Why is my Holding Code changing when I derive a record?

Last updated: Mon, 20 May 2019 12:29:37 GMT

Applies to

- WorldShare Record Manager

Answer

This code has been set as the default code. You can change this setting under User Preferences > Working with Records > Bibliographic Records > Default Holding Library Code (049).

Additional information

This setting is user based. Changing it under one account will not change it for another.
