Why am I getting an Oops error when I go to my institution’s Discovery URL?

Last updated: Thu, 28 Jul 2022 20:59:00 GMT

Applies to

• WorldCat Discovery

Resolution

Verify that WorldCat.org is selected as a Default Database in the library’s service configuration.

1. Go to OCLC Service Configuration
2. Click through this menu path:
   > Metasearch Content > Default Databases and Licensed Content > Configure Databases to Search
3. Verify that Worldcat.org is listed and selected in the Enabled Databases for Searching tab
4. Verify that WorldCat.org is selected as a default database in the Group Configured Databases tab

Additional information

Default Databases and Licensed Content

When doing an Advanced search in WorldCat Discovery I get an "oops something went wrong" page.
