About License Manager

Overview

Use WorldShare License Manager to:

- Manage electronic resource license agreements including start and end dates, signed/unsigned quality, current or expired status, and so forth
- Add terms of use and make them available to other systems such as WorldShare Interlibrary loan or Tipasa
- Integrate vendor information with WorldShare Acquisitions
- Add knowledge base collections within WorldShare Collection Manager to:
  - Manage electronic holdings, at both the title and at the collection level
  - Integrate your holdings with WorldCat Discovery (WorldCat WorldShare Management Services libraries)

Watch a video

Introduction to WorldShare License Manager (5:21)

This introduction to WorldShare® License Manager video reviews the benefits of managing licensed and electronic resources and streamlining ERM workflows, as well as the system interface.
License Manager in the WorldShare interface

1. Licenses: Create, search for, and edit licenses. Clone licenses.
2. Templates: Create, search for, and edit templates for licenses. Publish templates.
3. Collection Manager: Create and edit e-resource collections via knowledge base collections. (Also available in: Metadata > Collection Manager).
5. Vendors: Create and edit vendor information (For use in and available in: Acquisitions).

Configure alerts in the Admin tab

Set up alerts to help you maintain your licenses and/or notify other library staff. See WorldShare Admin, Alerts Management.
