Can more than one person from my organization use the WorldCat Digital Collection Gateway?

After you receive your Gateway key, you will be able to create separate Gateway registrations at https://worldcat.org/DigitalCollecti...y/register.jsp. Only one person can manage a collection at a time, but that just means that one person has control of the editing. Any registered user can go into the Manage Account tab and assign a collection to themselves or someone else. In other words, if ‘Jane L.’ is out of the office, then ‘Tom S.’ can assign any of the collections assigned to ‘Jane L.’ to himself and manage the metadata map and sync schedule.
