TABLE OF CONTENTS

WELCOME

Welcome to the *OpenOPAC 6.3.2* Installation Guide.

This is for sites who are already using the Amlib programs Version 6.3 Client software and are licensed to install OpenOPACs.

Read the Installation Notes First

Please carefully read the entire installation guide prior to commencing the actual *OpenOPAC* release installation. If you have not already installed OpenOPACs previously refer to the full installation instructions for OpenOPAC which includes the configuration and set up of OpenOPAC. However use the Version 6.3.2 Installation (OCLC.OPEN.FrontendSetup.6.3.854.exe) as the installer, as this is the latest.

https://www.oclc.org/support/services/amlib/downloads-software-updates/version6-3/updates-and-patches.en.html

If you have any questions please log a support incident on TOPdesk https://oclc.topdesk.net/tas/public/login/form or email support-anz.oclc.org

If you do not know your TOPdesk login please email support-anz@oclc.org and we will send it to you.

If you have any queries about the installation, please email support (support-anz@oclc.org) or find the full installation notes on the site.

Backup existing Style and images

If you have an existing Version 6.3 OpenOPAC, there should be no need to upload the catalogues again. Your OpenOPAC style should remain without altering. However, as a precaution if you have previously customized your pages, save these Images and Style folders to a Backup folder:
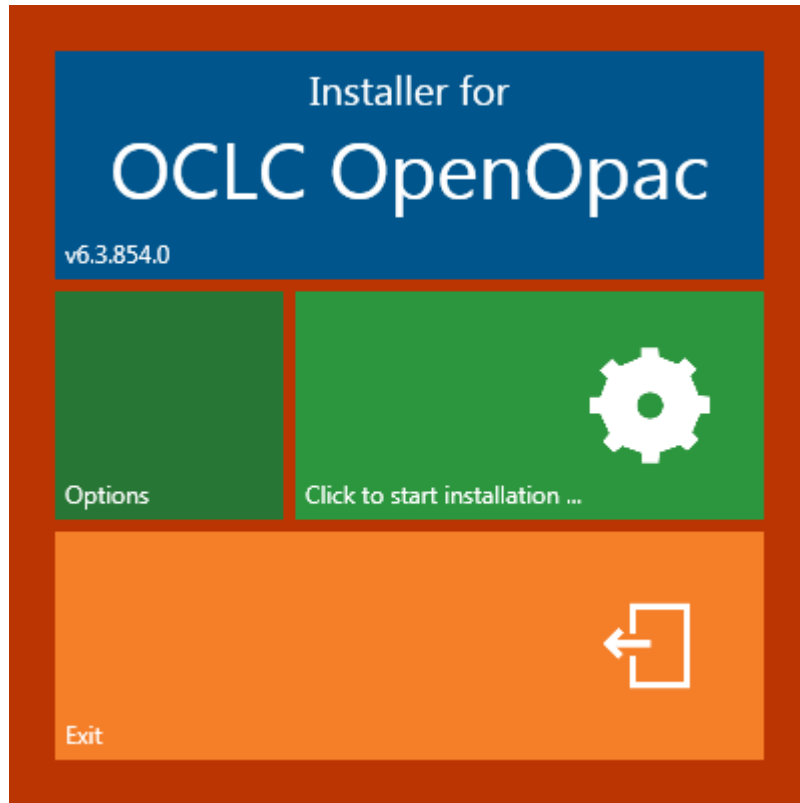

- C:\inetpub\wwwroot\OCLC\Frontend\Styles
- C:\inetpub\wwwroot\OCLC\Frontend\Images
- C:\inetpub\wwwroot\OCLC\Frontend\ImagesPublic

Serial Numbers

As you are upgrading you will not need a new serial key, as the program will detect if one was already supplied previously. If you do require a Serial key contact Amlib support at support-anz@oclc.org.

Install OCLC OpenOPAC

1. Run the installer OCLC.OPEN.FrontendSetup.6.3.854.exe

2. The Installer for OpenOPAC main view will display

3. Select **Click to start installation.** As it is an upgrade the Options should already be configured

4. The installation will run through and the button will change to **Complete** when complete

5. Select **Exit**

6. The OpenOPAC should then be able to be operational with the changes applied

If you encounter any problems during the installation of Version 6.3.2 please log a support call on TOPdesk. If you do not know your TOPdesk login please email support-anz@oclc.org requesting these details.

See the Release Notes for Changes in Version 6.3.2

Find the changes made in this release from the Amlib Content Portal.

Log into
