Docline 3.2.9.0 Automatic Update Not Putting Files In Correct Location

Symptom
New Docline automatic update not putting new files in the correct location

Applies to
ILLiad 9.0 & 9.1

Resolution
The automatic update places the files in the C:\ProgramData\ILLiad\Docline. For use with ILLiad they need to go to the C:\Program Files (x86)\ILLiad\Docline.

Until the problem is fixed by Atlas you will have to manually copy the files over to C:\Program Files (x86)\ILLiad\Docline for them to work correctly.
