Can I change default Project locations in the Project Client?

Symptom

• You would like to move the location of projects from the default location of the user profile.

Applies to

• CONTENTdm
• Project Client
• Projects

Resolution

No, you can not change the default location of where projects are created. The Project Client follow Windows guidelines and isn't determined by the Project Client software.

However, you do have the ability to share a project and specify the location following the guide.
