Create a catalogue

Learn how to create a catalogue in Amlib.

Check Catalogue for Existing Records

It is a good idea to search the Catalogue module to see if the item has been entered already, and just needs a Stockitem record attached. Searching for an existing record can be done in the Catalog screen (using the ISBN) or in the Stockitem screen (for example: using an Author or Title search). The ISBN can even be wanded if the Barcode reader has been ISBN enabled.

It is preferable to create a catalogue first and then create the holding record (Stockitem). If the Stockitem is processed first, not all the Tags are made when the Catalogue is created from the Item menu. For example: Subject headings are not transferred across.
Keywords are created through association with MARC tags – for example: a Subject keyword would apply to all tags defined from 600 through to 699 – ie: Topical term (650), Personal name (600), Geographic (651), etc. Therefore when creating your entry, it is important to have a Catalogue record as well as a Stockitem because keyword searching will be important.

There are three manual entry methods available:

1. Work Sheet Method
   - After choosing a template related to the form of the data (for example: fiction/non-fiction etc.) the required fields can be filled in: Authority listings can be accessed when appropriate (for example: for standard entry of Authors, Subjects, Publishers, etc)

2. Editing existing records
   - It is possible to duplicate an existing record and alter the relevant data

3. New record from scratch
   - No Lead Thru method: Tags can be inserted and built up to create a full record

**Please Note:** Before beginning to use the Worksheet manual entry, you need to check the tags that will be automatically displayed. This is done in Main > Catalogue > CatLeadThruSets.

**Work Sheet Method**

1. Launch the *Amlib* client

2. Go to Main > Catalogue > Catalogue (or the ![icon](https://help.oclc.org/Library_Management/Amlib/Catalogue/Create_a_catalogue) icon) – the Catalog screen will display:

   ![Catalogue Screen]

3. From the menu, select Catalogue > Catalog Create – the Select Template prompt will display:
4. Click on the button for an appropriate Lead Thru set – for example: Fiction

5. The Work Sheet will display with a number of preset MARC tags already populated:

6. An item’s bibliographic details can now be entered – as you move through the Work Sheet, the headings (descriptors) change, so it is possible to observe the type of data required in the subfield of the tag (see also Appendix 5: MARC Tag Subfields & Punctuation for more information)
7. Where the data is Authority based (for example: Author, Subject heading, Series, etc.) a listing of Authorities can be viewed and selected – for example: to search for a particular Author, type the first few letters of the surname, highlight the row and click the **F1 Check** button.

8. The **Existing Authority Options** screen will open displaying all matching Authorities and the number of Catalogue records which use each Authority:

```
<table>
<thead>
<tr>
<th>Tag No</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
</tr>
</thead>
<tbody>
<tr>
<td>020</td>
<td>0099276941</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>082</td>
<td>HOL</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>100</td>
<td>Hollinghurst, Alan</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>245</td>
<td>Spell, Tho</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>440</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>650</td>
<td>Crime</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>700</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
```

*Double Click a row for validation (or Press F1)*

OCLC

https://help.oclc.org/Library_Management/Amlib/Catalogue/Create_a_catalogue

Printed: Fri, 23 Sep 2022 21:30:27 GMT
9. To select an Authority in the table, simply double-click on it: the contents of the Tag being checked will then change to match the selected Authority (the text will also change colour from black to green).

10. Once selected (or if there is no matching Authority), click on the red [X] to close the selection table (if there were no Authorities found the contents of the tag being checked will turn red, if there were Authorities found but none were selected the contents will turn pink).

11. To enter additional tags, click the F2 Insert button – the Select For Creation screen will display (the preset Tags allow for up to 40 entries):
12. Find the required Tag and double-click it to select it – a new entry with the selected Tag No will appear in the Work Sheet screen.

13. Click the F3 Save button when the record is complete.

14. If new Authorities are to be created, a prompt with the following message will display: **Some new Authorities will be created. Continue with Save?** (the new Authorities will be highlighted in red, so you can check them)

15. Click the Yes button – the Created Catalogue – Select Next Action prompt will display:

16. If you intend to create your holdings immediately, then highlight the **Create a Stockitem** and click the OK button (alternatively you can select the **Display the created Catalogue** if you wish to review the actual Catalogue record)
Adding Stockitems

This section continues from the section above. If you don’t immediately choose to create a stockitem record, you can select XReferences > StockItems from the Catalog screen menu (or click the Holdings button on the Catalog screen) to initiate the process.

1. A prompt with the following message will display: No Stockitems exist for the Catalogue. Do you wish to create a new Item?

   ![No Stockitems exist for the Catalogue. Do you wish to create a new Item?]

2. Click on the Yes button – a New Stockitem prompt will display with the following message: Please choose a Form Type for the new Stockitem:

   ![Please choose a Form Type for the new Stockitem]

3. Choose the appropriate Form type and click on the OK button – the main Stockitem screen will enter creation mode (the F2 Insert button will appear bolded) and a number of fields will be automatically pre-populated:
4. Complete the other fields as required – for example: St(at)s Code, Current Cost, Floor location, etc – to access a list of codes in a field enter .<Tab>
   - For example: in the Stats Code field, entering .<Tab> will display a list of your Stats Codes and Descriptions – double-click on an entry to select it:

5. Scan in barcode in the Item No field (if you wish to create a system-generated barcode, leave this field blank)

6. Click on the F2 Insert button when complete – a prompt with the following message will display: The Item has been inserted.

7. Click the OK button
Multiple Copies

To enter multiple copies of the same catalogue item:

1. Scan in a new barcode into the Item No field – the F2 Insert button will once again become bolded
2. Change any other details as required – for example: Stats Code, Copy No and Floor location
3. Click the F2 Insert button when complete

USMARC: Some Common Tags

There are literally hundreds of MARC tags that can be used. However only about 10% of these are used commonly.
### COMMON TAGS

<table>
<thead>
<tr>
<th>COMMON TAGS</th>
<th>INDICATOR 1</th>
<th>INDICATOR 2</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>1</td>
<td>2</td>
</tr>
</tbody>
</table>

### SUBFIELDS

Many of these subfields will never be used. In most cases a tag must have a subfield A.

(R) indicates repeatable subfields. All others are (NR) non-repeatable.

#### 001
Control Number

- Contains no subfield codes – for example: *SL of WA*, *Innopac*
- Assigned by the organisation creating or distributing the record
- Number (8 characters)
- 1367061X

#### 020
ISBN

- **(R)** Repeatable Indicators undefined
- **(R)** Indicators undefined
- **(R)** Repeatable
- *[a]* Subfield most often used
- *[c]* Terms of Availability
- *[z]* Cancelled or Invalid
- ISBN
