Is there a way to turn off the last issued to field in item statistics so that you don’t see the patron’s name?

Answer

There is not a way for the system to stop retaining the last issued to patron field. If your library does not want this information to display make sure the worker has the

CIRCULATION_DESK_PRIVACY or STUDENT_WORKER_RESTRICTED roles. These two lack the permission that displays the last issued to patron name.

Note:

If you change the transaction setting to “No” (not store history) in the configuration settings, the "Item Detail" “Last Issued to” field does not retain the patron name.
