Where does the currency exchange data come from?

Last updated: Fri, 10 Apr 2020 18:53:05 GMT

Applies to

• WorldShare Acquisitions

Answer

Starting with the April 2019 release of WorldShare Acquisitions, when entering an order, you can collect the current currency exchange rate using the button 'Use current rate'.

The data that is collected using this button currently comes from an online source, but this may be changed to come from an internal source in the future.
