In ILLiad, is there a way to add in additional queues that we can mark items "In Transit" and "Check Out" in WebCirc?

Symptom

• You have special queues you set up and you want to be able to Mark items "In Transit" or to "Check Out"

Applies to

• ILLiad

Resolution

You can have special queues, but would have to route them to the proper queues to mark the items "In Transit" and "Check Out." This is built into the system. You can find the information in the Using WebCirc documentation.
