In the request templates, is 'Request Source' used for the source of the citation?

Last updated: Fri, 19 Nov 2021 18:37:40 GMT

Applies to

- Relais ILL

Answer

Request Source is typically assigned automatically. It is a code that is used to indicate how the request was received or submitted, e.g., W for Web, I for ISO. By default this field is hidden and typically will remain that way for most customers. The 'Source of Information' is used to indicated the source of the citation. This may be prefilled for some requests created via OpenURL.
