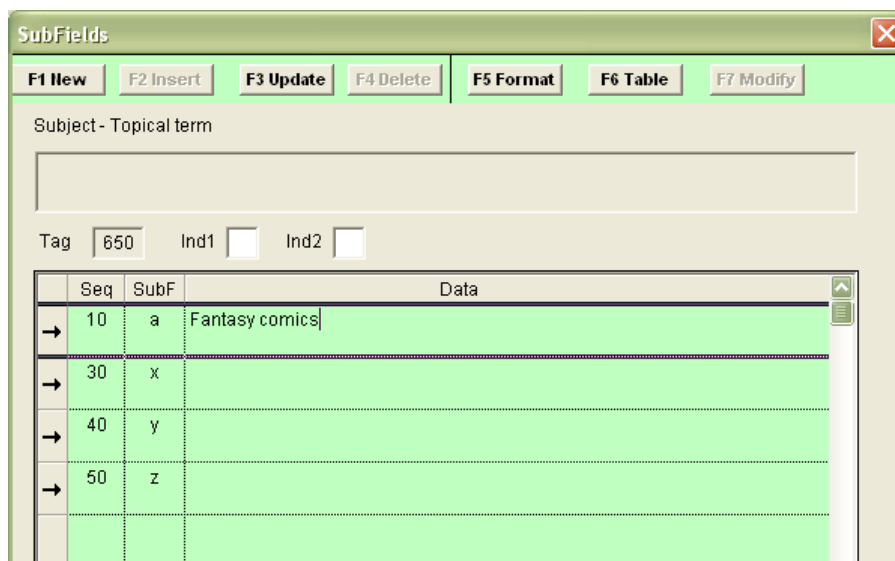

Please Note: Notice the **green** colour of the list (in this example: a **650 | Subject Heading**)? This is because the headings shown come from the *Authorities* module.

Catalogue Training

2. Type in a Search Term (for example: **Fantasy**) and click the **F5 Query** button – a list of matching terms will display:

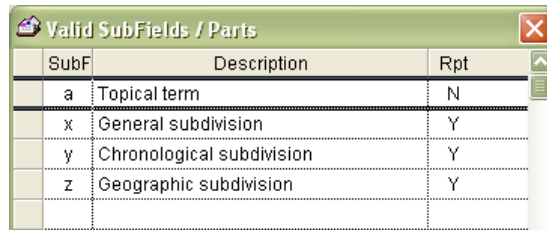

3. If the correct term is in the list:
 - a. Highlight the term and click the **F3 Replace** button
 - b. The Authority Replace screen will close and the selected Authority will appear in the catalogue record
4. If the correct term is NOT in the list or your search gives no results:
 - a. Click the **F2 NewAut** button – the SubFields screen will display:

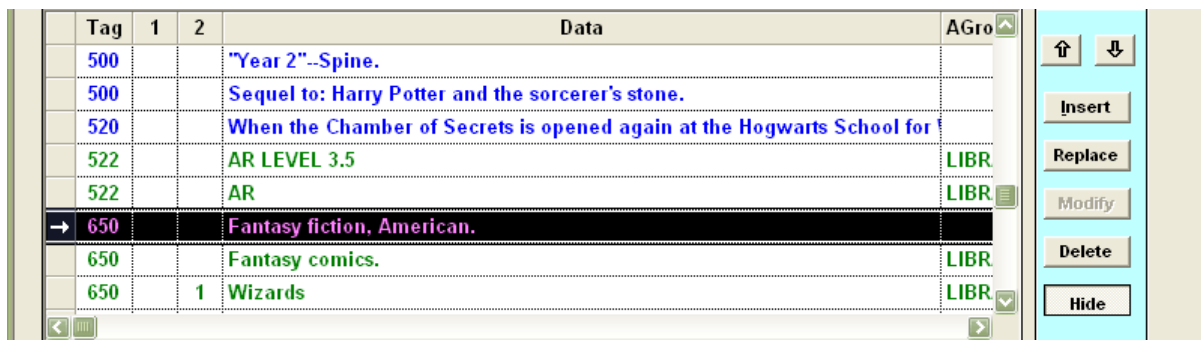

Catalogue Training

- b. Please ensure you enter the correct data into the correct subfield – clicking the **F6 Table** button gives the Valid SubFields/Parts table available for that Tag:

SubF	Description	Rpt
a	Topical term	N
x	General subdivision	Y
y	Chronological subdivision	Y
z	Geographic subdivision	Y

- c. Once the data has been correctly entered click the **F3 Update** button
- d. Click on the red **X** in top-tight corner to close the Authority Replace screen – the new Authority will have been added to the catalogue record:

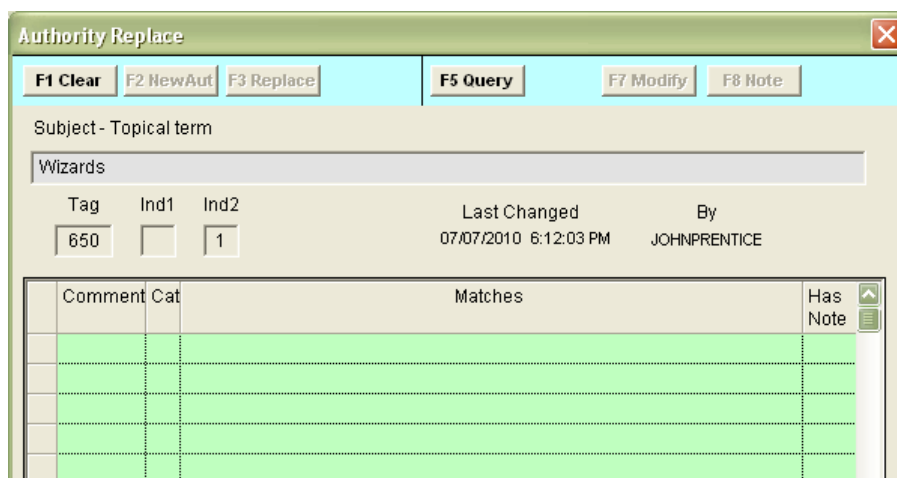

Tag	1	2	Data	AGro
500			"Year 2"--Spine.	
500			Sequel to: Harry Potter and the sorcerer's stone.	
520			When the Chamber of Secrets is opened again at the Hogwarts School for	
522			AR LEVEL 3.5	LIBR
522			AR	LIBR
650			Fantasy fiction, American.	
650			Fantasy comics.	LIBR
650	1		Wizards	LIBR

Once the Authority has been entered, it is available for use in subsequent catalogue records.

Replace

Replaces the Tag data with an alternative heading.

1. Highlight an Authority to be replaced
2. Click the **Replace** button on the right-hand side of the screen – the Authority Replace screen will display with highlighted Authority:

Authority Replace

F1 Clear F2 NewAut F3 Replace F5 Query F7 Modify F8 Note

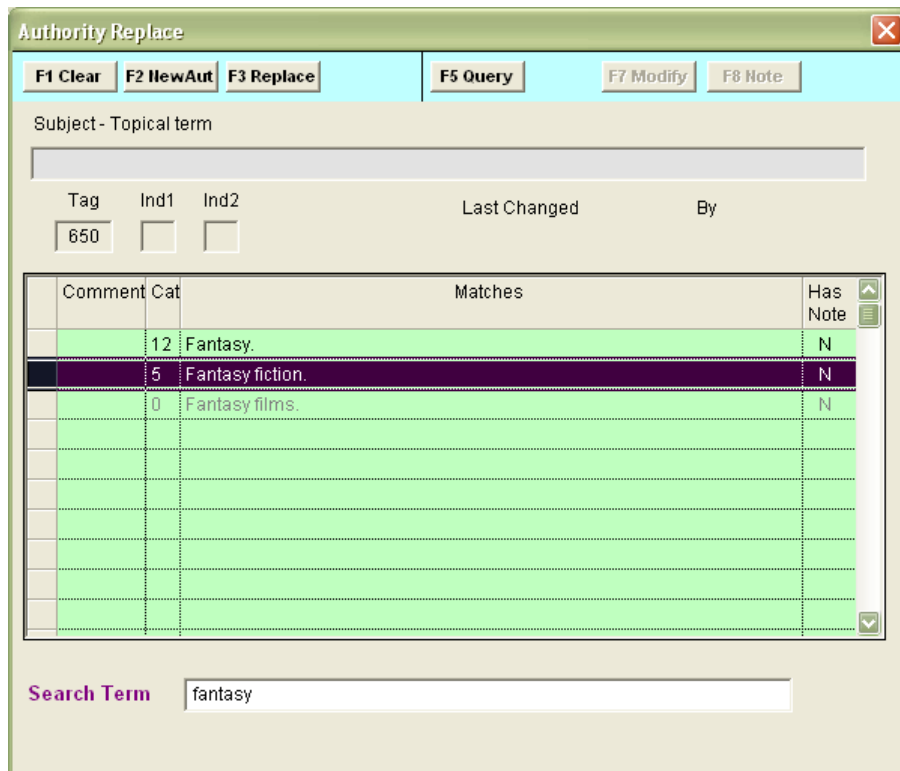

Subject - Topical term

Wizards

Tag	Ind1	Ind2	Last Changed	By
650		1	07/07/2010 6:12:03 PM	JOHNPRENTICE

Comment	Cat	Matches	Has Note

3. Type in a Search Term (for example: **Fantasy**) and click the **F5 Query** button – a list of matching terms will display:

4. If the correct term is in the list:
 - a. Highlight the term and click the **F3 Replace** button
 - b. The Authority Replace window will close and the selected Authority will appear in the catalogue record

5. If the correct term is NOT in the list or your search gives no results:

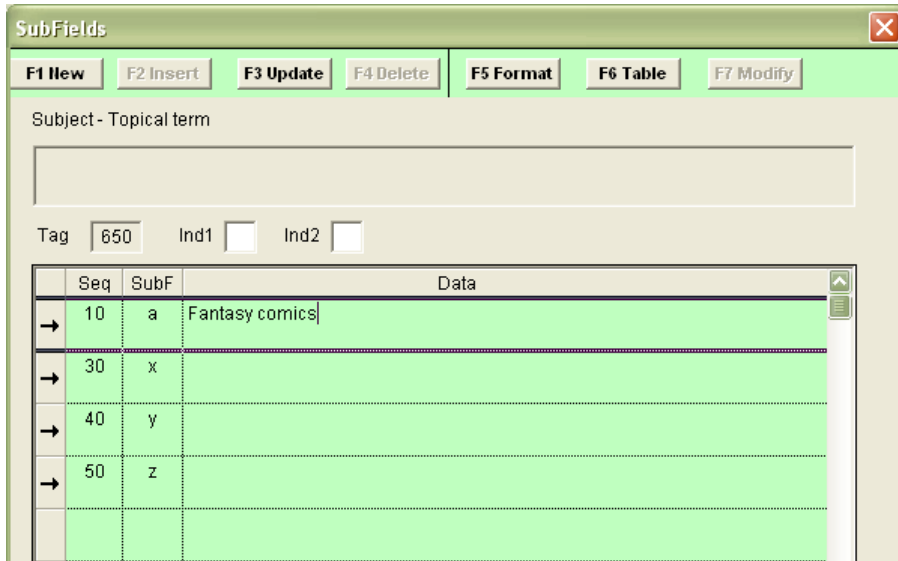

(Please Note: this option **NOT** available if [User settings](#) have been set to DISABLE modification of Authorities in the catalogue screen – the **Insert** button should be used to create a new Authority and the existing Authority removed from the record using the **Delete** button)

- a. Click the **F2 NewAut** button – a prompt with the following message may display:
Creating an Authority replaces the existing Authority. Continue?

Catalogue Training

- b. Click on the **Yes** button – the SubFields table will display:

- c. Please ensure you enter the correct data into the correct subfield – clicking the **F6 Table** button gives the Valid SubFields/Parts table available for that Tag:

SubF	Description	Rpt
a	Topical term	N
x	General subdivision	Y
y	Chronological subdivision	Y
z	Geographic subdivision	Y

- d. Once the data has been correctly entered click the **F3 Update** button
- e. Click on the red **X** in top-tight corner to close the Authority Replace screen – the new Authority will have been added to the catalogue record:

Tag	1	2	Data	AGro
500			"Year 2"--Spine.	
500			Sequel to: Harry Potter and the sorcerer's stone.	
520			When the Chamber of Secrets is opened again at the Hogwarts School for	
522			AR LEVEL 3.5	LIBR
522			AR	LIBR
→ 650			Fantasy fiction, American.	
650			Fantasy comics.	LIBR
650	1		Wizards	LIBR

If the heading to be replaced is not found, a new Authority can be created. This only replaces the existing Authority in this particular item.

Modify

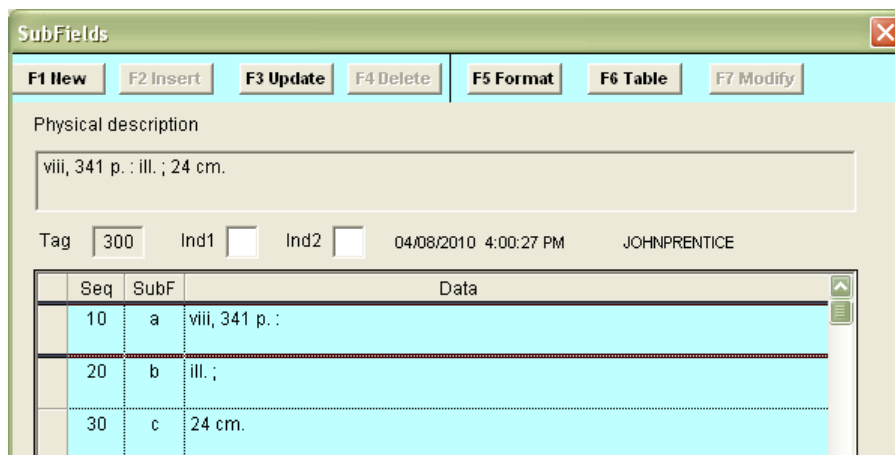

Please Note: It is possible to update [User Name security](#) so as to DISALLOW the editing of Shared Authorities using the **Modify** button. This helps ensure the integrity of the Shared Authorities (which

Catalogue Training

may be in use in other Catalogue records). Authorities can then be modified by XReferencing to the *Authorities* module.

1. Highlight the Tag to be modified and click the **Modify** button on the right-hand side of the screen – the Tag will open in the SubFields screen

WARNING: If the tag is an Authority, changes will be made to ALL Catalogue records using this Authority. BEWARE!

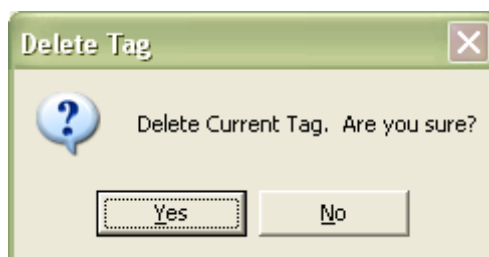

2. Make the changes
3. Click the **F3 Update** button when complete

Delete

Deletes a highlight tag (for this record only – does not affect other Catalogue records or any Authorities previously created).

1. Highlight the Tag to be deleted and click the **Delete** button on the right-hand side of the screen – a prompt will appear with the following message: **Delete Current tag. Are you sure?**

2. Click the **Yes** button
3. The Tag will be deleted

Hide/Show

Alternates between hiding/showing tags for this record.

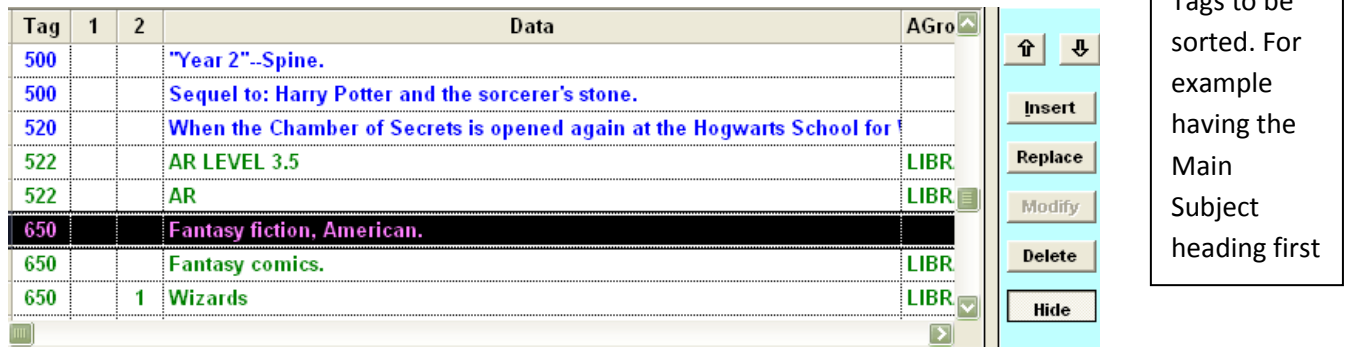

Catalogue Training

1. Click on the **Hide** button on the right-hand side of the screen to hide the Tags in the displayed record (**Hide** will then be replaced by **Show**)
2. Click on the **Show** button on the right-hand side of the screen to show the Tags in the displayed record (**Show** will then be replaced by **Hide**)

Please Note: Show has to be selected to enable the **Duplicate** button.

Movement of Tags

1. Highlight the Tag to move and use the arrow keys to move the Tags up or down

The screenshot shows a MARC record interface with a table of tags and a control panel. The table has columns for Tag, 1, 2, Data, and AGro. The tags are as follows:

Tag	1	2	Data	AGro
500			"Year 2"--Spine.	
500			Sequel to: Harry Potter and the sorcerer's stone.	
520			When the Chamber of Secrets is opened again at the Hogwarts School for	
522			AR LEVEL 3.5	LIBR
522			AR	LIBR
650			Fantasy fiction, American.	
650			Fantasy comics.	LIBR
650	1		Wizards	LIBR

The control panel on the right includes buttons for Insert, Replace, Modify, Delete, and Hide, along with up and down arrows. A callout box points to the arrows with the text: "Arrows enable the Tags to be sorted. For example having the Main Subject heading first".

Please Note: This sequencing possible within the record depends on what is set in the **Main > Supervisor > Installation – Catalogue** tab parameter line: **Allow tags to be sequenced anywhere within a catalogue (Y/N)** – see [here for further details](#).

- If it is left at the default **Y**, staff will be able to use the up and down arrows on the Catalogue record to reposition any MARC Tag within that record
- If it is changed to **N**, this will then restrict the ability for adjusting the sequence of a MARC tag in a specific record to its specific range only. This means that if there is only one MARC tag to that record it cannot be moved, but if there is more than one MARC tag, for example subject headings, then these can be moved within this group only

Catalogue Training

Catalogue Record Created / Last Edited Information

For newly created (and imported) Catalogue records it is now possible to tell which user created a record, and who it was last edited by. The top line shows when the record was last edited, and the bottom line remains the same, showing when the record was created. This information is not retrospective so that for all existing records, only the user, date and time for the last update will be shown.

SECTION 4: PARAMETERS

Supervisor

Installation: Catalogue Defaults

It is possible for *Amlib* to use certain MARC tags (for example: **020 | ISBN**) for duplicate checking purposes. This is especially important when *importing* records (where a lack of matching can result in unwanted duplicate records).

1. Launch the *Amlib* client
2. Go to **Main > Supervisor > Installation** – the Installation (DEFAULT) screen will display
3. Select the **Catalogue** tab:

Description	Value
A Marc record exists if one of the following tags match	001 020 035 979
Allow Catalogues to be restricted from viewing in NetOpacs (Y/N)	Y
Allow tags to be sequenced anywhere within a Catalogue (Y/N)	Y
Automatically 'Show' the Catalogue details after a search (Y/N)	Y
Automatically 'Tick' the Worksheet button in Catalogue Create (Y/N)	Y
Catalogue deletion level (1-4) (1=least severe, ..., 4=most severe)	1
Default for catalogue Opac Restrict (Y/N)	N
Display Tag Description in Catalogue instead of Tag No	N
Enter % to adjust price of item on Marc Import (eg 10 = +10%)	0.00
MarcImport Replace: don't delete these tags from the existing cat	
MarcImport Replace: don't import these tags from the incoming cat	
Only match an AOL if the incoming record has the same location	Y
Replace an Order if one of the following tags match an Order No	001 020 022 035
Round the price of all imported stockitems to: (ie 0.05 = 5 cents)	0.05
Tag to be formatted as an ISBN	020

4. Type the desired settings into the Value column (see the following list for parameters to adjust)
5. Click the **F3 Save** button when complete
6. Exit and restart the *Amlib* client for these settings to take effect

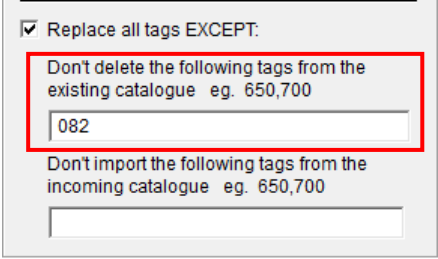

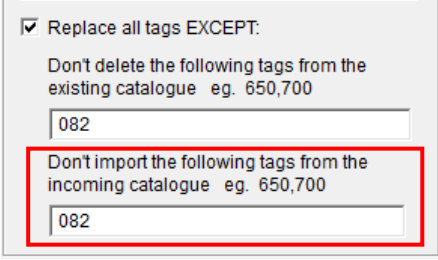

Catalogue Training

FIELD	EXPLANATION		EXAMPLE
A Marc record exists if one of the following tags match (Found in DEFAULT screen only)	A check is made for existing data matching the Tag numbers entered with the importing data. Note: ISBN has 2 modes when dealing with Multiple ISBNs. If the 020 Tag is included, Amlib will look at all the ISBN's within an incoming record and match as required		001 020 022
	Match any: Enter only one ISBN Tag No in the <u>Value</u> column	The ISBN/s of the existing record must match one of the multiple ISBN's within the incoming record for it to be considered existing – for example: when the Import file has 2 ISBNs and the existing Catalogue has only 1 (or more) a match will occur if at least one ISBN matches	001 020 022
	Match exact: Enter the number of 020s to match the incoming with the existing	The ISBN/s of the existing record must match with the same number of (multiple) ISBN's entered here. If ALL the ISBNs match with those in the incoming record, it will be considered existing The record from the input file with multiple ISBN's must match ALL the existing catalogue ISBN's (for example: 001 020 020), so if the incoming record has 2 ISBNs a match with an existing record will take place only if BOTH ISBNs match	001 020 020 022
Allow Catalogues to be restricted from viewing in NetOpacs (Y/N)	N	The <u>Opac View Restriction (Y/N)</u> default within the <u>Catalog</u> screen will be set to N and the checkbox <i>cannot</i> be edited	Y
	Y	The <u>Opac View Restriction (Y/N)</u> default within the <u>Catalog</u> screen will be set to N but the checkbox <i>can</i> be edited	
Allow tags to be sequenced anywhere within a Catalogue (Y/N)	N	The Marc Tags in the Display section of <u>Catalog</u> screen can only be moved within the Tag No and not anywhere else. The Arrows will be <i>inactive</i> once the end of the section is reached	If set to N , the order of the Tags in a particular section (the example: 650), can be altered but not beyond the 650 section. If set to Y , the order of the Tags can be set anywhere on the display – for example: a 650 Tag could display above the 020 Tag.
	Y	The Marc Tags in the Display section of <u>Catalog</u> screen can be moved anywhere in the record. The Arrows will be <i>active</i> to move to any Tag sequence	
Automatically 'Show' the Catalogue details after a Search (Y/N)	Y	When the <u>Catalog</u> screen displays: always display the full Bibliographic data for the Catalogue record, rather than the User clicking the Show button on the Screen	Y
	N	When the <u>Catalog</u> screen displays: the User will need to click the Show button or choose Catalogue > ShowAsDefault from the <u>Catalog</u> menu, to display the full Bibliographic data for the Catalogue record	
Automatically 'Tick'	Y	Set the Default to have the Worksheet	Y

Catalogue Training

the Worksheet button in Catalogue Create (Y/N)		displayed for Catalogue creation	
	N	The Default is not set to Worksheet and the user may click the Worksheet button if it is required	
Catalogue deletion level (1-4) (1=least severe, ..., 4=most severe)		<p><i>When catalogues are deleted, all the Non-Authorities are automatically deleted. The levels below only apply to the Authorities that were attached to the Catalogue that is to be deleted.</i></p> <p>Levels 1, 3 and 4 also delete the non-preferred Authority if the preferred authority is not attached to a catalogue. Level 1 does this because a unique authority should not have anything seeing it.</p>	1
		<p>Level 1: (Least SEVERE) The Authority will only be deleted if it is:</p> <ul style="list-style-type: none"> • Not attached to any other Catalogue • A unique Authority <p>Level 2: The Authority won't be deleted if it:</p> <ul style="list-style-type: none"> • Is attached to any other Catalogue record • Is <i>Seen By</i> another Authority • Has a <i>See Also</i> reference to another Authority • Is <i>Seen Also By</i> another Authority <p>Level 3: The Authority won't be deleted if it:</p> <ul style="list-style-type: none"> • Is attached to any other Catalogue record • Has a <i>See Also</i> reference to another Authority that is attached any other Catalogue record • Is <i>Seen Also By</i> another Authority that is attached to any other Catalogue <p>Level 4: (Most SEVERE) The Authority won't be deleted if it:</p> <ul style="list-style-type: none"> • Is attached to any other Catalogue 	
Default for catalogue Opac Restrict (Y/N)		Enable the Catalogue Restriction for the <i>OPAC</i> (as opposed to <i>NetOpacs</i>) to be set. Most sites would set this to N	N
Display Tag Description in Catalogue instead of Tag No	Y	Displays a <u>Description</u> rather than a Marc <u>Tag</u> number – for example: Topical Subject Heading	N
	N	The <u>Descriptions</u> are set in Main > Authorities > MarcTags	
	N	Displays the Marc <u>Tag</u> number – for example: 650	

Catalogue Training

<p>Enter % to adjust price on item on Marc Import (eg 10 = +10%)</p>	<p>The percentage entered will be the default price adjustment in the <u>Bibliographic Option</u> screen during the Marc Import. This allows for the <u>Item Price</u> during Marc Import to be appreciated automatically. For example: to allow for GST. This default can be overridden within the <u>Bibliographic Option</u> screen if required</p>	<p>10 (defaults to: +10%)</p>
<p>MarcImport Replace: don't delete these tags from the existing cat</p> <p>(Found in DEFAULT screen only)</p>	<p>During the Marc Import, sets the default for the <u>Bibliographic Option</u> screen – identifying Tags that are not to be replaced:</p> <ul style="list-style-type: none"> Does not delete the existing data from the specified Tag(s): the Tag is automatically placed in the <u>Don't delete...</u> field box Does import the new data for all other Tags (deleting any existing data) 	<p>Y</p>
<p>MarcImport Replace: don't import these tags from the incoming cat</p> <p>(Found in DEFAULT screen only)</p>	<p>During the Marc Import, sets the default for the <u>Bibliographic Option</u> screen – identifying Tags that are not to be replaced:</p> <ul style="list-style-type: none"> <i>Does not</i> import the new data for the specified Tag(s): the Tag is automatically placed in the <u>Don't import...</u> field box Does import the new data for all other Tags 	<p>N</p>
<p>Only match an AOL record if the incoming record has the same location</p>	<p>For Advanced Order Records (W.A. State Government of Western Australia data only). Will only match an AOL record from an exchange if the AOL has the same location as the incoming record</p>	<p>Y</p>
<p>Replace an Order if one of the following tags match an Order No</p>	<p>The system compares the Order Numbers on an incoming exchange and replaces the existing data only if the Order Numbers are matched to the data in the specified Tags</p>	<p>001 035</p>

Catalogue Training

<p>Round the price of all imported Stockitem to: (ie 0.05 = 5 cents)</p> <p>(Found in DEFAULT screen only)</p>	<p>When importing Stockitem records with prices, the Item Current cost and the Original Cost (if new items), are to be rounded to the amount set in this parameter</p>	<p>0.05</p>
<p>Tag to be formatted as an ISBN</p> <p>(Found in DEFAULT screen only)</p>	<p>ISBNs and ISSNs are usually formatted with – separators between the numbers. The actual formatting depends on a number of rules and is based on the starting numbers in a group.</p>	<p>020</p>
<p>Tag to be formatted as an ISSN</p> <p>(Found in DEFAULT screen only)</p>		<p>022</p>
<p>Tag to be used as the AOL Order No</p> <p>(Found in DEFAULT screen only)</p>	<p>(WA State government sites only) When AOL files are processed the system will generate an order number based on the contents of the Tag Number field defined in this parameter.</p>	<p>001</p>
<p>Tags using the first indicator as the number of chars to ignore</p> <p>(Found in DEFAULT screen only)</p>	<p>For filing, the first indicator displays a number of characters to ignore – for example: “the” would have a second indicator of 4</p>	<p>730 740</p>
<p>Tags using the second indicator as the number of chars to ignore</p> <p>(Found in DEFAULT screen only)</p>	<p>For filing, the second indicator displays a number of characters to ignore – for example: “the” would have a second indicator of 4</p>	<p>240 245 440 490 745 840</p>
<p>Use the (L)ogin group or (C)atalogue group for the group code of new non-authority tags?</p>	<p>The Library Group code used when inserting Non-Authority tags would usually be the same as the Catalogue Group code. However, there may be instances where libraries may want the option of using the Login Ilcation’s Group code</p>	<p>C (Default)</p>

Catalogue Training

Installation: Stockitem Defaults

The setting for this is contained in the Installation settings:

1. Launch the *Amlib* client
2. Go to **Main > Supervisor > Installation** – the Installation (DEFAULT) screen will display
3. Select the **Stockitem** tab:

Description	Value
Default Item Form	BK
Default Item Stats Code	AF
Delete a stockitem memo when it is ### days old	9999
Deprec. Items on straight line basis	Y
Description of Stockitem Convert Value	Copy No / Convert
Description of Stockitem Description	Description
Description of Stockitem Process	Process
Enter Item Line Numbers to refresh on Cat Changes	12345
Keep History record of price changes	Y
Order of columns to display within Stockitem	STK_LINE1, STK_LINE2, STK_LINE6, ST
Show Memos in Stockitem automatically (Y/N)	N

4. Type the desired setting into the Value column (see the following list for parameters to adjust)
5. Click the **F3 Save** button when complete
6. Exit and restart the *Amlib* client for these settings to take effect

It is also possible to adjust these settings by individual Location (see above).

FIELD	EXPLANATION	EXAMPLE
Default Item Form	Allows you to define the default <u>Form</u> code to be automatically generated for new items (this also sets the default labels used on the <u>Stockitem</u> screen)	BK
Default Item Stats Code	Allows you to define the default <u>Stats Code</u> to be automatically generated for new items	ANF
Delete a stockitem memo when it is ### days old	When creating an Stockitem memo you may supply an expiry date. Otherwise the system will calculate the expiry as being the current date plus the number of days entered in this field. A report can be run to identify memos that should be deleted from the system.	365

Catalogue Training

<p>Deprec. Items on a straight line basis</p>	<p>Regardless of the depreciation method, the same depreciation tables are used within <i>Amlib</i>. The essential difference is in the calculation and which cost price is used for the calculation.</p> <p><u>Set to Y:</u> Depreciate using Original cost and percentage to calculate number of years for depreciation</p> <p><u>Set to N:</u> Depreciate using Current cost and percentage to give the item a Reducing Balance based on number of years for depreciation.</p> <p>See: Stockitem screen > Application > StockStatsGroup – F7 AccPri</p>	<p>Y</p>

Stockitem Fields for Table Sequence

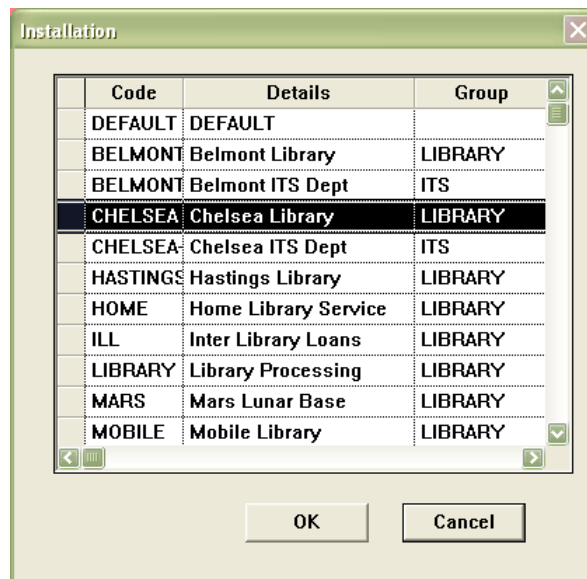

The following fields can be used to create the list:

TITLE IN TABLE	COLUMN NAME	TITLE IN TABLE	COLUMN NAME
Title	STK_LINE1	Volume	STK_VOLUME
Author	STK_LINE2	Temp Location	STK_LOC_TEMP
Call No	STK_LINE6	Floor Location	STK_LOC_FLOOR
Form	STK_FORM	Item No (barcode)	STK_ITEM_NO
StatsCode	STK_STATS_CODE	Convert Val.	STK_CONVERT_VALUE
On Loan?	STK_IS_ON_LOAN	Description	STK_DESCRIPTION
On Order?	STK_IS_ON_ORDER	Borrower barcode	STK_BOR_BAR_NO
Reserved?	STK_IS_RESERVED	Borrower Name	STK_BOR_NAME
Due Date	STK_ISS_DUE	ILL Supplier	STK_ILL_SUPP
Perm Location	STK_LOC_PERM	ILL Renew	STK_ILL_RENEW
Process	STK_PROCESS	ILL Due Date	STK_ILL_DUE
Edition	STK_EDITION	Call Set	STK_CALL_SET

Installation: Defaults by Individual Location

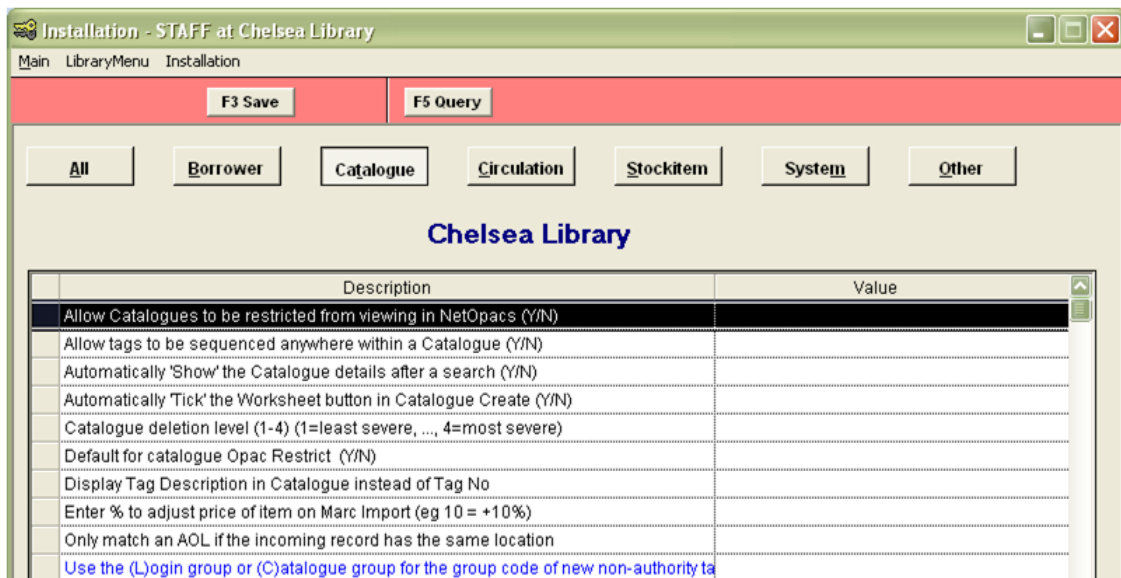

It is also possible to adjust some Catalogue and Stockitem settings by individual Location.

1. In the *Supervisor* module Installation screen menu, select **Installation** > **Choose Location** – the Installation location prompt will display:

2. Select a location (for example: **Chelsea Library**) and click the **OK** button – the Installation screen for that location will then display
3. Select the **Catalogue** (or **Stockitem**) tab:

Catalogue Training

If you would like to use the DEFAULT setting for any parameters, then you can leave the settings in this table blank (any changes to the settings on this screen will only apply to that location)

4. Type the desired settings into the Value column
5. Click the **F3 Save** button when complete
6. Exit and restart the *Amlib* client for these settings to take effect

User Security: Modify a Shared Authority in the Catalogue Screen

The *Catalogue* module **Modify** button can be used to update any MARC tag in a Catalogue record including Shared Authorities. This has the potential to allow a user to unknowingly alter other records also using that Shared Authority.

For this reason, we recommend setting the **Modify** button to be *greyed* out if a Shared Authority is selected. This help ensures the integrity of the Shared Authorities by making them only editable in the *Authorities* module.

1. Launch the *Amlib* client
2. Go to **Main > Supervisor > UserNames** – the User Names screen will display:

User Name	Location	Circ at this Location Only (Y/N)	Level
CIRC	CHELSEA	N	100
DIY1	CHELSEA	N	91
JOHN SMITH	CHELSEA	N	100
NETOPACS	WEB	N	100
OPAC1	CHELSEA	N	91
STAFF	CHELSEA	N	100

3. Select a **User Name** in the table and click the **F8 Choose** button – the User Security screen will display:

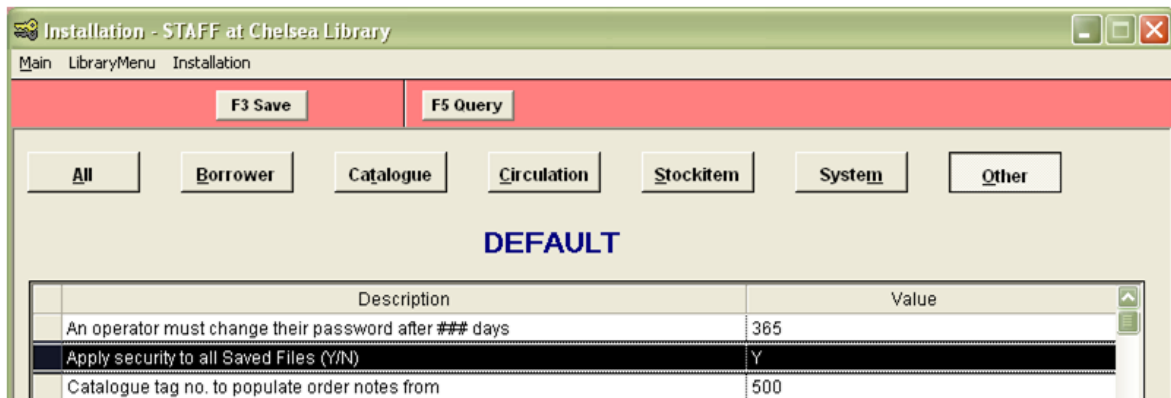

Catalogue Training

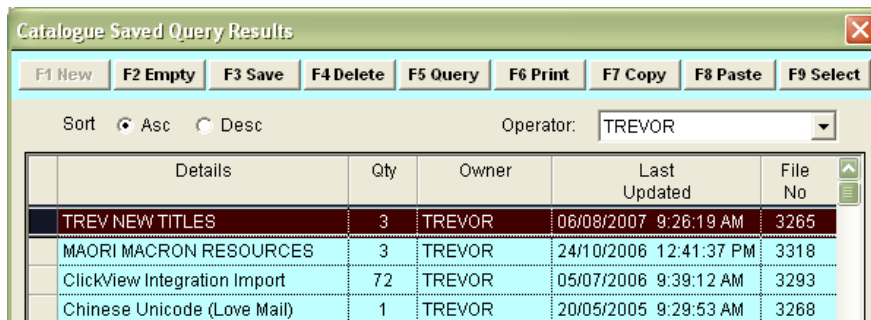

4. From the main User Security menu, select **ActualMainMenu > Catalogues > Catalogue – NoSharedAuthUpdate**
5. Menu Chosen display should now be: **Catalogue.NoAuthUpdate**
6. Click the green **Give** button to DISABLE the Users ability to modify a Shared Authority in the Catalogue module
7. Close the User Security screen by clicking on the red [X]
8. Exit and restart the *Amlib* client for these settings to take effect

All Modules: Saved Files

1. Launch the *Amlib* client
2. Go to **Main > Supervisor > Installation** – the Installation (DEFAULT) screen will display
3. Select the Other tab:

4. Apply security to all Saved Files (Y/N) can be set for all saved files in any module that has this function available. If this is set to **N** (for **No**) when saved files are viewed, the screen displays as shown:

If the parameter value is **Y** (for **Yes**) this allows the operator to stipulate whether other operators are able to access this file when the file is being created. The operator who created this file can also modify

Catalogue Training

the column at a later time. When other operators select to view another operator's files, only the ones with a **Y** (for **Yes**) in the Allow other operators to access this file (Y/N) column will be displayed:

Details	Allow other operators to access this file (Y/N)	Qty	Last Updated	File No
CancerExport	N	6	21/02/2011 9:47:03 AM	3571
CLICKVIEW JP 15/6	N	15	21/02/2011 9:47:03 AM	3520
EXCH JP 20/01	N	2	21/02/2011 9:47:03 AM	3546
PER Issue Deletions	Y	4	16/02/2011 5:15:02 PM	3572
Z39 Import	Y	0	14/12/2010 12:34:39 PM	3545
AddSubject	Y	1128	02/12/2010 12:58:01 PM	3519
Saved Cats	Y	104	11/11/2010 1:30:57 PM	3509

In the example above, the Apply security to all Saved Files (Y/N) parameter has been set to **Y** (for **Yes**). The operator Lucy has seven (7) Saved Files created in the *Catalogue* module, four (4) of which have had the Allow other operators to access this file (Y/N) column set to **N** (for **No**).

When another operator views her files they will only see for (4) displayed:

Details	Allow other operators to access this file (Y/N)	Qty	Last Updated	File No
PER Issue Deletions	Y	4	16/02/2011 5:15:02 PM	3572
Z39 Import	Y	0	14/12/2010 12:34:39 PM	3545
AddSubject	Y	1128	02/12/2010 12:58:01 PM	3519
Saved Cats	Y	104	11/11/2010 1:30:57 PM	3509

5. Change the setting as desired and click the **F3 Save** button
6. Exit and restart the *Amlib* client for these settings to take effect

This setting can also be set by Individual Location.

Catalogue

Display Tags

This screen allows you to set up which Tags display in the Display Tags for the brief catalogue record that appears in the window at the top of the Catalog screen (which is also what appears in the Catalogue List). This table is usually set up when your system is first loaded or perhaps after a major re-organisation of the system.

1. Launch the *Amlib* client
2. Go to **Main > Catalogue > CatDisplayTags** – the Set Up Display Tags table will display:

Label	Tags to Display
Line 1	100 110 111 700 715 710 930
Line 2	245 740 440 240 900 938
Line 3	260 250 905 933
Line 4	082 984 089 099 084 856 020 022 935

To use a preferred instance of multiple tags enter the indicators in the form (n,n) immediately after the tag
 Note: Use " double quotes to indicate you want a space in the indicator

Tag	Description
001	Control number
008	Fixed Length Data Elements
010	LC Control Number
020	ISBN
022	ISSN
035	Local system control number
040	Cataloguing source

3. Define the Label and Tags to Display for each Line – these Tags (and their Labels) define how the brief details of a catalogue record display at the top of the Catalog screen:

Rowling, J.K. Harry Potter and the prisoner of Azkaban / J.K. Rowling. London :: 1999. F ROW

More than one tag can be added to the Tags to Display column. The tags should be added in order of preference – for example: **100 110 700**. If the **100** tag is present in a Catalogue record then the contents will display for that Line. If no **100** tag is present, then the contents of the **110** tag will display, and so on.

4. Click the **F3 Save** button when complete
5. Close the *Catalogue* module for these settings to take effect

Please Note: You will then need to rebuild the catalogue display for the existing catalogue records.

- See: [Appendix 6: Catalogue Maintenance Tasks](#) for more information

Catalogue Training

Authority

Punctuation

Punctuation usually comes with the imported data. An exception to this is the inclusion of hyphens between Subject Headings and the subdivision. This formatting is set up in the *Authorities* module (usually **Standard**).

WARNING: Adding punctuation to other MARC tags may affect the importing of records from cataloguing agencies where punctuation is taken from the imported record rather than the *Amlib* system. If punctuation is added using **F8 Format**, duplicated punctuation may result.

1. Launch the *Amlib* client
2. Go to **Main > Authorities > MarcTags** – the Marc Tags Within the System table will display:

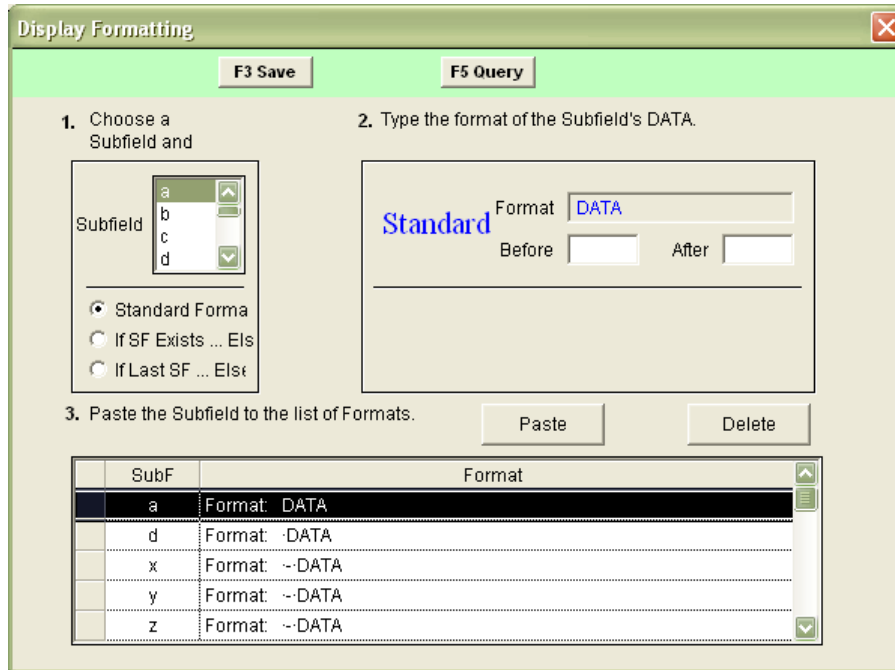

Tag No	Tag Description	Defa Ind 1	Defa Ind 2	Can the Tag be Repeated in a Catalogue (Y/N)	Is the Tag an Authority that is only used in 1 Catalogue (Y/N)	Keyword Search Code	Default Catalogue Show Sequence	Allow Tag Xrefs with these comma sep list
600	Subject - Personal name			Y	N	S	60000	600
610	Subject - Corporate name			Y	N	S	61000	610
611	Subject - Meeting/Conference name			Y	N	S	61100	611
650	Subject - Topical term			Y	N	S	65000	650
651	Subject - Geographic term			Y	N	S	65100	651
653	Index Term - Uncontrolled			Y	N	N	65300	653
655	Index Term - Genre			Y	N	N	65500	655
656	Occupation			Y	N	N	65600	656
700	Added entry - Personal name	0		Y	N	A	70000	700
710	Added entry - Corporate name	0		Y	N	A	71000	710
711	Added entry - Meeting/Conference name	0		Y	N	A	71100	711
715	Added Entry Corporate Name			Y	N	A	71500	715
730	Added Entry - Uniform Title			N	N	T	73000	730
740	Added entry - uncontrolled related/another	0		Y	N	T	74000	740
780	Preceding title entry			Y	N	T	78000	780
785	Succeeding title entry			Y	N	T	78500	785

3. Highlight a Subject-related MARC tag – for example: **650**
4. Click the **F8 Format** button – a prompt with the following message will display: **There are two types of Marc Tag formatting: Standard and Import/Export. Configure Standard (Yes) or Import/Export (No)?**

Catalogue Training

- Click the **Yes** button – the Display Formatting screen will display:

- Adjust the punctuation as required
- Click the **F3 Save** button when complete

Please refer to the *Authorities Training Manual* for further information about setting up formatting on MARC tags.

- Punctuation in manually created records is usually entered manually with the exception of the Subject Heading divisions (as described above). Refer to the **AACR2** for exact punctuation requirements when cataloguing an item.

Tag No	1	2	1 - a Place of publication :	2 - b Name of publisher ,	3 - c Date of publication
082	1	4	F ROW		
100	1		Rowling, J.K		
245	1	0	Harry Potter and the prisoner of Azkaban /	J.K. Rowling.	
260			London :	Bloomsbury,	1999.
300			317 p.		
440	0		Harry Potter ;	HARRY POTTER	
650	0	7	Witches and warlocks	Fiction.	

Catalogue Training

Stockitem Display

Determines which Tags from the Catalogue record will display in the Stockitem Display Lines.

1. Launch the *Amlib* client
2. Go to **Main > StockItems > StockitemForms** – the Form Codes screen will display:

Form	Description	Allow Loan	Floating ?	Cat Def Defined
AC	Audio Cassettes	Y	N	N
BK	Books	Y	N	N
BR	BookRoom	Y	N	N

3. Highlight a Form code in the table – for example: **BK - Books**
4. Click the **F9 Display** button – the Stock Display Tags screen will display:

Label	Tags to Display
Line 1	Title 245
Line 2	Author 100 110 700
Line 3	Publisher 260
Line 4	Series/ISBN 440 020
Line 5	Subject 650 651 600 630
Line 6	Call Number 082 089 099 984

To use a preferred instance of multiple tags enter the indicators in the form (n,n) immediately after the tag
Note: Use " double quotes to indicate you want a space in the indicator

Edition Volume Price Form

** NOTE: You can use these parameters for another form code by entering that form code here.

Tag	Description
001	Control number
008	Fixed Length Data Elements
010	LC Control Number
020	ISBN
022	ISSN
035	Local system control number

Catalogue Training

SECTION 5: CATALOGUE MAINTENANCE

It is preferable to delete Catalogue records from the Stockitem, as this deletes the item and if the item is the last for the Catalogue gives an option to also delete the Catalogue record.

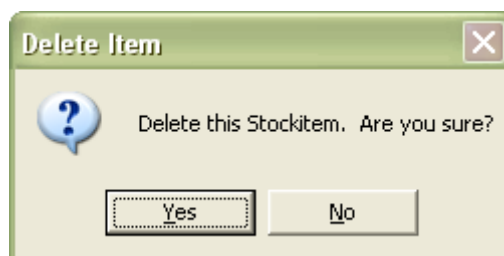

Single Deletions

Catalogue Records can be deleted using the **F4 Delete** button within the Catalog screen. You may not delete a record which has associated Stockitems. More commonly Catalogue records are deleted using the **F4 Delete** button with the Stockitem screen, which allows the operator to delete the item, as well as the Catalogue record if it is the last Stockitem associated with that catalogue record.

1. Launch the *Amlib* client
2. Go to **Main > StockItem > Stockitem** – the Stockitem screen will display
3. Initiate a **F5 Query** to locate the item to be deleted

4. Once the item is displayed, click the **F4 Delete** button
5. If there is more than one item attached to the catalogue record:
 - a. A prompt with the following message will display:
Delete this Stockitem. Are you sure?

- b. Click the **Yes** button
- c. The item will be deleted

Catalogue Training

6. If there is only one item attached to the catalogue record:
 - a. A prompt with the following message will display:
This item is the LAST one for the catalogue. Do you still wish to delete the stockitem?

- b. Click the **Yes** button – the item will be deleted and another prompt with the following message will then display:
That was the last Stockitem for the Catalogue. Delete the Catalogue?

- c. Click the **Yes** button to delete the Catalogue record

Mass Deletions

Items can be deleted *en masse*. This can be done from a Stockitem List screen (each item that is to be deleted needs to be highlighted) or alternatively from a Saved File.

Stockitem List

1. Launch the *Amlib* client
2. Go to **Main > StockItem > Stockitem** – the Stockitem screen will display
3. Initiate a **F5 Query** or Stockitem Where search to bring up a list of items to be deleted (alternatively, you may decide to use a Saved File as the basis of your deletions – select **File > Display File > select a saved File > F9 Select**)

Seq	Title	Author	Call No	Form	Stats	On Loa	Due Back	Rsv	Perm Loc	Process	On Ord	Series	Process Date	Edit
1	Doctor Who and the auton inv	Dicks, Terrance.	JPB DICK	BK	JPB	N		0	CHEL		N	Doctor Who	198	
2	Doctor Who and the auton inv	Dicks, Terrance.	JPB DICK	BK	J	Y	19/12/20	0	MUSIC		N	Doctor Who	197

4. Highlight the items to be deleted

Catalogue Training

- From the Stockitem List main menu, select **Table > Mass Item Deletion** – the Mass Delete Items screen will display:

Mass Delete Items

Items

Confirm Delete Item Message Required ?

Last Item Message for Cat Required ?

Catalogue

Delete Catalogue if Last ? **

Confirm Delete Cat. Message Required?

CatalogueFile

If a Catalogue record has no more items after an item is deleted then save in the file below (Do not choose Delete ** above !)

GetFile File:

Note : Items on loan, reserved or with memos will not be deleted

OK Cancel

- Add a **tick** in the Catalogue: Delete Catalogue if Last ? box
- Click the **OK** button – the following prompt will appear:

Stockitem List - Item Deletions

 You are about to delete items
With the parameters as supplied you can expect that you will
.....
Not get a message for every item deletion
Not get a message if the item is the last for the catalogue record
Catalogue records with no more items will be deleted
You will NOT get a message before Catalogue records are deleted
Do you wish to Continue ?

Yes No

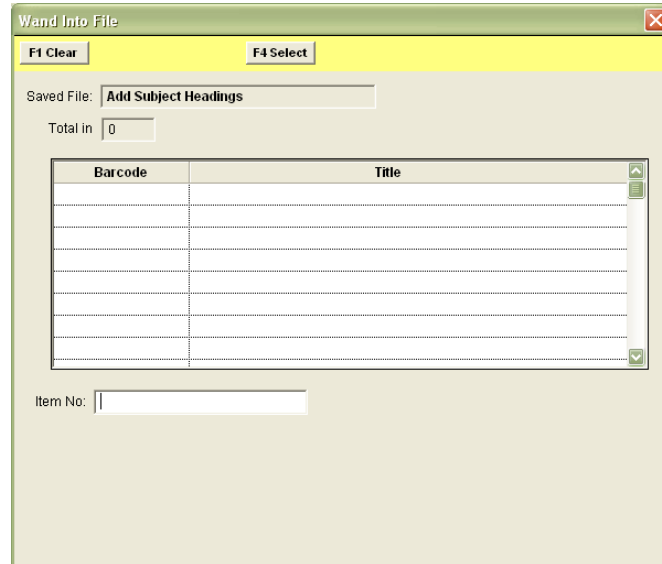

- Click the **Yes** button
- The items (and any associated Issue Catalogue records) will be deleted

Wand Into File

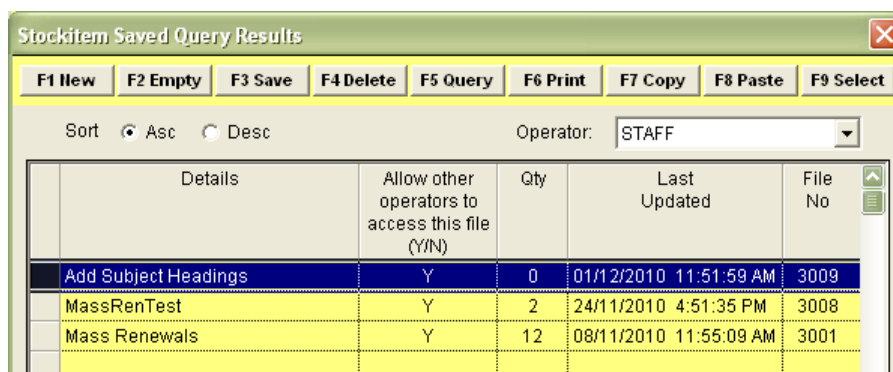

- Launch the *Amlib* client
- Open the Stockitem module

Catalogue Training

3. Select **File > WandIntoFile** – the Wand Into File screen will display
4. Click the **F4 Select** button – the Stockitem Saved Query Results screen will display
5. Highlight an existing file, or click the **F1 New** button to add a new file (name it and then click the **F3 Save** button)
6. Saved File: = selected file (for example: **Add Subject Headings**)

7. Scan all items
8. Close out of Wand Into File window when complete
9. In Stockitem module, select **File > DisplayFile** – the Stockitem Saved Query Results screen will display:

Details	Allow other operators to access this file (Y/N)	Qty	Last Updated	File No
Add Subject Headings	Y	0	01/12/2010 11:51:59 AM	3009
MassRenTest	Y	2	24/11/2010 4:51:35 PM	3008
Mass Renewals	Y	12	08/11/2010 11:55:09 AM	3001

10. Highlight the saved file (for example: **Add Subject Headings**) and click the **F9 Select** button
11. Highlight all the items in the table
12. Select **XReferences > Catalogue**
13. This will bring up the table in the Catalogue module
14. Select **File > Save All**
15. Highlight an existing file, or click the **F1 New** button to add a new file (name it and then click the **F3 Save** button)

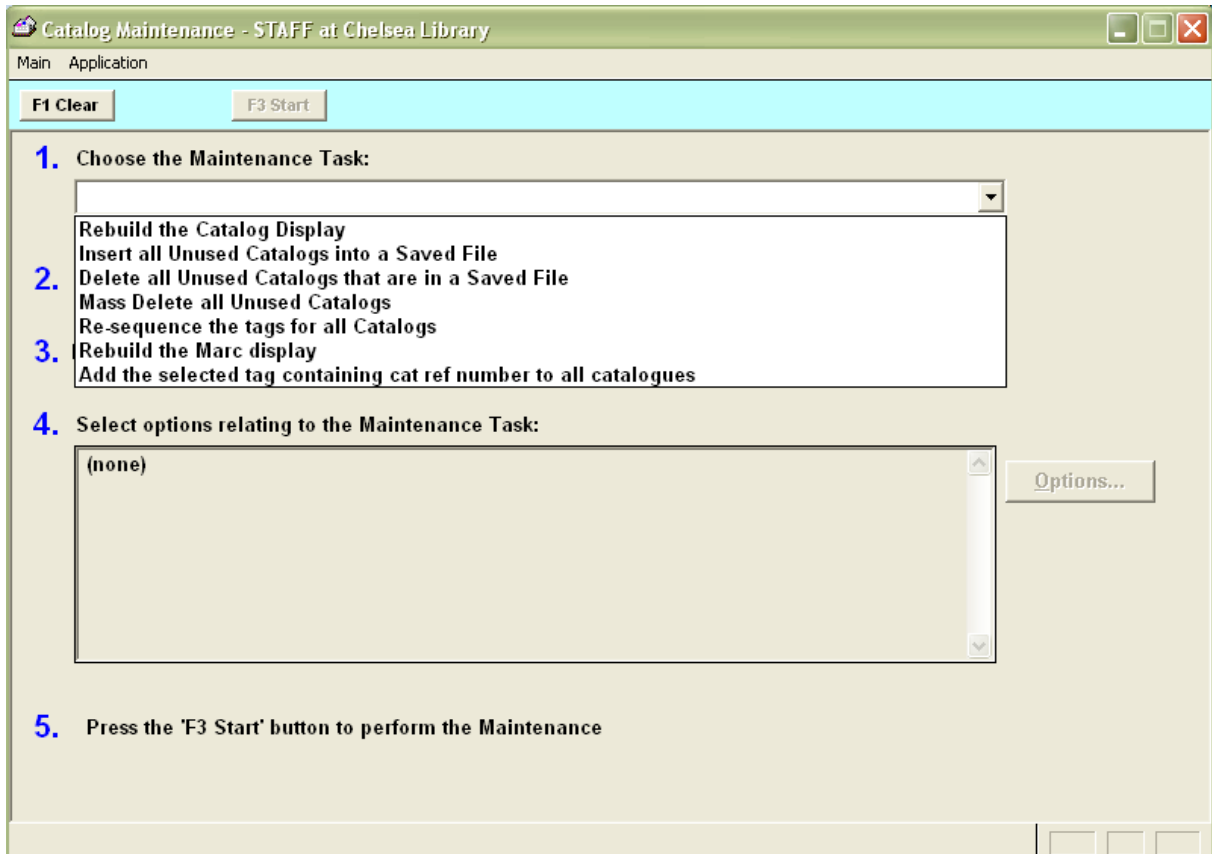

Catalogue Training

16. Click the **F9 Select** button

Catalogue Maintenance Facility

Catalog Maintenance is used for various tasks, including Mass Delete of Unused Catalogues.

1. Launch the *Amlib* client
2. Go to **Main > Catalogue > CatMaintenance** – the Catalog Maintenance screen will display:

Process each task in 5 steps:

1. Choose the Maintenance Task from the dropdown list
2. Insert Only consider catalogue records created before date (defaults to 1 year ago)
3. For Cat Ref insertion enter tag number here (if applicable – only for Task: **Add the selected tag containing cat ref number to all catalogues**)
4. Select Options relating to the Maintenance Task... using the **Options...** button
5. Click the **F3 Start** button to begin the process

OPTION	EXPLANATION	EXAMPLE
Rebuild the Catalog Display	If a catalogue parameter is altered for the Tags to be displayed in the brief Catalogue display at the top of the <u>Catalog</u> screen, this maintenance task will rebuild the display of all existing Catalogue records	If Line 4 changes from 099 082 to be 099 082 020 , the rebuild is needed to refresh existing items

Catalogue Training

	<p>Carey, Peter, 1943- Oscar and Lucinda Melbourne : Australian Large Print, 1989 LP CARE</p>	
Insert all Unused Catalogs into a Saved File	A file is created which contains all the Catalogue records that have no related Stockitem, Periodical or Order records. This enables the Catalogue records to be viewed before running the Mass Delete	File of Catalogues to be Deleted in the Mass Delete Maintenance Task
Delete Unused Catalogues that are in a Saved File	Only Catalogue records from a selected Saved File, and are not referenced by a Facility will be deleted without User Intervention.	A File has already been created that contains Catalogues to be mass deleted. Select this File when prompted
Mass Delete all Unused Catalogues (Purge)	All Catalogue records that are not referenced by a Stockitem, Periodical or Order records <i>will be deleted</i> without User intervention. If the Catalogue records are to be checked prior to running this, the Unused Catalogues can be inserted into a Saved File, using the first choice within this facility	Level of deletion of associated Authorities is set in Main > Supervisor > Installation > Catalogue tab – <u>Catalogue deletion level</u> parameter
Re-sequence the tags for all Catalogues	Refreshes the MARC display based on the <u>Default Catalogue Show Sequence</u> column on the <u>Marc Tags Within The System</u> screen (Main > Authorities > MarcTags)	Correct “Floating Tags” where the sequence has been corrupted. For example the Subject displays before ISBN
Rebuild MARC display	Refreshes the MARC display of Catalogue records based on the <u>Used in Marc Display (Y/N)</u> column on the <u>Tag Subfields</u> screen (Main > Authorities > MarcTags – F7 SubF). Can be Y or N .	If this column is changed this task must be performed for the changes to be seen when the catalogue record is displayed
Add the selected tag containing cat ref number to all catalogues	Add the Catalogue Reference Number to each Catalogue record. Mostly this will be used for adding the Catalogue Reference Number as the 035 Tag	Mainly used for integration with Libraries Australia batch deletion process – the need to export the 035 Tag to <i>Libraries Australia</i>

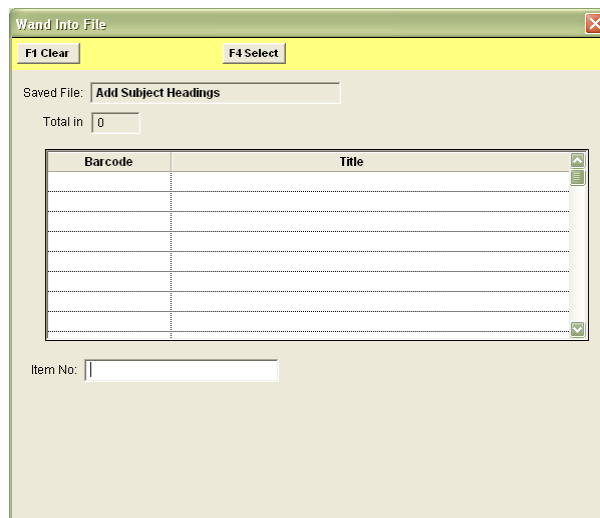

- See [Appendix 6: Catalogue Maintenance Tasks](#) for more information

Catalogue Training

Add an Authority to Catalogue Records in a File

It is possible to add an Authority – like a subject heading – to all the catalogue records in a file.

- 1: Create a **Saved File** of bibliographic records in the Catalogue module. One method to do this:
 - a) Launch the *Amlib* client
 - b) Open the Stockitem module
 - c) Select **File > WandIntoFile** – the Wand Into File screen will display
 - d) Click the **F4 Select** button – the Stockitem Saved Query Results screen will display
 - e) Highlight an existing file (or click the **F1 New** button to add a new file, name it and then click the **F3 Save** button) and click the **F9 Select** button
 - f) Saved File: = selected file (for example: **Add Subject Headings**)

- g) Scan all items
- h) Close out of Wand Into File screen when complete
- i) In Stockitem screen menu, select **File > DisplayFile** – the Stockitem Saved Query Results screen will display:

Details	Allow other operators to access this file (Y/N)	Qty	Last Updated	File No
Add Subject Headings	Y	0	01/12/2010 11:51:59 AM	3009
MassRenTest	Y	2	24/11/2010 4:51:35 PM	3008

- j) Highlight the saved file (for example: **Add Subject Headings**) and click the **F9 Select** button
- k) Highlight all the items in the table
- l) Select **XReference > Catalogue** – this will bring up the table in the Catalogue List screen
- m) Select **File > Save All** – the Catalogue Saved Query Results screen will display

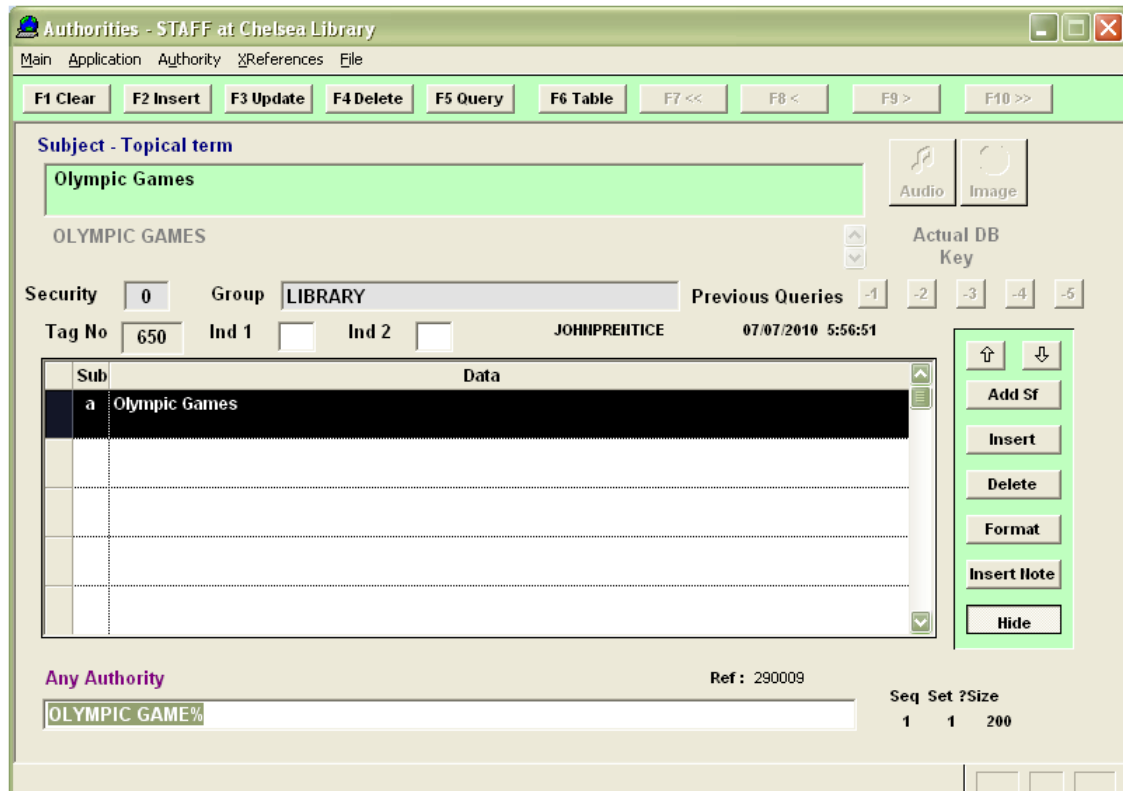

Catalogue Training

- n) Highlight an existing file (or click the **F1 New** button to add a new file, name it and then click the **F3 Save** button) and click the **F9 Select** button

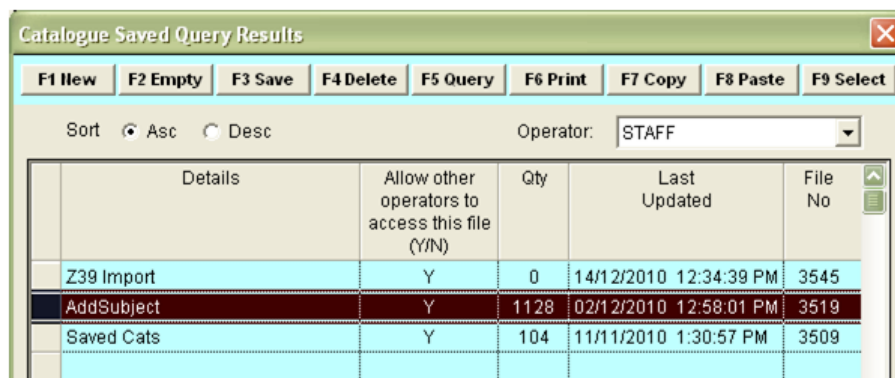

Ultimately, how you create the Catalogue File is really up to you.

- 2: Once you have the File, you then need to find the Authority to add. Go into the *Authorities* module, type in your search term and then click the **F5 Query** button
- 3: Select your term from the list

For example: you may want to add the subject **Olympic Games** to a number of bibliographic records (within the File).

- 4: Once the Authority is showing in the Authority module, select **File > AddToCatsInFile** – the Catalogue Saved Query Results screen will display
- 5: Highlight the relevant file in the Catalogue Saved Query Results list

Catalogue Training

- 6: Click the **F9 Select** button – a prompt with the following message will appear: **The tag has now been added..**

- 7: Click the **OK** button when complete

Remove from Cats in File

It is also possible to remove an authority, like a subject heading from a file of catalogue records in a similar way.

- 1: Find the Authority (for example: Subject) to remove
- 2: Once the Authority is displaying on the screen
- 3: Go to **File > RemoveFromCatsInFile** – the Catalogue Saved Query Results list will display:

Details	Allow other operators to access this file (Y/N)	Qty	Last Updated	File No
RemoveSubject	Y	1128	21/02/2011 11:59:59 AM	3519
CancerExport	N	6	21/02/2011 9:47:03 AM	3571
CLICKVIEW JP 15/6	N	15	21/02/2011 9:47:03 AM	3520
EXCH JP 20/01	N	2	21/02/2011 9:47:03 AM	3546
PER Issue Deletions	Y	4	16/02/2011 5:15:02 PM	3572
Z39 Import	Y	0	14/12/2010 12:34:39 PM	3545

- 4: Highlight the relevant file in the Catalogue Saved Query Results list and click the **F9 Select** button – a prompt with the following message will appear: **The Catalogues have been updated. You may wish to consider rebuilding the display for all catalogues at some time if you think the removed authority may have been used in a display field eg lines 1 to 4 of the catalogue .**

- 5: Click the **OK** button when complete

Catalogue Training

CATALOGUING URLS (UNIFORM RESOURCE LOCATORS)

The *SCISWeb* database now contains catalogue records for websites. Further details are at <http://www.curriculum.edu.au/scis/productinfo/sciswebsites.htm>. As these websites have either been reviewed by an agency such as CMIS Evaluation or the NSW *SCIS* team or are government sites containing useful information, the likelihood of them quickly disappearing into Cyberspace are less likely than merely creating links to sites yourself.

Authority Module

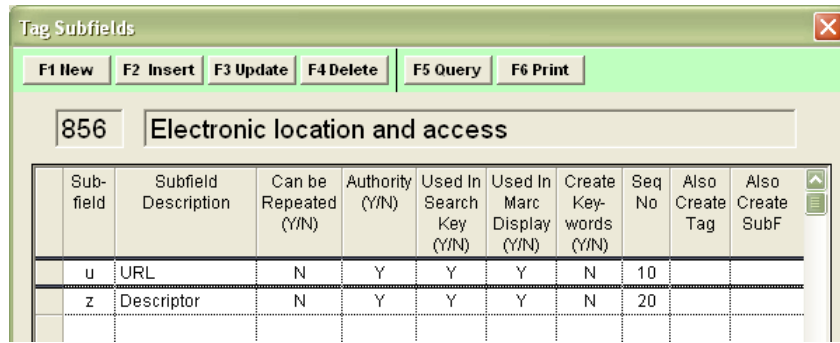

The URL tag has to be created in the Authority module, if it does not exist already. Once created it will be then available when creating catalogue items.

1. Launch the *Amlib* client
2. Go to **Main > Authorities > MarcTags** – the Marc Tags Within the System table will display:

Tag No	Tag Description	Defa Ind 1	Defa Ind 2	Can the Tag be Repeated in a Catalogue (Y/N)	Is the Tag an Authority that is only used in 1 Catalogue (Y/N)	Keyword Search Code	Default Catalogue Show Sequence	Allow Tag Xrefs with these comma sep list
785	Succeeding title entry			Y	N	T	78500	785
852	Brodart Holdings			Y	Y	H	85200	852
856	Electronic location and access			Y	N	N	85600	856
880	Alternative Graphic Representation (A			Y	Y		88000	880
900	Headline			N	N	R	90000	900
902	Unicode			Y	N		90200	902
905	Newspaper			N	N	R	90500	905
906	Newspaper Date			N	N		90600	906
907	Unicode			Y	N		90700	907
908	Article Keywords			Y	N	R	90800	908

920	Page No			N	N		92000	920
925	Newspaper Classification			N	N		92500	925

3. If no **856** Tag exists, then click the **F1 New** or **F2 Insert** button
4. Create a Tag with the following details:
 - a. Tag No = **856**
 - b. Tag Description = **Electronic location and access**
 - c. Can the tag be repeated in a Catalogue (Y/N) = **Y**
 - d. Is the Tag an Authority that is only used in 1 Catalogue (Y/N) = **N**
5. Click the **F3 Update** button to save the new tag
6. Highlight the new **856** field and click the **F7 SubF** button – the Tag Subfields table will display:

Catalogue Training

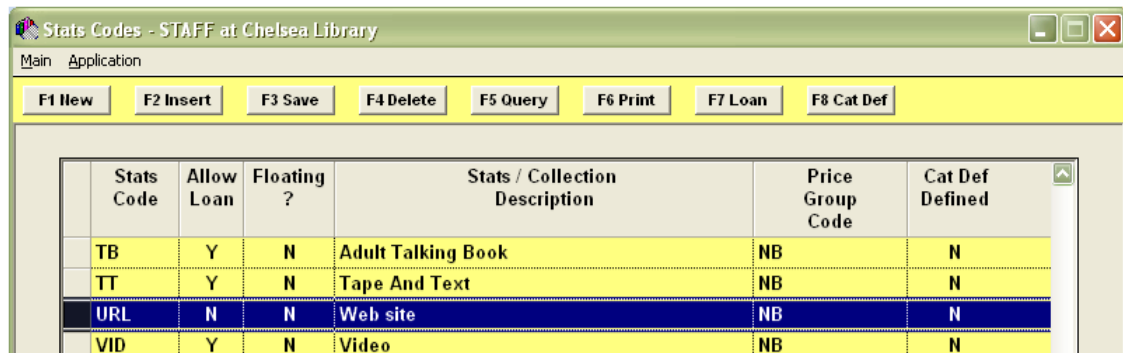

7. The tag should have 2 subfields set as follows:

Sub-field	Subfield Description	Can be Repeated (Y/N)	Authority (Y/N)	Used in Search Key (Y/N)	Used in Marc Display (Y/N)	Create Key-words (Y/N)	Seq No
u	URL	N	Y	Y	Y	N	10
z	Descriptor	N	Y	Y	Y	N	20

8. Click the **F3 Update** button when complete

Stockitem Module

1. Launch the *Amlib* client
2. Go to **Main > StockItems > StockitemStatsCodes** – the Stats Code table will display:
3. Click the **F1 New** or **F2 Insert** button to create a new entry
4. Set up a code with the following parameters:
 - Stats Code = **URL**
 - Allow Loan = **N**
 - Floating = **N**
 - Stats / Collection Description = **Web site**
 - Price Group Code = as per the other Stats codes on your list
5. Click the **F3 Save** button when complete

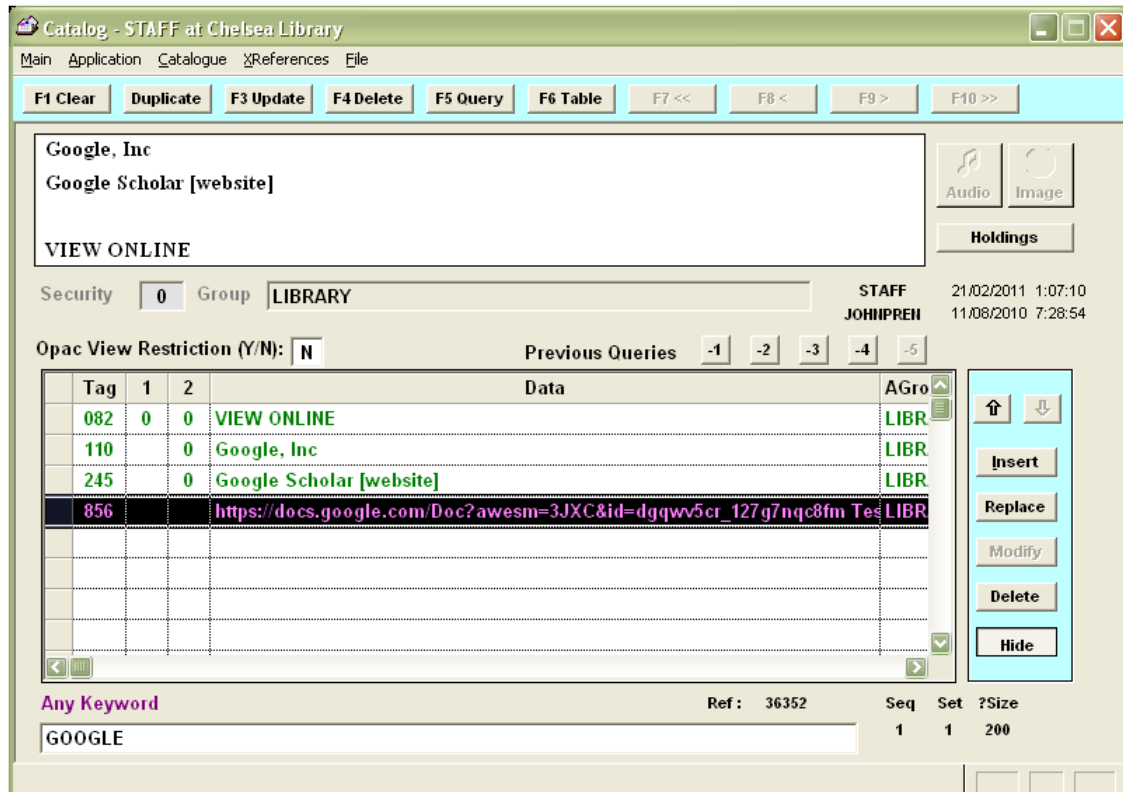

Please Note: You could set up a specific Stockitem Form code (for example: **WEB**) if you wish, or choose Computer Software if required.

Catalogue Training

Catalogue

If required, you could set up a Lead through set for URLs. Create the catalogue as desired e.g. using Worksheet, No Lead Thru etc., adding the URL into the **856** tag and adding the Title of the URL into the **245** tag.

HINT: You could type **website** in square brackets after the Title if you wish – for example: **Google Scholar [website]**

Even though a URL will never be circulated, it will be necessary to create a Stockitem so that the item will be seen in *NetOpacs*.

1. With record displayed in the Catalog screen, click the **Holdings** button – a prompt with the following message will display: **No Stockitems exist for the Catalogue. Do you wish to create a New Item?**
2. Click on the **Yes** button – a New Stockitem prompt will display with the following message: **Please choose a Form Type for the new Stockitem**
3. Choose **WEB** and click on the **OK** button – the main Stockitem screen will display and enter creation mode (the **F2 Insert** button will appear bolded) and a number of fields will be pre-populated
4. Complete the other fields as required – for example: St(at)s Code, Current Cost, Floor location, etc – to access a list of codes in a field enter **<Tab>**

For example: in the Sts (Stats) Code field, entering full stop (.) and pressing the **<Tab>** key will display a list of your Stats Codes and Descriptions – double-click on URL to select it

5. Leave the Item No field **blank**
6. Click on the **F2 Insert** button when complete – the following prompt will display: **Do you want the system to supply a barcode?**

Catalogue Training

- Click the **Yes** button – the following prompt will display: **The Item has been Inserted.**
- Click on the **OK** button when complete

The screenshot shows the 'Stockitem - STAFF at Chelsea Library' application window. The interface includes a menu bar (Main, Application, Item, References, File) and a toolbar with function keys (F1-F10). The main area displays item details for 'STOCK00370894B' with a 'Cat Ref No' of 36352. The title is 'Google Scholar [website]' and the authority is 'Google, Inc'. The call number is 'VIEW ONLINE'. The location is 'CHELSEA'. The item is marked as 'For Loan (Y/N) N' with a loan type of 'Opac? Y' and 'Alert N'. The received date is '21/02/2011' and the current cost is '0.00'. The group is 'LIBRARY'. At the bottom, there is a summary section with fields for 'ILL Library:', 'ILL Ren:', 'ILL Due:', 'ITEM TYPE: N', and 'MEMOS: 0'. A table at the bottom shows 'On Loan', 'Due', 'On Order', 'Res', 'Seq', 'Set', and '?Size' with values: 'Last Modified 21/02/2011 1:18:47 PM by STAFF', 'Issues 0', '0', '0', '200'.

Supervisor

- Launch the *Amlib* client
- Go to **Main > Supervisor > Supervisor** – the Locations table will display
- From the menu select **LibraryMenu > Opacs > OpacDisplayTags** – the Marc Tags Within the System: Tag Parameters for Opac Catalogue Display screen will display:

The screenshot shows the 'Marc Tags Within the System - STAFF at Chelsea Library' application window. The interface includes a menu bar (Main, LibraryMenu) and a toolbar with buttons (F1 New, Insert, Update, Delete, Query, FromAuth). The main area displays the title 'Tag Parameters for Opac Catalogue Display' and a table with the following data:

Tag No	Tag Description
740	Added entry - uncontrolled related/analy
780	Preceding title entry
785	Succeeding title entry
856	URL Link
880	Unicode Alternative Representation
900	Headline

- Ensure that Tag **856** is available
- If it isn't, click either the **F1 New** or **Insert** button to create a new entry with the following details:

Catalogue Training

- a. Tag No = 856
 - b. Tag Description = **URL Link**
6. Click the **Update** button to save any changes
 7. The *NetOpacs* Web Console or service manager will then need to be restarted

If a URL has been catalogued it will pop up in the *NetOpacs* screen and the user can just click on the hyperlink and get directly to the Website.

Please Note: Now that you have catalogued your URLs, they would need to be checked occasionally. To get a listing of the URLs on your database, in the main Stockitem screen, type the Form code: **URL** and select the **F5 Query** button

Documents

Links to documents can be catalogued in a similar way to URLs (see above).

1. Create a catalogue record with an **856 | URL** link to the document

The screenshot shows the 'Catalog - STAFF at Chelsea Library' application. The main window displays a record for 'Koala Factsheet' with tag 856. The record details include 'KOA FACT SHEET', 'Security 0', 'Group LIBRARY', and 'STAFF 21/02/2011 1:33:13'. A table of records is displayed with columns for Tag, 1, 2, Data, and AGro. The record with tag 856 is highlighted, showing the URL 'http://ourserver.com/School/Koala.htm Click here to access the record'. The table also shows records with tags 650, 082, and 245. The interface includes various buttons like 'F1 Clear', 'Duplicate', 'F3 Update', 'F4 Delete', 'F5 Query', 'F6 Table', 'F7 <<', 'F8 <', 'F9 >', 'F10 >>', 'Audio', 'Image', 'Holdings', 'Previous Queries', 'Opac View Restriction (Y/N): N', 'Any Keyword', 'Ref: 36449', 'Seq 1', 'Set 1', and '?Size 200'.

Tag	1	2	Data	AGro
650			Koalas.	LIBR
856			http://ourserver.com/School/Koala.htm Click here to access the record	LIBR
082			KOA FACT SHEET	LIBR
245	0		Koala Factsheet	LIBR

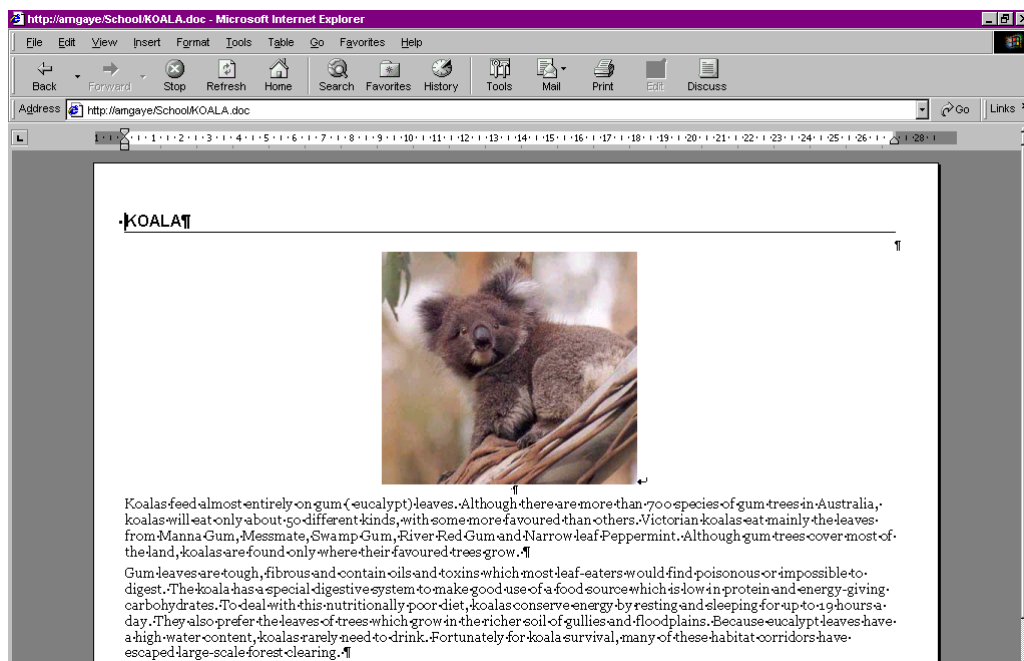

2. In the Search screen, the Catalogue display points to the path of the document (the source of the document would have to be on a folder that is Web-shared across the network)

The screenshot shows the 'amlib' website interface. At the top, there is a navigation bar with buttons for 'Main Menu', 'Title', 'Author', 'Subject', 'Keyword', 'Periodicals', 'Your Details', and 'New Items'. Below this is a 'Bibliographic Details' section. The record information is as follows:

pppp
Call Number [KOA FACT SHEET](#)
Title **Koala Factsheet**
Subject [Koalas](#)
URL Link [Click here to access the record](#)

3. On clicking the hyperlink, the document is displayed:

The screenshot shows a Microsoft Internet Explorer browser window displaying a document titled 'KOALAT'. The document contains a photograph of a koala and text describing its diet and habitat. The text is as follows:

KOALAT

Koalas feed almost entirely on gum (eucalypt) leaves. Although there are more than 700 species of gum trees in Australia, koalas will eat only about 50 different kinds, with some more favoured than others. Victorian koalas eat mainly the leaves from Manna Gum, Messmate, Swamp Gum, River Red Gum and Narrow-leaf Peppermint. Although gum trees cover most of the land, koalas are found only where their favoured trees grow.

Gum leaves are tough, fibrous and contain oils and toxins which most leaf-eaters would find poisonous or impossible to digest. The koala has a special digestive system to make good use of a food source which is low in protein and energy-giving carbohydrates. To deal with this nutritionally poor diet, koalas conserve energy by resting and sleeping for up to 19 hours a day. They also prefer the leaves of trees which grow in the richer soil of gullies and floodplains. Because eucalypt leaves have a high water content, koalas rarely need to drink. Fortunately for koala survival, many of these habitat corridors have escaped large-scale forest clearing.

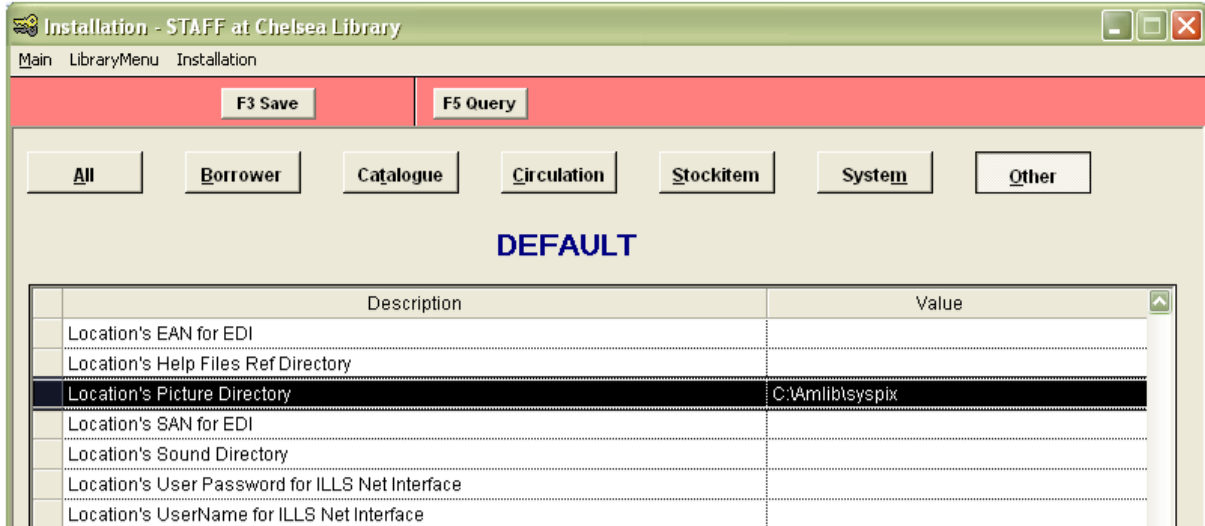

4. With the documents, it would still be an HTTP file, and the path would be <http://servername>

Please Note: We suggest that the documents to be viewed are saved to the *NetOpacs* server, as then it doesn't have to break through firewalls, etc. to get to view the document. In the **NetOpacs** folder there is an **amlibweb** folder - you could create a new folder in there called **docs** or similar. The path then would be <http://servername/amlibweb/docs/koala.htm> or whatever you saved it as. It is quite easy in Word to save as an htm file. You may have to get special permissions on the Network to save to that directory (for example: **amlibweb**) - if you save it to the **C:** drive, if someone else is looking for the document, the computer will be searching on the **C:** drive of their particular machine. It needs to be a path that everyone can see.

Catalogue Training

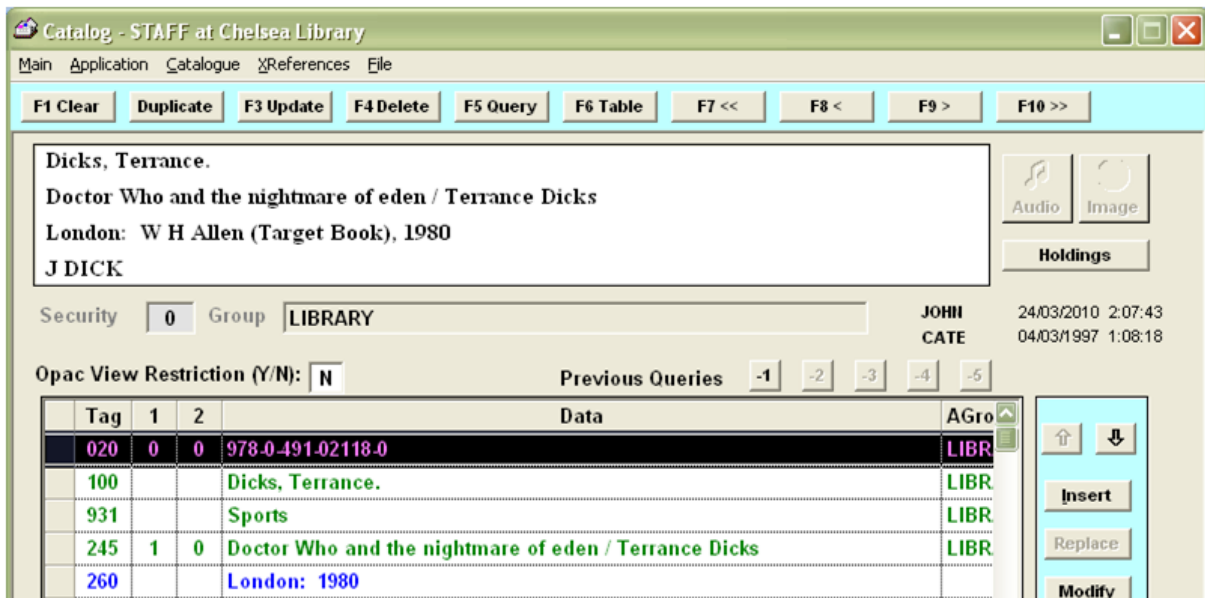

IMAGES

Images can be attached to Catalogue records for Local History, Art Collections, School Archives, Current events etc. You will need to check that the Location's Picture Directory exists as a path in **Main > Supervisor > Installation – Other** tab (also configurable by individual Location). This would need to be a shared folder which could be seen by both the *Amlib* clients and the *NetOpacs*.

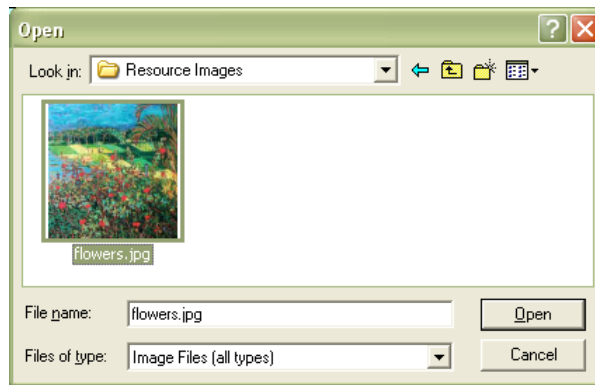

JPEGs would be best for ease of use, simplicity, and the fact that they could be viewed without needing viewing software.

1. Launch the *Amlib* client
2. Go to **Main > Catalogue > Catalogue** – the Catalog screen will display
3. Initiate a **F5 Query** search to locate the record to which you wish to attach an image

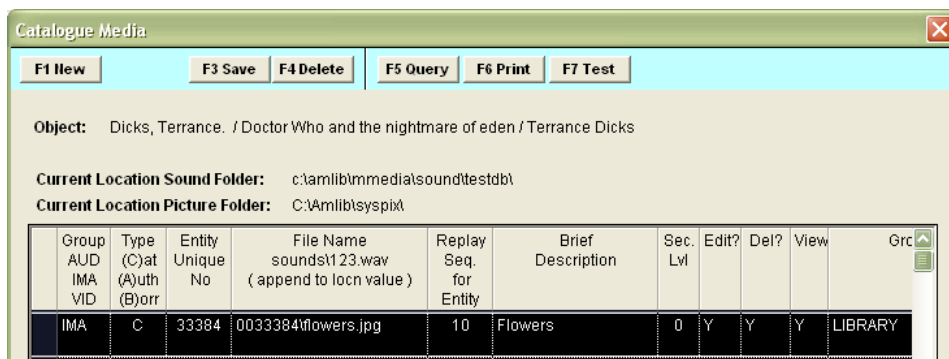

4. From the menu, select **Catalogue > Picture Sounds** – the Catalogue Media screen will display
5. Click the **F1 New** button – and navigate to the source of the image

Catalogue Training

6. Select the image (for example: **flowers.jpg**) and click the **Open** button
7. Enter the following details:
 - a. Brief Description
 - b. Replay Seq. for Entity – for example: **10** (if there are multiple images attached to a single Catalogue record, should be sequenced: **10, 20, 30**, etc)

8. Click the **F3 Save** button when complete
9. Select the **F7 Test** button to preview the image

- The **Image** button in the Catalog screen will be active if there is an image associated with the Catalogue record

- The image can be viewed in *NetOpacs* or *OPACS* if set up correctly

Catalogue Training

SECTION 6: REPORTS

Catalogue Module

1. Launch the *Amlib* client
2. Go to **Main > Catalogue > Catalogue**– the Catalog screen will display
3. Initiate a **F5 Query** search – the results will display in the Catalogue List screen:

Seq	AUTHOR / Title / Publisher	Oper	LastUpdate
1	SCHAFFER, ELIZABETH D., 1965- Exploring Harry Potter / by Elizabeth D. Schafer. Osprey, FL :: c2000. 823.914	TREVOR	9/01/2004 1
2	ROWLING, J.K. Harry Potter and the Chamber of Secrets / by J.K. Rowling ; illustrations by Mary GrandPré. New York :: Arthur A. Levine Books,, 1999. 978-0-439-06486-6 (hardcover)	STAFF	19/02/2011
3	ROWLING, J.K. Harry Potter and the Chamber of Secrets / by J.K. Rowling ; illustrations by Mary GrandPré. New York :: Arthur A. Levine Books,, 1999. 978-0-439-06486-6 (hardcover)	STAFF	19/02/2011

4. From the menu, select **Table > Report** – the list will display in print view:

AUTHOR / Title / Publisher	Oper	LastUpdate
A bird's eye view [videorecording] : the kookaburras the magpies. Seaforth, N.S.W : Roger Whittaker Films, 1989. J598 892 bir	STAFF	14-05-99
JENNINGS, PAUL. A new book 1999 F JEN	STAFF	20-09-99

You are able to use the list to create a Stockitem report:

1. Highlight the Catalogue items
2. From the menu, select **XReferences > StockItems** – the results will display in a Stockitem List

&VIDCOV.QRP	Video Cover	Fixed layout Reports

Where Search

1. Select the report from the list and click on the **F7 Where** button – the Reports – Where screen will open
2. There are three unique parameters:
 - **Auth Tag:** Search for a particular MARC tag
 - **Auth Key:** Check for particular data contained in the MARC tag
 - **Tags to Display:** MARC tags to display in report
3. The statement can include the following settings:
 - a. Auth Tag – for example: **Auth Tag = 245** (Title)
 - b. Auth Key – for example: **Auth Key LIKE Harry Potter** (looks for all matching items where the Title BEGINS with **Harry Potter**)
 - c. Tags to Display – for example: **Tags to Display IN 100, 245** (will display Author and Title in report)
 - d. (Optional) Enter a start date: **Date >=** enter a date in DD/MM/YYYY format – for example: **01/01/2010**
 - e. (Optional) Enter a finish date: **Date <=** enter a date in DD/MM/YYYY format – for example: **10/10/2010** (a finish date is optional – if not inserted, the report will go up to the current date).
 - f. You may also want to limit by **Catalogue Number(s)**
4. Click the **F3 Save** button when complete
 - **&BIBFULL.QRP** – Displays the Tag Numbers for each Tag

MUSIC		28/10/02
<i>1890-1920 [music] : 75 songs arranged for voice, piano, guitar.</i>	B/FAL Fältskog, Agnetha. <i>As I am : ABBA before & beyond / Agnetha Fältskog with Brita Åhman.</i> The blonde from ABBA comes out of her Swedish secluded life to tell her story. Did she really dislike Frida? Fältskog, Agnetha.	
782.1 THR <i>The 3 tenors, Paris 1998 [videorecording] : Carreras, Domingo, Pavarotti, Levine / produced and directed by Tibor Rudas.</i> Live recording of the concert held at Champs de Mars, Eiffel Tower, Paris on July 10, 1998.	782.42166 AUS <i>Australia now! [videorecording] / New South Wales Film Corporation presents ; a South Pacific & C.B. Films production ; producer, Pom Oliver ; director, Peter Clifton.</i>	
<i>Albert's mammoth folio [music] / compiled and edited by Henry Adler. no. 10. [South of the border favourites : words, chords, music].</i>		

Sorting of these Bibliographic reports is different to normal reports. The Tag that you wish to sort by is set in the Where Parameters – for example: **245 | Title** and the Order is set to be Order Key. Once this is set, you must remember to say Yes to the File message when it comes up as it will no longer list the Files once the Tag is set as one of the Where parameters.

Fixed Layout Reports

The **F10 More** function is used for mapping data to fields in Fixed Layout reports – for example: the DVD Cover template (**&DVDCOV.QRP**).

Each row of this table may be used to collect 1 of the 20 fields on the report template. These first 20 fields contain Tag or Subfield data (**Fields 1-20**), and the next 20 fields (**Fields 1A – 20A**) contain the associated Tag Descriptions (Go to **Main > Authorities > MarcTags** to see a complete list of Tag Nos and Tag Descriptions). The report outputs all the MARC data to the report. The inclusion of **Fields 1A – 20A** in the report is optional.

APPENDICES

Appendix 1: 10 Digit and 13 Digit ISBN Formats

Amlib will search both 10 and 13-digit ISBN formats:

1. Launch the *Amlib* client
2. Go to **Main > Catalogue > Catalogue**– the Catalog screen will display
3. Type in a 10-digit ISBN and the 13-digit ISBN – separated with a / - for example:
0747538484/9780747538486
4. Click the **F5 Query** button – any matching record will then be displayed:

5. Double-click the **020 | ISBN** field to display of the 10-digit version of a 13-digit ISBN:

- Starting with the ISBN-10: 1-844137-94-5
- Eliminate the check digit: 1-844137-94
- Add the prefix 978: 978-1-844137-94
- Calculate a new check digit to get the ISBN-13: 978-1-844137-945

Both ISBNs: **978-0-7475-3848-6** and **0-747538-48-4** represent the same Bibliographic record.

Appendix 2: USMARC

MARC is an acronym for **MA**chine **R**eadable **C**atalogue. USMARC was developed by *the Library of Congress* and was formerly named LC MARC.

Amlib uses USMARC because:

- It is now the international standard for cataloguing
- Each record is written in a format that can easily be read, retrieved and manipulated by a computer
- As the data contains consistent “signposts”, computers can read and interpret records so that the Bibliographic data can be inserted correctly into any software in any country of the World. That is, the “signposts” are written for machines, not for people so there is no problem with different languages, etc.
- Using this standard enables better sharing of data between libraries and compatibility with outside agencies – for example: *ABN, SL of WA, SCIS*
- The format is compact, taking less storage space to hold data than a text-based system

```

- First 24 positions, *ending with 4500.*: Leader
- Tag directories: 12 characters long
- Each Tag directory composed as follows: Tag No –for example: **100**, length of field – for example: *0023*, starting point of this field – for example: 00110
- Each Marc record can consist of “signposts” that Tags, Indicators and Subfields. The Tag, Indicator and Subfield makes up each Field of the Marc record.

Tags

Each data field is identified by a 3-digit number.

Catalogue Training

In *Amlib* the Tag is often associated with a Description – for example: Tag 245 is always Title and Tag 260 is always Publisher.

Tag “Families”

TAG	DESCRIPTION
000s	Control fields, number & codes
100s	Main entries – usually author
200s	Title and Title related fields
300s	Physical description
400s	Series related fields
500s	Notes
600s	Subject related fields
700s	Added entries – other than Subject or Series
800s	Series added entries
900s	Locally defined entries. For example holdings information (often used in conversions)

Even though there are hundreds of MARC Tags, only 10% are used commonly

Indicators

Each indicator is identified by a number between **0** to **9** (letters can be used but are not common). The numbers often are an indication as to how to “treat” text or categorise a tag.

For example: the 2nd indicator for title indicates the number of non-filing characters to ignore, including spaces. In the **245** tag below, the 2nd indicator shows **4**, to ignore **The_** so that filing begins with the letter **Q** in **Quasar**. Usually *Amlib* sorts out the filing of these characters for us – we do not usually have to enter data in these columns when manually entering items.

The first indicator in the **600 | Subject – Personal Name** entry indicates the type of entry (for example: **1** Surname, **3** Family name). Therefore, most would have a **1** as the first indicator.

Catalogue Training

Parallel Content

The **100s**, **400s**, **600s**, **700s** and **800** tags usually follow the following numbering to maintain consistency.

TAG	DESCRIPTION
X00	Personal Names
X10s	Corporate Names
X11	Meeting Names
X30	Uniform Titles
X40	Bibliographic titles
X50	Topical Terms
X51	Geographic names

Therefore **610** would be **Subject Heading**, **Corporate name** and **110** would be **Author**, **Corporate name**.

Subfields

A lower case letter or occasionally a number identifies each Subfield. In general, if you are using a tag, it **MUST** contain a Subfield **a**. Publication and URL data is an exception to this rule.

The MARC Tags used by *Amlib* can be accessed via:

1. Launch the *Amlib* client
2. Go to **Menu > Authorities > MarcTags** – the Marc Tags Within the System table will display:

Tag No	Tag Description	Defa Ind 1	Defa Ind 2	Can the Tag be Repeated in a Catalogue (Y/N)	Is the Tag an Authority that is only used in 1 Catalogue (Y/N)	Keyword Search Code	Default Catalogue Show Sequence	Allow Tag Xrefs with these comma sep list
100	Author - Personal name		0	N	N	A	10000	100
110	Author - Corporate name		0	N	N	A	11000	110
111	Author - Meeting/Conference name		0	N	N	A	11100	111
130	Main Entry - Uniform Title		0	N	N	T	13000	130
240	Uniform title		0	N	N	T	24000	240
243	Collective Uniform Title			N	N	T	24300	243
245	Title statement		0	N	Y	T	24500	245
246	Varying Title		0	N	N	T	24600	246
247	Former title			Y	N	T	24700	247
250	Edition statement			N	N	T	25000	250
260	Publisher (Imprint)			N	N	P	26000	260
300	Physical description			N	N	F	30000	300

Catalogue Training

- Each Subfield can be checked by highlighting the Tag, and selecting the **F7 SubF** button – the Tag Subfields table will display:

The screenshot shows a window titled 'Tag Subfields' with a search box containing '260' and 'Publisher (Imprint)'. Below the search box is a table with the following columns: Sub-field, Subfield Description, Can be Repeated (Y/N), Authority (Y/N), Used In Search Key (Y/N), Used In Marc Display (Y/N), Create Key-words (Y/N), Seq No, Also Create Tag, and Also Create SubF.

Sub-field	Subfield Description	Can be Repeated (Y/N)	Authority (Y/N)	Used In Search Key (Y/N)	Used In Marc Display (Y/N)	Create Key-words (Y/N)	Seq No	Also Create Tag	Also Create SubF
a	Place of publication	Y	Y	Y	Y	Y	10		
b	Name of publisher	Y	Y	Y	Y	Y	20		
c	Date of publication	Y	N	Y	Y	Y	30		

Appendix 3: Cross References (See and See Also)

Patrons are guided to alternative headings. The ability to put *See* and *See Also* references into the system is useful for library operators (for example: **Roller Blading** *see* **Inline Skating**) as it enhances search possibilities. Nothing found when searching **Shares** or **Stock Market**? (Preferred terms are **Stocks** and **Stock Exchange**). Nothing found when searching **Renovations**? (Preferred term is **Interior Decoration**). **Tidal Waves** found 6 entries, **Tsunamis** found more than 30. Should have **Tidal Waves** *see also* **Tsunamis** to link the two headings.

- Launch the *Amlib* client
- Go to **Menu > Authorities > MarcTags** – the Marc Tags Within the System table will display
- Search for and select an Authority using the **F5 Search** button
- From the menu, select **Authority > See & See Also** – the See & See Also screen will display:

The screenshot shows a window titled 'See & See Also' with a search box containing 'Animals.'. Below the search box is a table with the following columns: Cross References, 2-Way, Operator, and Cat.

Cross References	2-Way	Operator	Cat
Animals.	N/A	JOHNPRENTICE	1
NT: Birds.	Yes	STAFF	0

Below the table are buttons: Add BT, Add NT, Add RT, Add UF, 2 Way, Add USE, and Delete.

Below the buttons is a 'Browse List' table with the following columns: USE, SA, Cat, and Tag.

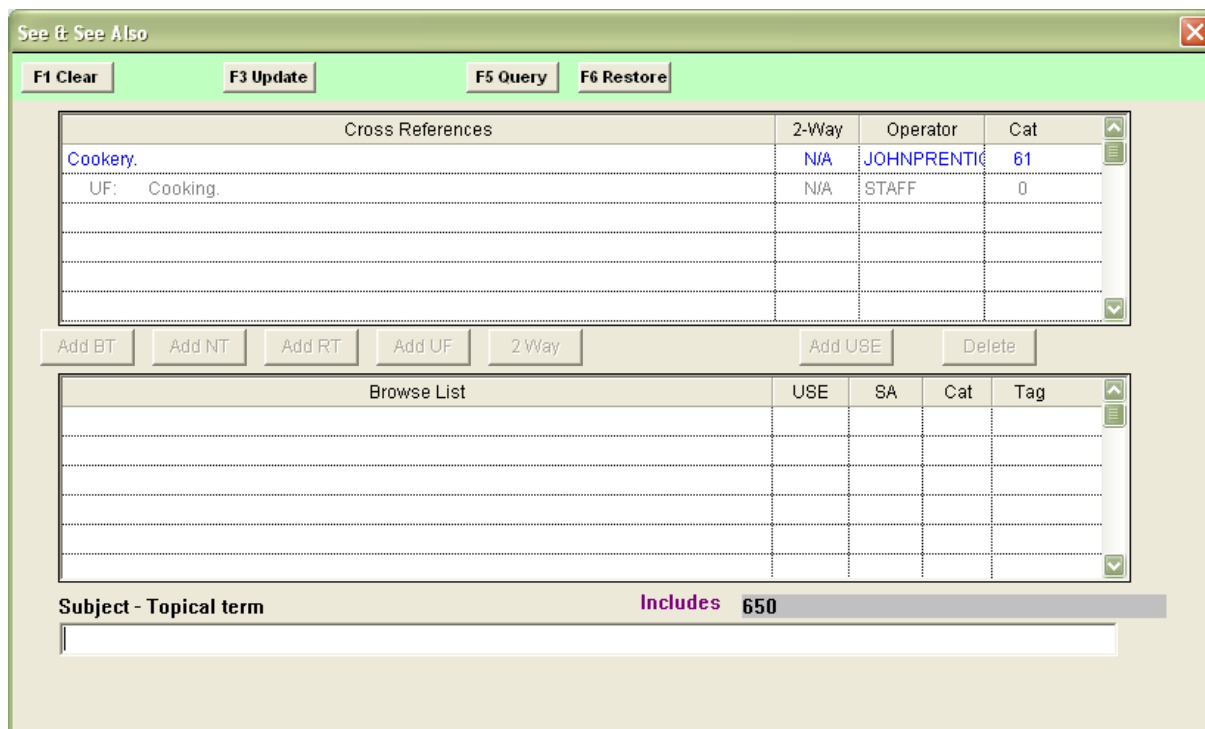

USE	SA	Cat	Tag
No	No	0	650
No	No	1	650
No	No	1	650

At the bottom, there is a 'Subject - Topical term' field containing 'BIRDS' and a status bar showing 'Includes 650'.

Catalogue Training

SEE ALSO	SEEN BY	SEE
BT (Broader Term), NT (Narrower Term), RT (Related Term)	<i>Use For</i>	<i>Use</i>

Allows reference to other related headings (from a preferred headings to other preferred, related headings). An Authority can have many *See Also* references.

When searching for a commonly used term (for example: **Cooking**) the *NetOpacs* user will be given a result instead of a message that there are no items found for that term.

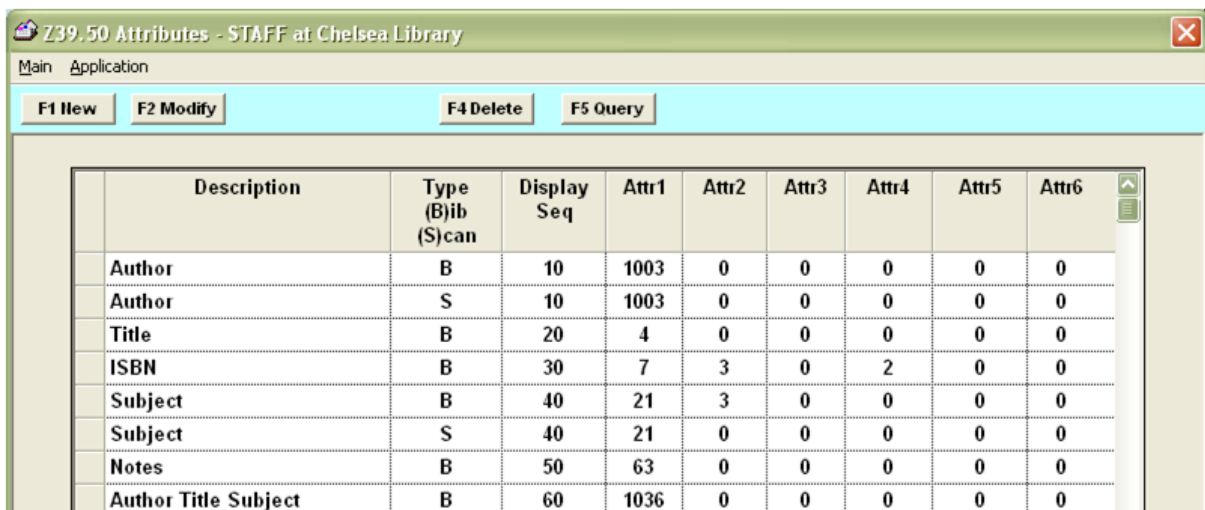

Catalogue Training

Appendix 4: Z39.50 Searching - Settings and Parameters

CatZAttributes

Attributes create the sequence of display of the records returned. Bib searches return MARC records, Scan searches return Authorities. Scan searches are not currently supported in Amlib. Attr1 concerns the Use attributes and should be set up as displayed here.

1. Launch the *Amlib* client
2. Go to **Menu > Catalogue > CatZSearch** – the Z39.50 Search screen will display
3. From the menu, select **Application > CatZAttributes** – the Z39.50 Attributes screen will display:

Description	Type (B)ib (S)can	Display Seq	Attr1	Attr2	Attr3	Attr4	Attr5	Attr6
Author	B	10	1003	0	0	0	0	0
Author	S	10	1003	0	0	0	0	0
Title	B	20	4	0	0	0	0	0
ISBN	B	30	7	3	0	2	0	0
Subject	B	40	21	3	0	0	0	0
Subject	S	40	21	0	0	0	0	0
Notes	B	50	63	0	0	0	0	0
Author Title Subject	B	60	1036	0	0	0	0	0

FIELD	EXPLANATION			EXAMPLE
Description	User defined description of the search			Author
Type (B)ib (S)can	B	Biblio	Returns Bibliographic records (Catalogue details)	Returns all the Bibliographic records associated with the Author search term (e.g. Catalogue records by Jennings)
	S	Scan	Returns Authority records	Returns all the Authority records associated with the Author search term (For example: Authors with the surname of Jennings)
Display Seq	Sequence : Sets the order in which the 4 default search will display in CatZSearch			Author search first as it has the lowest Sequence number
Attr(tribute) Sets	Six sets which determine the Search option functions			See below for details of the Search Attributes and Values

Catalogue Training

- To enter a parameter, click the **F1 New** button – the Attributes screen will display:

- Type in the Attributes and the Servers to apply to details
- Click the **OK** button when complete

CatZServers

Servers are the Libraries or databases you wish to search.

- Launch the *Amlib* client
- Go to **Menu > Catalogue > CatZSearch** – the Z39.50 Search screen will display
- From the menu, select **Application > CatZServers** – the Z39.50 Servers table will display:

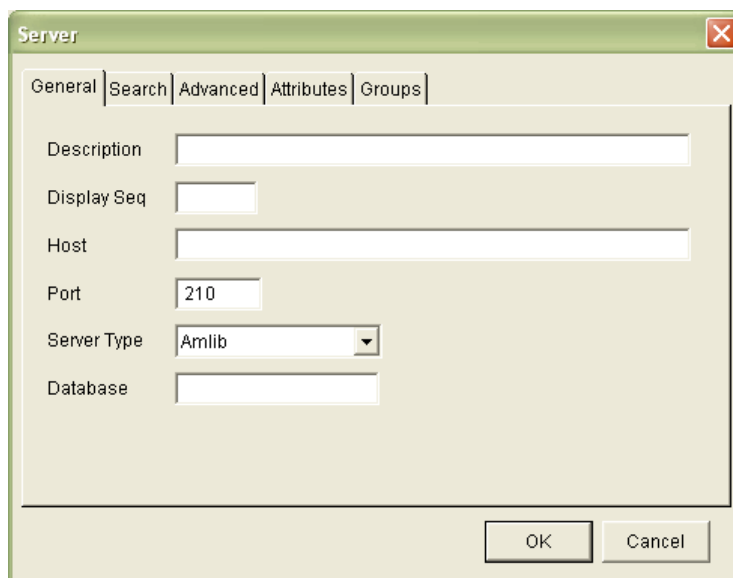

Description	Display Seq	Host	Port	Database	Display

Display		

4. To enter a parameter, click the **F1 New** button – the Server screen will appear:

5. Enter details

6. Click the **OK** button when complete

A list of accessible Z39.50 target databases in Australia can be found at the following link from the *National Library*:

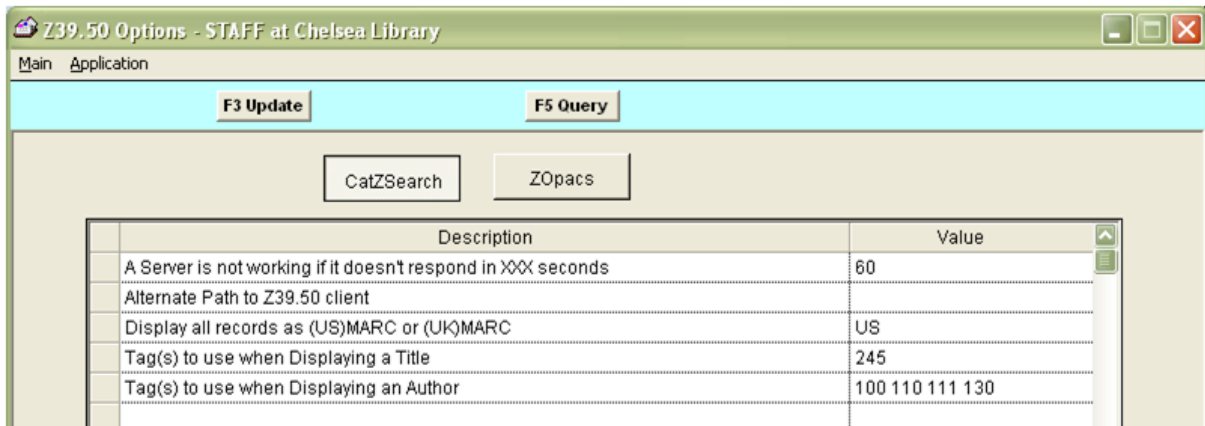

- <http://www.nla.gov.au/libraries/z3950/z3950list.html>

Catalogue Training

CatZOptions

Some options can be configured individually for each site using Z39.50 Catalogue or Opac searches, according to requirements.

1. Launch the *Amlib* client
2. Go to **Menu > Catalogue > CatZSearch** – the Z39.50 Search screen will display
3. From the menu, select **Application > CatZOptions** – the Z39.50 Optionstable will display:

DESCRIPTION	EXPLANATION	VALUE
A server is not working if it does respond in XXX seconds	Can be any amount of time you want to wait.	60
Alternate path to Z39.50 client	Is not currently used	
Tag(s) to use when Displaying a Title	Can be as many Tags as you like.	245
Tag(s) to use when Displaying an Author	Can be as many Tags as you like.	100,110
Registration Key	Is not currently used	
Display all records as (US)MARC or (UK)MARC	Display MARC records in US or UK version.	US

CatZGroups

The Servers being searched can be grouped together so that parallel searches are performed across multiple databases.

1. Launch the *Amlib* client
2. Go to **Menu > Catalogue > CatZSearch** – the Z39.50 Search screen will display

Catalogue Training

- From the menu, select **Application > CatZGroups**– the Z39.50 Server Groups table will display:

Description	Type (B)ib (S)can	Display Seq	Number of Servers
My Favourite Libraries	B	10	3
State and National Libraries	B	20	5
Subscription Databases	B	30	4
University Libraries	B	40	3
Public Libraries	B	50	6

- To enter a parameter, click the **F1 New** button – the Groups screen will display:

<input checked="" type="checkbox"/> Hurstville Public Library	N

OK Cancel

- Select the Servers to be used for this Group
- Click the **OK** button when complete

Catalogue Training

Appendix 5: MARC Tag Subfields & Punctuation

To understand MARC tag subfields you need to consider that most MARC tags (or fields) contain several related pieces of data. Each piece of data within the field is called a **subfield**, and each subfield is identified by a subfield code.

For example: the **245** MARC tag is used for the Title Statement and commonly contains the following three subfields (there are in fact many more):

- **\$a** for the title proper
- **\$b** for the remainder of the title (for example: subtitles)
- **\$c** for the statement of responsibility

The **\$** combined with a letter is called a delimiter (for example: **\$a**). Each of the subfields has its own delimiter, which designates the beginning of that subfield. Subfields end either with another delimiter for the next subfield or the "end of field" mark. This mark tells the computer where to end the variable field.

A MARC tag also contains 2 **indicators** just after the tag number. The two indicators contain values which interpret or supplement the data found in the tag. In the **245** tag, the **first** indicator is used to denote whether a title added entry is made (where no author main entry is present). The **second** indicator specifies the number of character positions associated with a definite or indefinite article (for example: **Le, An**) at the beginning of a title that are disregarded in sorting and filing processes.

- **245 14\$a**The people of Perth : **\$b**a social history of Western Australia's capital city.

Punctuation

Whilst it is possible to have the *Amlib* system automatically create the required punctuation for the various tags whilst cataloguing (see [Authorities – Punctuation](#)) this can lead to issues with regard to importing MARC records. As a result, you might like to adjust the Subfield headings that appear in the Cataloguing Worksheet to indicate the necessary punctuation to be manually inserted.

1. Launch the *Amlib* client
2. Go to **Menu > Authorities > MarcTags** – the Marc Tags Within the System screen will display:

Tag No	Tag Description	Defa Ind 1	Defa Ind 2	Can the Tag be Repeated in a Catalogue (Y/N)	Is the Tag an Authority that is only used in 1 Catalogue (Y/N)	Keyword Search Code	Default Catalogue Show Sequence	Allow Tag Xrefs with these comma sep list
245	Title statement		0	N	Y	T	24500	245
246	Varying Title		0	N	N	T	24600	246
247	Former title			Y	N	T	24700	247
250	Edition statement			N	N	T	25000	250
260	Publisher (Imprint)			N	N	P	26000	260
300	Physical description			N	N	F	30000	300

3. In the list, select the Tag to be modified (for example: **260 – Publisher (Imprint)**), and click the **F7 SubF** button – the Tag Subfields screen will display:

Catalogue Training

Sub-field	Subfield Description	Can be Repeated (Y/N)	Authority (Y/N)	Used In Search Key (Y/N)	Used In Marc Display (Y/N)	Create Key-words (Y/N)	Seq No	Also Create Tag
<input checked="" type="checkbox"/>	a	Place of publication :	Y	Y	Y	Y	10	
<input checked="" type="checkbox"/>	b	Name of publisher ,	Y	Y	Y	Y	20	
<input checked="" type="checkbox"/>	c	Date of publication.	Y	N	Y	Y	30	

4. In the Subfield Description field, adjust the text to indicate the necessary punctuation – for example: **Place of Publication :**
5. Click the **F3 Update** button when complete
6. Close the *Authorities* module for the changes to be visible in the Catalogue Worksheet

Appendix 6: Catalogue Maintenance Tasks

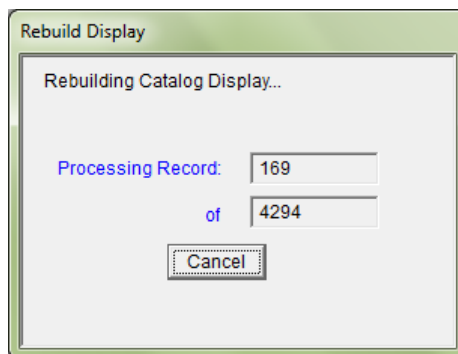

1. Launch the *Amlib* client
2. Go to **Main > Catalogue > CatMaintenance** – the Catalog Maintenance screen will display

Rebuild the Catalogue Display

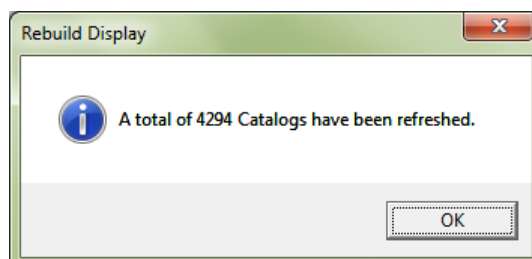

- If the Tag Numbers are altered for the 4 lines of the brief Catalog screen display (**Main > Catalogue > CatDisplayTags**), the rebuild will refresh all existing Catalogue records to the new settings

Carey, Peter, 1943- Oscar and Lucinda Melbourne : Australian Large Print, 1989 LP CARE

1. Choose the Maintenance Task: **Rebuild the Catalog Display**
2. Only consider catalogue records created before: Enter the date to which this process will apply (defaults to a year ago): enter today's date if the rebuild is to apply to all Catalogue records
3. Leave For cat ref insertion enter tag number here field blank
4. There are no Select Options relating to the Maintenance Task options so the **Options...** button will be *greyed* out
5. Click the **F3 Start** button to begin the process – a Rebuild Display prompt will display:

6. Once the process is completed a prompt will display how many catalogue records were refreshed: **A total of XXXX Catalogs have been refreshed.**

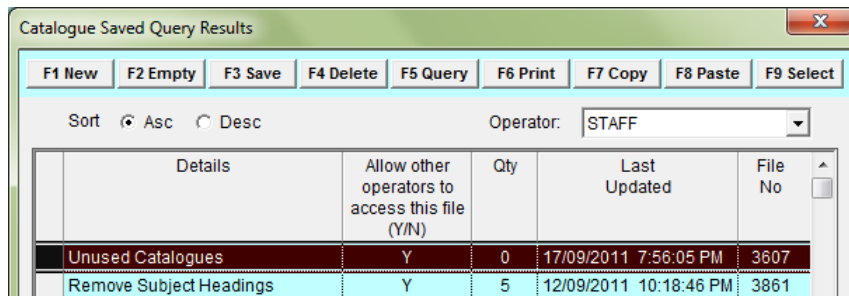

7. Click the **OK** button

Catalogue Training

Insert all Unused Catalogs into a Saved File

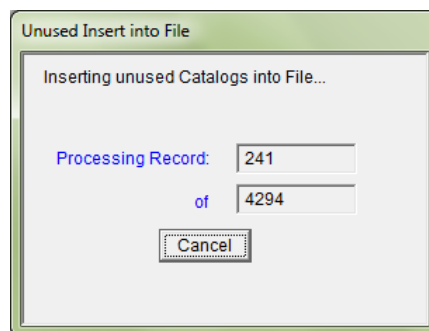

Inserts all the Catalogue records that have no related Stockitem, Periodical or Order records into a Saved File. This enables the Catalogue records to be viewed before deleting. Further processing can be done using the [Delete all Unused Catalogues that are in a Saved File](#) if required.

1. Choose the Maintenance Task: Insert all Unused Catalogs into a Saved File
2. Only consider catalogue records created before: Enter the date to which this process will apply (defaults to a year ago): enter today's date if the insertion is to apply to all Catalogue records
3. Leave For cat ref insertion enter tag number here field blank
4. Click the **Options...** button – the Catalogue Saved Query Results screen will display:

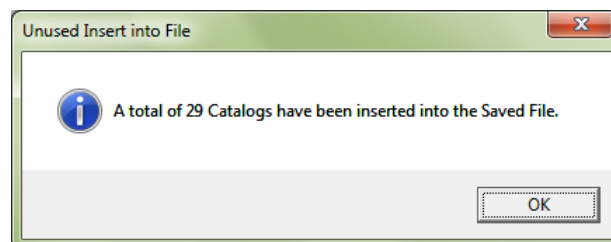

Details	Allow other operators to access this file (Y/N)	Qty	Last Updated	File No
Unused Catalogues	Y	0	17/09/2011 7:56:05 PM	3607
Remove Subject Headings	Y	5	12/09/2011 10:18:46 PM	3861

5. Highlight a file (or click **F1 New** to create a new file, enter the Details description and click the **F3 Save** button) and click the **F9 Select** button
6. Click the **F3 Start** button to begin the process – a Unused Insert into File prompt will display:

7. Once the process is completed a prompt will display how many catalogue records were inserted into the Saved File: **A total of XXXX Catalogs have been inserted into the Saved File.**

8. Click the **OK** button

Catalogue Training

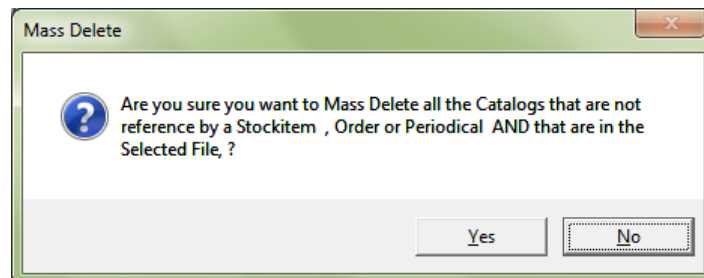

Delete all unused Catalogues that are in a Saved File

Delete the Catalogue records that are not referenced by a Stockitem, Order or Periodical record **from a selected File**.

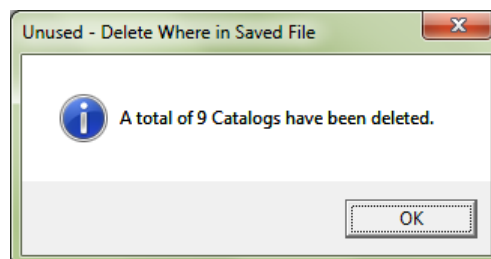

When catalogues are deleted, all the Non-Authorities are automatically deleted.

These Authorities will be deleted based on the Level set in **Main > Supervisor > Installation – Catalogue** tab – Catalogue deletion level (1-4) (1=least severe, ..., 4=most severe) parameter.

1. Choose the Maintenance Task: Delete Unused Catalogs that are in a Saved File
2. Only consider catalogue records created before: Enter the date to which this process will apply (defaults to a year ago): enter today's date if the deletion is to apply to all Catalogue records
3. Leave For cat ref insertion enter tag number here field blank
4. Click the **Options...** button – the Catalogue Saved Query Results screen will display:
5. The Catalogue Saved Query Results box will display, from which the Saved File created during the Insert all Unused Catalogs into a Saved File maintenance task can be selected by highlighting the Saved File and clicking the **F9 Select** button
6. Click the **F3 Start** button – a prompt with the following message will display:
Are you sure you want to Mass Delete all the Catalogs that are not reference by a Stockitem, Order or Periodical AND that are in the Selected File?

7. Click the **Yes** button to begin the deletion process – once the process is completed a prompt will display how many catalogue records were deleted: **A total of XXXX Catalogs have been deleted.**

8. Click the **OK** button

Catalogue Training

Mass Delete all Unused Catalogues

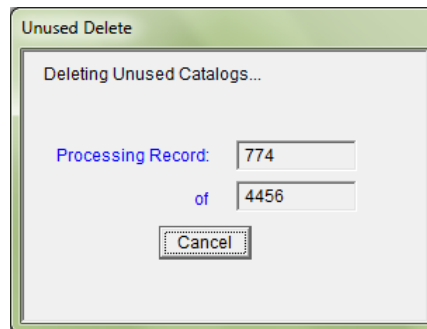

This option will delete all Catalogues not linked to an Order, Stockitem or Periodical record. There are no options for this facility. The associated Authorities will be deleted based on the Level set in [Supervisor setting: Catalogue deletion level \(1-4\) \(1=least severe, 4=most severe\)](#)

Please Note: Prior to deleting the Unused Catalogues, they can be viewed by selecting the Maintenance Task: **Insert all Unused Catalogues into a Saved File**. This enables the Catalogues to be viewed before running the Mass Delete.

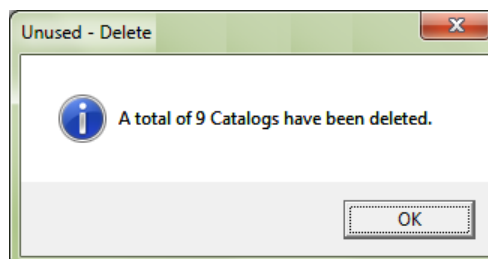

1. Choose the Maintenance Task: Mass Delete all Unused Catalogs
2. Only consider catalogue records created before: Enter the date to which this process will apply (defaults to a year ago): enter today's date if the deletion is to apply to all Catalogue records
3. Leave For cat ref insertion enter tag number here field blank
4. The **Options...** button will be *greyed* out
5. Click the **F3 Start** button – a prompt with the following message will display:
Are you sure you want to Mass Delete all the Catalogs that are not reference by a Stockitem, Order or Periodical?

6. Click the **Yes** button to begin the deletion process – an Unused Delete prompt will display:

7. Once the process is completed a prompt will display how many catalogues were deleted:
A total of XX Catalogs have been deleted.

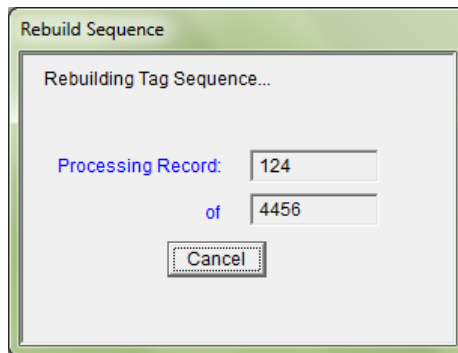

8. Click the **OK** button

Catalogue Training

Re-sequence the Tags for all Catalogs

Refreshes the MARC display based on the Default Catalogue Show Sequence column on the Marc Tags Within The System screen (**Main > Authorities > MarcTags**).

1. Choose the Maintenance Task: Re-sequence the tags for all Catalogs
2. Only consider catalogue records created before: Enter the date to which this process will apply (defaults to a year ago): enter today's date if the deletion is to apply to all Catalogue records
3. Leave For cat ref insertion enter tag number here field blank
4. There are no Select Options relating to the Maintenance Task options so the **Options...** button will be *greyed* out
5. Click the **F3 Start** button – a Rebuild Sequence prompt will display:

6. Once the process is completed a prompt will display how many catalogues were re-sequenced: **A total of XX Catalogs have been re-sequenced.**

7. Click the **OK** button

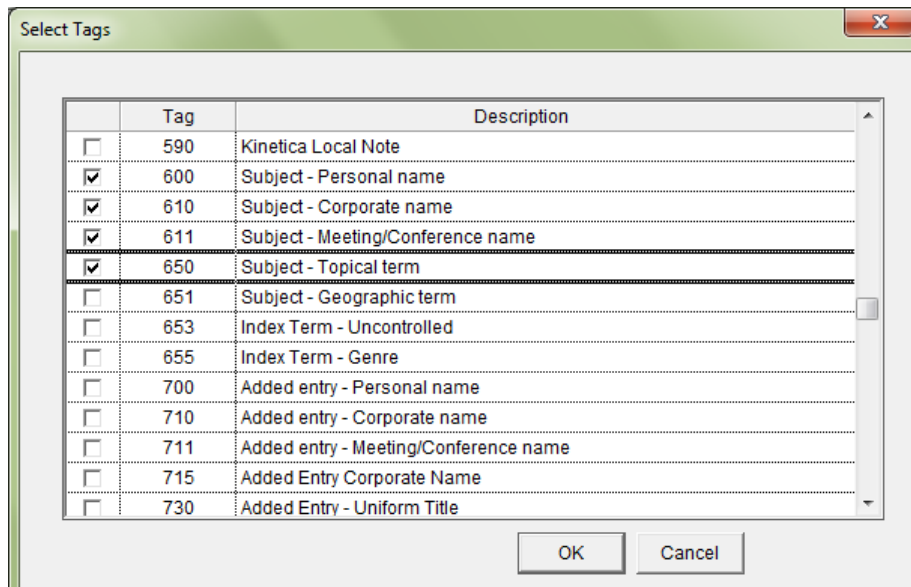

Rebuild the Marc Display

Refreshes the MARC display (the list of Marc Tags in the Catalogue record) based on the Used in Marc Display (Y/N) column on the Tag Subfields screen (**Main > Authorities > MarcTags – F7 SubF**). Can be **Y** or **N**.

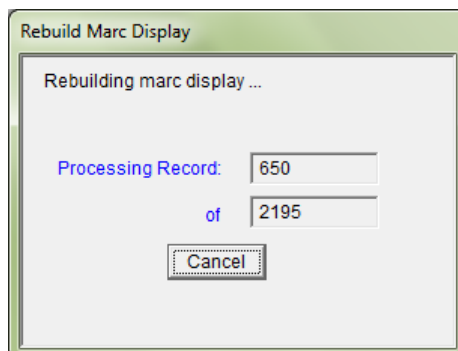

1. Choose the Maintenance Task: Rebuild the Marc Display
2. Only consider catalogue records created before: Enter the date to which this process will apply (defaults to a year ago): enter today's date if the deletion is to apply to all Catalogue records

Catalogue Training

3. Leave For cat ref insertion enter tag number here field blank
4. Click the **Options...** button – the Select Tags screen will display:

5. Select the Tag(s) which to rebuild and click the **OK** button
6. Click the **F3 Start** button – a Rebuild Marc Display prompt will display:

7. Once the process is completed a prompt will display how many catalogues were re-sequenced: **A total of XX records have been processed.**

8. Click the **OK** button

Add the Selected Tag containing Cat Ref number to All Catalogues

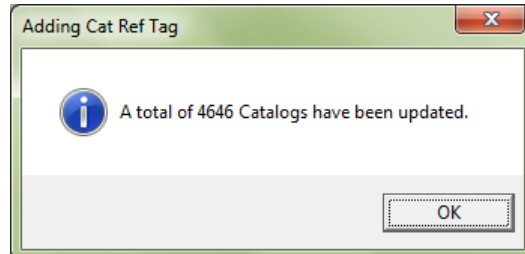

Add the Catalogue Reference Number to each Catalogue record. Mostly this will be used for adding the Catalogue Reference Number as the **035** Tag

Catalogue Training

1. Choose the Maintenance Task: **Add the selected tag containing cat ref number to all Catalogues**
2. Only consider catalogue records created before: Enter the date to which this process will apply (defaults to a year ago): enter today's date if the deletion is to apply to all Catalogue records
3. Enter the For cat ref insertion enter tag number here tag – generally **035**
4. There are no Select Options relating to the Maintenance Task options so the **Options...** button will be *greyed* out
5. Click the **F3 Start** button – an Adding Cat Ref Tag prompt will display:

6. Once the process is completed a prompt will display how many catalogues were re-sequenced: **A total of XX Catalogs have been updated.**

7. Click the **OK** button

1. Define the Label and Tags to Display for each Line – these Tags (and their Labels) define how items with a particular Form code type display in the Stockitem screen:

Title	Twilight liberation : Australian prisoners of war between Hiroshima and home / Hugh V. Clarke					
Author	Clarke, Hugh V.					
Publisher	Sydney : Allen and Unwin, 1985					
Series/ISBN	978-0-86861-518-9	Vol		Ed	1985	
Subject	Prisoners of war - Japan.					
Call Number	940.5472 CLAR	Sts Code	ANF	Form	BK	Call Set

More than one tag can be added to the Tags to Display column. The tags should be added in order of preference – for example: **100 110 700**. If the **100** tag is present in a Catalogue record then the

contents will display for that Line. If no **100** tag is present, then the contents of the **110** tag will display, and so on.

2. Click the **F3 Save** button when complete
3. Repeat for all other Form codes
4. Close the *Stockitem* module for these settings to take effect

Appendix 7: USMARC: Some Common Tags

There are literally hundreds of MARC tags that can be used. However only about 10% of these are used commonly.

COMMON TAGS	INDICATORS		SUBFIELDS		
	1	2	Many of these Subfield will never be used. In most cases a tag MUST have a Subfield a. (R) indicates Repeatable Subfields. All others are (NR) Non-Repeatable		
001 Control Number Assigned by the organisation creating or distributing the record			Contains no subfield codes – for example: <i>SL of WA, Innopac</i> Number (8 characters) 1367061X		
020 ISBN (R) Repeatable Indicators undefined	0	0	a *Subfield most often used ISBN 0732248493	c Terms of Availability \$14.50	z Cancelled or Invalid (R) 0397318487
022 ISSN (Periodicals often have an ISSN) Indicators undefined	0	0	a ISSN 1077-7199		
082 Dewey No. Used by SCIS (R) Repeatable Ind 1: Type of edition – for example: 0 Full edition Ind 2: Source of call no – for example: 4 SCIS	0	0	a Base Number 523.8	b Item Note SMI	

Catalogue Training

100 Personal name added entry (usually main author) (NR) Non-Repeatable Ind 1: Type of personal name entry element – for example: 1 Surname Ind 2: Undefined	0	0	a Personal Name	q Qualifier (Full name)	b Roman numeral	d Dates	c Qualifier ®			
			Asimov, Isaac L.	(Isaac Leo),	XV	1920-	Dr
