Which functions within ILLiad require admin privileges?

Last updated: Thu, 22 Jul 2021 21:08:10 GMT

Applies to

- ILLiad

Answer

When you Install the ILLiad Client or Upgrade the ILLiad Client, or you need to open up the ATLAS SQL Alias Manager, you need Administrative Privileges.

Additional information

On the local computers, the c:\program files (x86)\ILLiad folder needs the Users Group to have either Modify or Full Permissions. The Permissions allow you to modify Manage Addons and Set other settings within the ILLiad Client such as setting it to DEBUG logging.
