What is the best way to test some new Webpages when I am on a shared server?

Applies to

- ILLiad

Answer

Work under your NVTGC site and the TestWeb folder. So if your shared sites are ABC, CBS, and NBC and you are ABC, then the site you would add the new Webpages is under the `c:\inetpub\wwwroot\illiad\ABC\testweb`. The URL might be something like `https://www.abc.ILLiad.org/ILLiad/ABC/Testweb/logon.html` for borrowing. And `https://www.abc.ILLiad.org/ILLiad/ABC/Testweb/LendingLogon.html` for Lending.
