OpenReports Installation Guide

WELCOME

Welcome to the **OPENReports** Installation Guide.

OVERVIEW

The installation of the **Open Reports** involves the following steps:

1. Install OPENReports
2. Configure Database Connection

Note: It can be installed on the Amlib server or a separate server depending whether it's to be for internal use or external use

BEFORE YOU BEGIN THE INSTALLATION...

Before Installing **OpenReports** you **must have** upgraded to or installed **Amlib 6.1** on your server.

Read the Installation Notes First

Please carefully read the entire installation guide prior to commencing the actual **OPENReports** installation.

If you have any questions please log a support call on TOPdesk
<https://oclc.topdesk.net/tas/public/login/form>

If you do not know your TOPdesk login please email support-anz@oclc.org and we will send it to you.

Serial Numbers Required for Installation of Amlib Modules

The **OPENReports** installation requires a Serial key. Your library is covered for installation & use of OPENReports by your Library's Amlib licence. Please contact Amlib Support via Topdesk
<https://oclc.topdesk.net/tas/public/login/form> before commencing the installation to receive this Serial key.

OpenReports Installation Guide

OPENREPORTS SUPPORTED OPERATING SYSTEMS & SYSTEM REQUIREMENTS

Operating System	<ul style="list-style-type: none">• <i>Windows Server 2008, 2012</i>• <i>Windows 7</i>
.Net Framework	<ul style="list-style-type: none">• <i>4.6 or higher including Web Server (IIS) Support and HTTP Activation</i>
IIS	<ul style="list-style-type: none">• 6.0 or later with ASP.net support installed
Java runtime	<ul style="list-style-type: none">• 6.0 or later
Memory (RAM)	<ul style="list-style-type: none">• Minimum 4GB
Hard Disk	<ul style="list-style-type: none">• Minimum 40GB depending on the size of the catalogue
Browser	<ul style="list-style-type: none">• IE 10 or higher• Chrome, Firefox, Opera
JavaScript	<ul style="list-style-type: none">• Must be activated
Cookies	<ul style="list-style-type: none">• Must be activated• Automatic mobile device detection does not work without cookies. When cookies are disabled, the site can't store culture information [for example, the language that is selected and the date settings] and the login information is stored in a way that is considered to be unsafe.

OpenReports Installation Guide

SECTION 1: PRE REQUISITES

If not installed already you must first install **Adobe Acrobat Reader**

IIS with **ASP.NET** support must also be installed. For information on how to complete this please see **Appendix A and B**.

SECTION 2: INSTALL OPENREPORTS

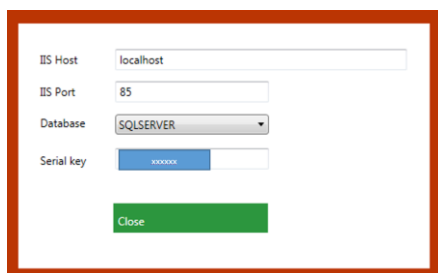

Install OCLC OpenReports

OpenReports Software can all be found in the Version 6.2 folder, here under the '[Set up Programs](#)' tab in the Amlib support section on the OCLC.org website.

1. Run installer [OCLC.REPORT.OpenReportsSetup.exe](#) – the installer main view screen will display:

2. Select **Options** - the options view screen will display
3. Enter the **IIS host** name, this should be the host name of the server/computer or if it is only to be accessed via network or a public domain name e.g.: <http://library.yourinstitution.com>
4. Enter the **IIS port** number you have assigned to OPENReports.
Note: if you have instances of NetOPAC or OpenOPAC installed ensure there are no confusion between the port numbers. Each application will need its own port number
5. Enter your **Serial Key** provided by OCLC

6. Select **Close** – the installer main view will display with the option to start the installation process enabled:

7. Select **Click to start installation....**
8. On completion of the installation a Complete message is shown on the installer main view:

9. Select **Exit** to finish the installation

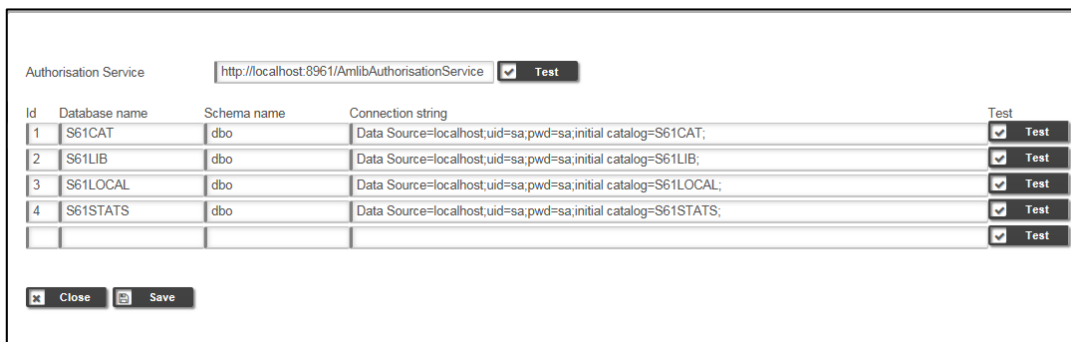

OpenReports Installation Guide

SECTION 3: CONFIGURE DATABASE CONNECTION

1. Open a browser and enter the OpenReports URL. Enter `http:// host name : port number` as provided in section 1, step 5 for example: <http://library.yourinstitution.com:85/>

2. Select the **Change connection** button on the top right-hand corner - the database connection screen will display:

3. Update the following field:
 - a. Leave the Authorisation Service as default:

- b. Update each Database connection string line to reflect your database setup:

Id	Database name	Schema name	Connection string	Test
1	AMCAT	dbo	Data Source=localhost;uid=SYSADM;pwd=SYSADM;initial catalog=AMCAT;	<input checked="" type="checkbox"/> Test
2	AMLIB	dbo	Data Source=localhost;uid=SYSADM;pwd=SYSADM;initial catalog=AMLIB;	<input checked="" type="checkbox"/> Test
3	AMLOCAL	dbo	Data Source=localhost;uid=SYSADM;pwd=SYSADM;initial catalog=AMLOCAL;	<input checked="" type="checkbox"/> Test
4	AMSTATS	dbo	Data Source=localhost;uid=SYSADM;pwd=SYSADM;initial catalog=AMSTATS;	<input checked="" type="checkbox"/> Test

- a. **Id:** Leave as default
- b. **Database Name:** Type in Database name
e.g. AMCAT, AMLIB, AMLOCAL, AMSTATS
- c. **Schema Name:** Leave as default

d. **Connection String:**

Data Source=**XXX**;uid=**XXX**;pwd=**XXXX**;initial catalog=**XXX**;

Enter the **host name** e.g.
library.yourinstitution.com

Enter Database
name e.g. AMCAT

Enter the Amlib database user id & password by
default **uid** =SYSADM **pwd**=SYSADM

e. To ensure the database connection string have been entered correctly select the **Test** button.

- i. On entering the database connection correctly the following message will appear:

- ii. On entering the database connection in-correctly the following message will appear :

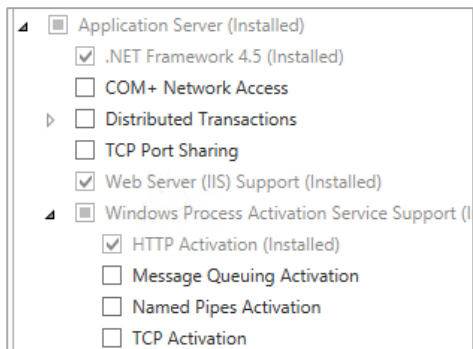

See: [Issue 1: Database name Error](#) for resolution

4. If all database connection string have been tested correctly select the **Save** button
5. Select the **Close** button to complete the setup

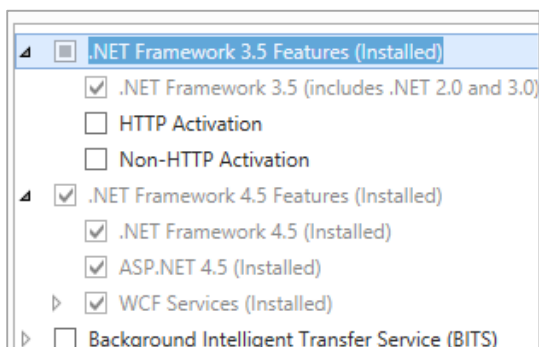

APPENDIX A: INSTALLATION OF REQUIRED .NET COMPONENTS

Windows Server 2012

1. On the **Start** page > Select **Server Manager** Tile > Select **OK**.
2. In **Server Manager** > select **Dashboard** > Select > **Add roles and features**.
3. In the **Add Roles and Features Wizard** [on the **Before you begin** page] > Select **Next**.
4. On the **Select installation type** page > select **Role-based or feature-based installation** > Select **Next**.
5. On the **Select destination server** page > select **a server from the server pool** > select **your server** > Select **Next**.
6. On the **Select server roles** page, expand **Application Server** and ensure the following is installed:

7. On the next page make sure the following are installed:

Confirm and finalise installation, please note that you may require the Windows Server 2012 installation media to complete this installation

Windows Server 2008

Please run the .NET installer provided with the OpenOPAC installers.

APPENDIX B: INSTALLATION/CONFIGURATION OF IIS

Install IIS with .NET support on Windows Server 2012

1. On the **Start** page > Select the **Server Manager** Tile > Select **OK**.
2. In **Server Manager** > Select **Dashboard** > Select **Add roles and features**.
3. In the **Add Roles and Features Wizard**, [on the **before you begin** page] > Select **Next**.
4. On the **Select installation type** page > Select **Role-based or feature-based installation** > Select **Next**.
5. On the **Select destination server** page, select > **Select a server from the server pool**, > select **your server** > Select **Next**.
6. On the **Select server roles** page > select **Web Server (IIS)** > Select **Next**.
7. On the **Select features** page > Select **Next**.
8. On the **Web Server Role (IIS)** page > Select **Next**.
9. On the **Select role services** page, note the preselected role services that are installed by default, expand the **Application Development** node, and then > select **ASP.NET 4.5**. (If you installed **.NET 3.5**, select **ASP.NET 3.5** also.)
10. On the **Summary of Features to install** page, confirm your selections, and then > Select **Install**.
11. In the **Add features that are required for ASP.NET 4.5?** box > Select **Add Features**.
 - The following additional features are added:
12. **.NET Extensibility 4.5**
13. **ISAPI Extensions**
14. **ISAPI Filters**
15. **.NET Extensibility 3.5** (If **ASP.NET 3.5** was selected)
16. > Select **Next**.
17. On the **Confirm installation selections** page > Select **Install**.
18. On the **Installation progress** page, confirm that your installation of the Web Server (IIS) role and required role services completed successfully, and then > select **Close**.
19. To verify that IIS installed successfully, type the following into a web browser:
http://localhost
The default IIS Welcome page is displayed.

Install IIS with .NET support on Windows Server 2008 or 2008 R2

1. Select **Start > Administrative Tools > Select Server Manager**.
2. In **Roles Summary > Select Add Roles**.
3. Use the **Add Roles Wizard** to add the **Web server** role.
4. On the **Select Role Services** page, note the preselected role services that are installed by default, and then select the following additional role services:
 - **ASP.NET**
 - **.NET Extensibility**
 - **Request Filtering**
 - **ISAPI**
 - **ISAPI Extensions**
5. On the **Summary of Features to install** page, confirm your selections > Select **Install**.
6. On the **Installation Results** page, confirm that your installation of the Web Server (IIS) role and required role services completed successfully > select **Close**.
7. To verify that IIS installed successfully, type the following into a Web browser:
http://localhost
You should see the default IIS Welcome page.

Install IIS with .NET support on Windows 7 and Windows Vista

1. Select **Start > Select Control Panel**.
2. In **Control Panel > Select Programs > Select Turn Windows features on or off**.
3. In the **Windows Features** dialog box, Select **Internet Information Services** to install the default features, and then select the following additional features:
 - **ASP.NET**
 - **.NET Extensibility**
 - **Request Filtering**
 - **ISAPI**
 - **ISAPI Extensions**
4. Select **OK** to close the **Windows Features** dialog box.
5. To verify that IIS installed successfully, type the following into a Web browser:
http://localhost
You should see the default IIS Welcome page.

APPENDIX C: TROUBLESHOOTING

Issue 1: Database name Error

Resolution: The above message indicate either the database name and/or connection string have been defined incorrectly.

Please verify the database name specified by checking the SQL.ini file inside your /Amlib folder on your server. *The below example of the SQL.ini file indicate that the correct database name which are: AM6CAT, AM6LIB, AM6LOCAL, AM6STATS & AM6WEB that need to be entered into the 'Connection Settings' under the Database name field, and huynhpme needs to be entered into the connection string field:*

```
[Odbcrt]
; The following is for the ODBC / SQLServer router. The DSN keyword will
; be the same as the System Data Source setup in the ODBC32 setup
; in Control Panel
longbuffer=20000
REMOTEDBNAME=AM6CAT, DRIVER=SQL Server; SERVER=huynhpme \SQLEXPRESS; DATABASE=AM6CAT
REMOTEDBNAME=AM6LIB, DRIVER=SQL Server; SERVER=huynhpme \SQLEXPRESS; DATABASE=AM6LIB
REMOTEDBNAME=AM6LOCAL, DRIVER=SQL Server; SERVER=huynhpme \SQLEXPRESS; DATABASE=AM6LOCAL
REMOTEDBNAME=AM6STATS, DRIVER=SQL Server; SERVER=huynhpme \SQLEXPRESS; DATABASE=AM6STATS
REMOTEDBNAME=AM6WEB, DRIVER=SQL Server; SERVER=huynhpme \SQLEXPRESS; DATABASE=AM6WEB
```

Id	Database name	Schema name	Connection string	Test
1	AM6CAT	dbo	Data Source= <u>huynhpme</u> uid=SYSADM;pwd=SYS,	<input checked="" type="checkbox"/> Test
2	AM6LIB	dbo	Data Source= <u>huynhpme</u> uid=SYSADM;pwd=SYS,	<input checked="" type="checkbox"/> Test
3	AM6LOCAL	dbo	Data Source= <u>huynhpme</u> uid=SYSADM;pwd=SYS,	<input checked="" type="checkbox"/> Test
4	AM6STATS	dbo	Data Source= <u>huynhpme</u> uid=SYSADM;pwd=SYS,	<input checked="" type="checkbox"/> Test

Issue 2: Authorisation Service Connection Error

Resolution: The above message indicate that database name specified inside the 'Connection Settings' screen contains invalid characters.

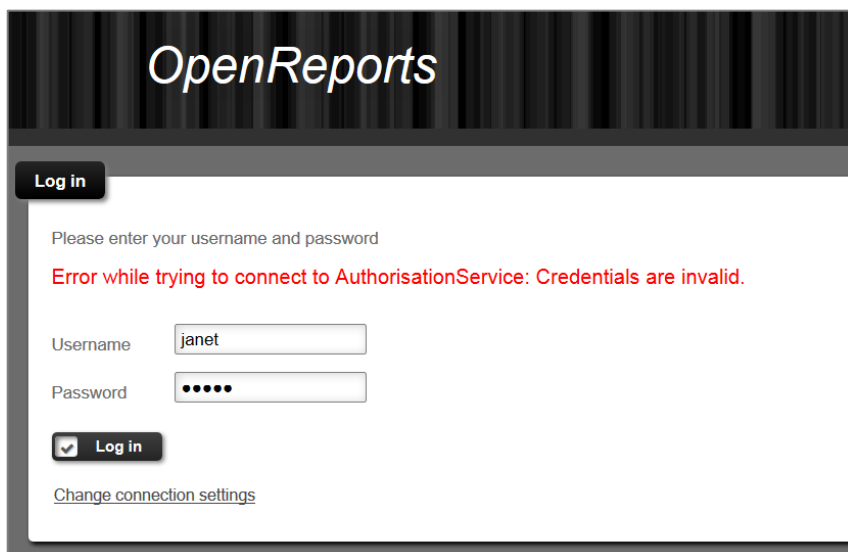

Please verify the database name specified by checking the SQL.ini file inside your /Amlib folder on your server. *The below example of the SQL.ini file indicate that the correct database name which are: AM6CAT, AM6LIB, AM6LOCAL, AM6STATS & AM6WEB that need to be entered into the 'Connection Settings' screen*

```
[Odbcbrtr]
; The following is for the ODBC / SQLServer router. The DSN keyword will
; be the same as the System Data Source setup in the ODBC32 setup
; in Control Panel
longbuffer=20000
REMOTEDBNAME=AM6CAT, DRIVER=SQL Server; SERVER=huynhpme\SQLEXPRESS; DATABASE=AM6CAT
REMOTEDBNAME=AM6LIB, DRIVER=SQL Server; SERVER=huynhpme\SQLEXPRESS; DATABASE=AM6LIB
REMOTEDBNAME=AM6LOCAL, DRIVER=SQL Server; SERVER=huynhpme\SQLEXPRESS; DATABASE=AM6LOCAL
REMOTEDBNAME=AM6STATS, DRIVER=SQL Server; SERVER=huynhpme\SQLEXPRESS; DATABASE=AM6STATS
REMOTEDBNAME=AM6WEB, DRIVER=SQL Server; SERVER=huynhpme\SQLEXPRESS; DATABASE=AM6WEB
```

Issue 3: Installer fails to install correctly – please send the installer log file to the Amlib support staff.

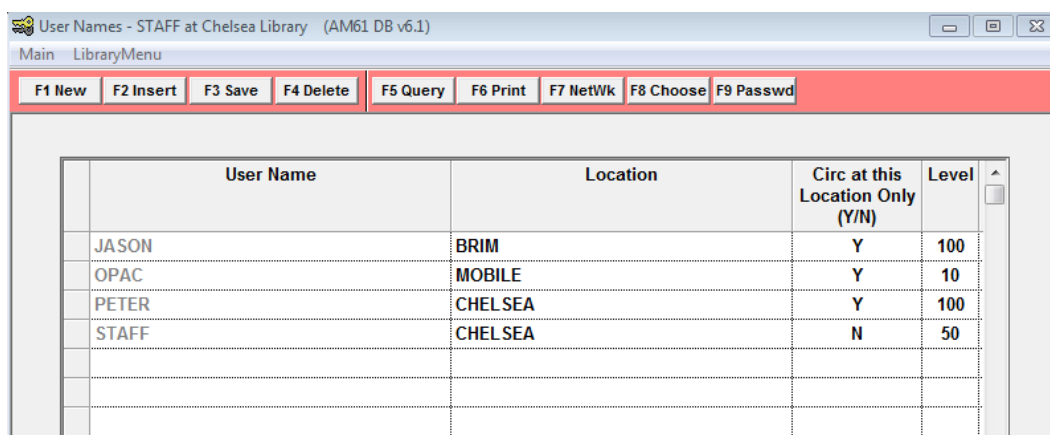

Resolution: Please Log a Topdesk call for assistance <https://oclc.topdesk.net/tas/public/login/form>
And attach the log files created during the install process that you will find here:
C:\Users\username\AppData\Local\Temp\OpenReports_201606xxxxxx.log

Issue 4: Error while trying to connect to Authorisation Service: Credential are invalid.

Resolution: The above message indicate that either the username and/or password entered are incorrect.

Please log into Amlib Client and go to **Main>Supervisor>Username**, and verify that the username exists within the 'Username' table and also password assigned is correct.

The screenshot shows a window titled 'User Names - STAFF at Chelsea Library (AM61 DB v6.1)'. The window has a menu bar with 'Main' and 'LibraryMenu'. Below the menu bar is a toolbar with function keys: F1 New, F2 Insert, F3 Save, F4 Delete, F5 Query, F6 Print, F7 NetWk, F8 Choose, and F9 Passwd. The main area contains a table with the following data:

User Name	Location	Circ at this Location Only (Y/N)	Level
JASON	BRIM	Y	100
OPAC	MOBILE	Y	10
PETER	CHELSEA	Y	100
STAFF	CHELSEA	N	50

Please refer to the Amlib User Names Guide available on the OCLC website on how to add new & update existing login within Amlib.
