How do I export bibliographic records from Record Manager to ALMA over TCP/IP

Symptom

- I am unable to export bibliographic records from Record Manager to ALMA over TCP/IP

Applies to

- WorldShare Record Manager

Resolution

It is recommended that when exporting bibliographic records to Alma ILS that a password of over ten characters is used. This password will need to be changed locally in Alma.

To review your TCP/IP settings for exporting in Record Manager:

1. Select User Preferences
2. Select Exporting Bibliographic Records
3. Select the TCP/IP tab
4. Under Authentication options dropdown choose Logon ID
5. The ID and password settings will now display

Additional Information

For other help on Record Manager export settings, see Exporting Bibliographic Records
